al-Khwārizmī

The Book of the Image of the Earth

(*Kitāb ṣūrat al-arḍ*)

English translation of the Arabic text in the edition of Hans von Mžik
(Leipzig: Otto Harrassowitz, 1926; reprinted Baghdad, 1962)

Every line of the edition is translated, in its order, from the line-by-line transcription in this repository (`../anchors.tsv`): the title pages, the headings, the tables of the cities and of the mountains, the descriptions of the seas, the islands, the boundaries of the countries and the rivers, and the index. The pages of the edition stand in the margin; where a page ends inside a paragraph, the mark follows the last point of the page. As in the edition, the names of the mountains stand on one page and their coordinates, row by row in the same order, on the next; the headings of these tables run across both pages, and their halves are marked with ….

The numerals of al-Khwārizmī, letters with their abjad values, are given as figures, in degrees and minutes. Two letters without their dots allow more than one value (ف 80 or 100; ب 2, 10 or 50). Where the neighbouring points of the same entry, or else of the next entries, decide clearly between the readings, the nearest is given; in the tables of the cities and in the headings of the climes, the band of the clime decides the latitude. Otherwise every value is given, as 88/108°. A group of letters that is no abjad number stays in Arabic letters. Most names stand in Arabic letters, as the edition prints them; familiar ones are given in transliteration or in their English form.

The edition's apparatus: its running numbers stand in parentheses; the numbers in square brackets are those of the same items in Suhrāb's *ʿAjā'ib al-aqālīm al-sabʿa*, as Mžik gives them; angle brackets enclose what Mžik supplies. Where his supplement begins or ends inside a word, the brackets stand on the whole words it covers; a supplement within a single word is not marked. A figure that Mžik supplies wholly or in part stands in angle brackets. Obvious misprints of the running numbers and of the brackets are corrected. Mžik's note marks are not reproduced, and his German introduction and footnotes are not translated: they are his own writing, protected until the end of 2031. The lettered footnotes are the translator's: they record misprints of al-Khwārizmī's text, the editor's corrections of it that the translation follows (his additions and corrections, p. 163), and readings that stay open. The qualifier *mukhayyar* (مخيّر) of some colours of the mountains is left untranslated; its sense here is not certain.

AI-translated (Claude), 2026, from the transcription in this repository; no person has proofread it. al-Khwārizmī's text is in the public domain. To the extent that any rights exist in this AI-produced translation, they are dedicated to the public domain under CC0 1.0. The dedication does not concern Mžik's edition or its German matter.

The Book of the Image of the Earth

Of the cities, the mountains, the seas, the islands and the rivers

The description of the mountain that surrounds the Island of the Ruby, which lies at the beginning of the boundary of the east, in the farthest part of the Sea of China, ⟨which is⟩ the Dark Sea, on which no one sails. A mountain surrounding the Island of the Ruby begins at longitude 167° 0′ and latitude 14° 30′ (596) [1457], passing to latitude 9° 0′ in a straight line (597) [1458]; then it turns round to latitude 5° 0′ and longitude 170° 0′ (598) [1459]; it passes on and enters the Dark Sea at latitude 4° 0′ and longitude 172° 0′ (599) [1460], and enters the sea at latitude 8° 30′ and longitude 178° 30′ (600) [1461]; then it surrounds the island in the shape of a basket; then the mountain comes.

The second clime ...

The mountains that are in ...

(607 608)	[1097 1098]	a mountain
(609 610)	[1099 1100]	a mountain
(611 612)	[1101 1102]	a mountain

(621 622)	[1111 1112]	a mountain

p. 43

Along longitude 178° 30′ until it ends at the equator (601) [1462]; then it turns round to longitude 176° 30′, the latitude being 3° 15/55′ beyond the equator (602) [1463]; then it turns round to longitude 179° 0′, touching the equator (603) [1464]; then it passes along this longitude until the latitude, in the first clime, is 6° 0′ (604) [1465]; then it turns round until the latitude is 9° 30′ and the longitude 176° 30′ (605) [1466]; then it turns round until the longitude is 178° 0′ and the latitude 5° 30′ (606) [1467]. Its colour is red; it is eastern, the mountain begins towards the east and passes round the island, and this is its figure.

p. 66

The seas on the globe of the inhabited earth, and its islands

The outer western sea and the outer northern sea

Its beginning is from longitude 1° 0′ and latitude 0° 10′ (967) [503]; it passes to longitude 20° 0′ and latitude 0° 10′ (968) [504]; and passes in the shape of a ṭaylasān to longitude 17° 0′ and latitude 8° 0′ (969) [505]; and passes to longitude 9° 0′ and latitude 8° 30′ (970) [506]; and passes in the shape of a qawwāra to longitude 7° 0′ and latitude 12° 30′ (971) [507]; then it passes to longitude 9° 45′ and latitude 12° 20′ (972) [508]; then it passes to longitude 9° 45′ and latitude 16° 0′ (973) [509]; and passes to longitude 10° 0′ and latitude 16° 0′ (974); it passes to longitude 10° 0′ and latitude 17° 0′ (975) [560]; then it passes in the shape of the shābūra to longitude 9° 20′ and latitude 18° 10′ (976) [561], and there is the mouth of the river روذس; and passes to longitude 9° 50′ and latitude 19° 40′

[a]The print has ضه, 805, with a small dot over the ص; the figure is صه, 95.

(977) [562]; and turns back like a shābūra to longitude 9° 15/55′ and latitude 21° 0′ (978) [563]; and passes to longitude 9° 45′, and there is the mouth of the river حوسدس, and latitude 21° 45′ (979) [564]; and passes to longitude 9° 10′ and latitude 28° 0′ (980) [565]; and passes to longitude 9° 0′ and latitude 26° 0′ (981) [566]; and passes to longitude 8° 0′ and latitude 28° 0′ (982) [567]; and passes to longitude ⟨9°⟩ ⟨0′⟩ and latitude 28° 0′ (983) [568]; and passes to longitude 8° 10′ and p. 67
latitude 29° 10′ (984) [569]; it passes to longitude 8° 0′ and latitude 31° 0′ (985) [570]; it passes to longitude 8° 30′ and latitude 32° 0′ (986) [571]; and passes in the shape of a qawwāra to longitude 7° 30′ and latitude 35° 40′ (987) [572]: that is at Tangier. Then it leaves a space of two thirds of a degree from this place, and that is on the line of the clime whose latitude is 36° 0′ (988). This place is joined to the Sea of Tangier; on it there is the figure of two idols of copper that hold up another idol by its feet with their hands, and it is said that these are the landmarks of Hercules, which no one has passed. It passes that ⟨place⟩ and comes to longitude 5° 50′ and latitude 36° 20′ (989) [573]; it passes to longitude 7° 15/55′ and latitude 37° 10′ (990) [574]; and passes to longitude 5° 0′ and latitude 37° 10′ (991) [575]; it passes to longitude 4° 0′ and latitude 37° 40′ (992) [576]; it passes to longitude 4° 30′, and there is the mouth of the river اس, and latitude 38° 45′ (993) [577]; it passes to longitude 4° 10′ and latitude 38° 45′ (994) [578]; it passes to longitude 6° 30′ and latitude 39° 15/55′ (995) [579]; it passes to longitude 5° 30′ and latitude 39° 40′ (996) [580]; it passes to longitude 6° 40′ and latitude 41° 0′ (997) [581]; it passes to longitude 6° 0′ and latitude 41° 15/55′ (998) [582]; it passes to longitude 6° 45′ and latitude 42° 0′ (999) [583]; it passes to longitude 6° 40′ and latitude 48° 0′ (1000) [584]; it passes to longitude 6° ⟨45′⟩ and latitude 48° 15′ (1001) [585]; it passes to longitude 6° 20′ and latitude 44° 0′ (1002) [586]; it passes to longitude 7° 0′ p. 68
and latitude 44° 40′ (1003) [587], and there is the mouth of a river; it passes to longitude 6° 15/55′ and latitude 45° 45′ (1004) [588]; it passes to longitude 7° 0′ and latitude 45° 25′ (1005) [589]; it passes to longitude 18° 30′ and latitude 45° 25′ (1006) [590]; it passes to longitude 14° 30′ and latitude 44° 30′ (1007) [591]; it passes to longitude 16° 20′ and latitude 45° 45′ (1008) [592]; then it passes to ⟨longitude⟩ 18° 5′ and latitude 44° 30′ (1009) [593]; it passes to longitude 18° 15/55′ and latitude 46° 25′ (1010) [594]; and passes in the shape of a qawwāra to longitude 17° 50′ and latitude 47° 15/55′ (1011) [595]; and passes to longitude 18° 30′ and latitude 48° 0′ (1012) [596]; it passes to longitude 19° ⟨0′⟩ and latitude 48° 0′ (1013) [597]; it passes to longitude 19° 0′ and latitude 48° 40′ (1014); it passes to longitude 18° 30′ and latitude 49° 15/55′ (1015) [598]; it passes to longitude 16° 20′ and latitude 49° 45′ (1016) [599]; it passes to longitude 20° 40′ and latitude 50° 30′ (1017) [600]; it passes to longitude 20° 15′ and latitude 51° 15/55′ (1018) [601]; it passes to longitude 25° 0′ and latitude 55° 0′ (1019) [602]; it passes to longitude 25° 45′ and latitude 54° 40′ (1020) [603]; it passes to longitude 36° 0′ and latitude 61° 25′ (1021) [604]; it passes to longitude 48° 30′ and latitude 61° 30′ (1022) [605]; and turns back to longitude 36° 30′ and latitude 58° 15/55′ (1023) [606]; it passes to longitude 42° 30′ and latitude 58° 0′ (1024) [607]; it passes to longitude 51° 0′ and latitude 58° 40′ (1025) [608]; it passes to longitude 56° 0′ and latitude 59° 10′ (1026) [609]; it passes in the shape of a ṭaylasān to longitude 66° 30′ and latitude 71° 45′ (1027) [610]; it passes p. 69
to longitude 60° 0′ and latitude 72° 0′ (1028) [611]; it passes to longitude 58° 0′ and latitude 78° 0′ (1029) [612]; and turns back from there to longitude one degree and latitude 78° 0′ (1030) [613]; and turns back along longitude 1° 0′ from latitude 78° 0′ to latitude 0° 10′, in the direction of longitude one degree, and so returns to the place at which we began to describe it.

The sea of Tangier and the sea of مرطاسه and the sea of Ifrīqiya

And the sea of Barqa and the sea of Egypt and Syria and the sea of رقه

And لزقه, all of them joined to one another

It begins from the Sea of Tangier, at the copper idols, from longitude 7° 30′ and latitude 35° 40′; ⟨it passes⟩ to longitude 8° 30′ and latitude 35° 30′ (1031) [615]; it passes to longitude 10° 0′ and latitude 38° 40′ (1032) [616]; it passes to longitude 18° 0′ and latitude 38° 20′ (1033) [617]; it passes to longitude 14° 0′ and latitude 32° 30′ (1034) [618]; it passes to longitude 18° 0′ and latitude 32° 0′ (1035) [619]; and there is the mouth of the river خليفان; it passes to longitude 28° 0′ and latitude 32° 0′ (1036) [620]; and passes in the shape of a ṭaylasān, passing at latitude 38° 0′ (1037) [621]; and passes to longitude 32° 0′ and latitude 32° 0′ (1038) [622]; it passes to the city of p. 70
ثوقا ⟨and the city of⟩ ذيارطس and passes to longitude 35° 30′ and latitude 32° 0′ (1039) [623]; it passes to longitude 39° 0′ and latitude 32° 15′ (1040) [624]; it passes to longitude 41° 25′ and latitude 31° 50′ (1041) [625]; and it goes down along the city of اسفاربوس and along its lower side to longitude 41° 50′ and latitude 32° 50′ (1042) [626]; it passes to the city of اقالينا, passing below it, to longitude 46° 30′ and latitude 31° 20′ (1043) [627]; then it passes to longitude 54° 30′ and latitude 31° 30′ (1044) [628]; it passes to longitude 55° 0′ and latitude 38° 0′ (1045) [629]; and passes in the shape of a qawwāra to longitude 56° 0′ and latitude 34° 0′ (1046) [630]; then it passes by Jaffa, Arsūf, Caesarea, Tripoli and Latakia; it passes to longitude 61° 0′ and latitude 34° 35′ (1047) [631]; it passes to longitude 61° 0′ and latitude 35° 20′ (1048) [632]; and turns back to longitude 57° 5′ and latitude 35° 40′ (1049) [633]; it passes to longitude 51° 40′ and latitude 35° 45′ (1050) [634]; and passes in the shape of a qawwāra to longitude 51° 20′ and latitude 37° 10′ (1051) [635], joined.

To the city of افاسس [Ephesus]; and passes in the shape of a ṭaylasān to longitude 49° 40′ and latitude 39° 5′ (1052) [636]; it passes below the city of بطرون and comes to longitude 49° 0′ and latitude 41° 0′ (1053) [637]; and passes in the shape of a ṭaylasān touching the city of نيقوموذيا [Nicomedia], at longitude 51° 5′ and latitude 44° 40′ (1054) [638]; and passes below the city of حلقيدون [Chalcedon] and comes to longitude 50° 40′ and latitude 47° 0′ (1055) [639]; it passes in the shape of a qawwāra to longitude 58° 0′ and latitude 46° 40′ (1056) [640], a place where three rivers flow p. 71
out; and it passes by the city of هرقله [Heraclea], the city of اوربون and the city of سيناق, and passes there by the mouths of four rivers and by the city of فلحس, to longitude 61° 30′ and latitude 47° 0′ (1057) [641]; and passes in the shape of a qawwāra to below the city of قرمى; it passes to longitude 68° 40′ and latitude 46° 50′ (1058) [642]; it passes to longitude 64° 20′ and latitude 46° 0′ (1059) [643]; it passes to longitude 65° 0′ and latitude 46° 20′ (1060) [644]; it passes to longitude 65° 30′ and latitude 46° 0′ (1061) [645]; it passes to longitude 70° 30′ and latitude 45° 0′ (1062) [646]; and passes by the city of دسيقاربا, and strikes the mountain قوفا together with the city, and passes along the mountain to longitude 71° 30′ and latitude 47° 30′ (1063) [647]; and passes to longitude 71° 0′ and latitude 48° ⟨0′⟩ (1064) [648]; it passes to longitude 71° 30′ and latitude 49° 0′ (1065) [649]; it passes to longitude 70° 45′ and latitude 49° 45′ (1066) [650]; it passes to longitude 69° 30′ and latitude 49° 50′ (1067) [651]; it passes to below the city of اروشينيه and passes to longitude 66° 30′ and latitude 49° 45′ (1068) [652]; it passes to longitude 66° 30′ and latitude 50° 30′ (1069) [653]; it passes to longitude 68° 5′ and latitude 52° 0′ (1070) [654]; it passes to longitude 62° 20′ and latitude 53° 45′ (1071) [655]; it passes to longitude 62° 5′ and latitude 58° 45′ (1072) [656]; it passes below the city of ثاورسانا to longitude 61° 30′ and latitude 51° 50′ (1073) [657]; then it passes in the shape of a ṭaylasān at latitude 52° 45′ (1074) [658]; and comes to longitude 54° 30′ and latitude 51° 30′ (1075) [659]; and passes below the city of اوقوطيا to longitude 54° 30′ and latitude 52° 30′ (1076) [660]; it
passes to longitude 58° 40′ and latitude 52° 30′ (1077) [661]; it passes to longitude 58° 30′ and lati- p. 72
tude 50° 40′ (1078) [662]; it passes to longitude 51° 45′ and latitude 50° 45′ (1079) [663]; and turns back to longitude 52° 45′ and latitude 51° 30′ (1080) [664]; it passes below the city of راسنياس and passes in the shape of a ṭaylasān by the mouth of nine rivers to longitude 51° 0′ and latitude 49° 0′ (1081) [665]; it passes to below the city of اسطورا at longitude 48° 50′ and latitude 48° 30′ (1082) [666]; it passes in the shape of a ṭaylasān to longitude 50° 0′ and latitude 47° 15′ (1083) [667]; and passes below the city of Constantinople and comes to longitude 50° 0′ and latitude 44° 30′ (1084) [668]; and passes to below the city of اود at longitude 48° 0′ and latitude 48° 20′ (1085) [669]; it passes to longitude 49° 0′ and latitude 43° 0′ (1086) [670]; it passes to longitude 49° 0′ and latitude 42° 0′ (1087) [671]; it passes to longitude 48° 0′ and latitude 41° 45′ (1088) [672]; it passes to

longitude 47° 30′ and latitude 42° 30′ (1089) [673]; it passes to longitude 44° 50′ and latitude 42° 25′ (1090) [674], touching the city of اسلينو; it passes to longitude 46° 30′ and latitude 41° 40′ (1091) [675]; it passes to longitude 44° 30′ and latitude 41° 0′ (1092) [676]; it passes to longitude 46° 40′ and latitude 41° 0′ (1093) [677]; it passes to longitude 45° 20′ and latitude 40° 30′ (1094) [678]; it passes to longitude 46° 30′ and latitude 40° 20′ (1095) [679]; it passes to longitude 45° 0′ and latitude 40° 0′ (1096) [680], and in it is the mouth of two rivers; it passes to longitude 46° 30′ and latitude 39° 30′ (1097) [681]; ⟨it passes to longitude 45° 30′ and latitude 39° 15′ (1097/1) [682]; it passes to longitude 46° 30′ and latitude 39° 0′ (1097/2) [683]⟩ it passes to longitude 47° 10′ and latitude 36° 10′ (1098) [684]; it passes to longitude 46° 10′ and latitude 36° 10′ (1099) [685]; it passes to p. 73
longitude 46° 40′ and latitude 34° 50′ (1100) [686]; it passes to longitude 45° 30′ and latitude 34° 50′ (1101) [687]; and passes in the shape of a qawwāra to longitude 44° 30′ and latitude 36° 0′ (1102) [688]; it passes to longitude 46° 25′ latitude 36° 45′ (1103) [689], touching a city; and passes to longitude 44° 0′ latitude 37° 50′ (1104) [690]; it passes in the shape of a ṭaylasān to longitude 40° 45′ latitude 40° 50′ (1105) [691]; and passes to longitude 40° 45′ latitude 48° 30′ (1106) [692]; and passes in the shape of a ṭaylasān to below the city of سادر at longitude 38° 0′ latitude 44° 40′ (1107) [693]; it passes to longitude 31° 15′ and latitude 44° 20′ (1108) [694], the mouth of a river; and it turns back to longitude 38° 0′ and latitude 42° 40′ (1109) [695]; ⟨and passes⟩ in the shape of a qawwāra to longitude 38° 50′ and latitude 41° 0′ (1110) [696]; it passes to longitude 38° 0′ and latitude 40° 50′ (1111) [697]; it passes to longitude 36° 30′ latitude 41° 50′ (1112) [698]; it passes in the shape of a qawwāra and strikes the fifth clime, passes down below great Rome and ends at longitude 35° 0′ and latitude 41° 45′ (1113) [699]; and passes below the city of اسطانا to longitude 34° 0′ and latitude 40° 50′ (1114) [700]; it passes to longitude 27° 5′ and latitude 42° 30′ (1115) [701], touching the mountain اروس; it passes to longitude 20° 40′ and latitude 42° 30′ (1116) [702], joined to the mountain of the temple of Venus; it passes to longitude 14° 0′ and latitude 37° 40′ (1117) [703], joined to the mountain اندواقرا; and passes to longitude 8° 20′ and latitude 37° 0′ (1118) p. 74
[704], touching the mountain لوس; it passes to longitude 8° 0′ and latitude 36° 20′ (1119) [705]; it passes to longitude 7° 30′ and latitude 36° 20′ (1120) [706], joined to the outer western sea and to the place of the three idols that we mentioned above.

The sea of al-Qulzum and the Green Sea and the sea of Sind

And the sea of India and the sea of China and the sea of Basra

Joined to one another, and it is the Great Sea

Its beginning is from longitude 55° 50′ and latitude 28° 0′ (1121) [707], touching the city of al-Qulzum and a mountain; and passes to longitude 58° 0′ and latitude 24° 0′ (1122) [708]; and passes to longitude 59° 0′ and latitude 21° 0′ (1123) [709]; and passes to longitude 59° 0′ and latitude 20° 20′ (1124) [710]; it passes in the shape of a ṭaylasān, passing at longitude 57° 40′ (1125) [711]; and passes by the city of ثاس and ends at longitude 58° 45′ and latitude 16° 30′ (1126) [712]; it passes to longitude 58° 10′ and latitude 14° 20′ (1127) [713]; it passes to longitude 59° 50′ and latitude 12° 20′ (1128) [714]; it passes in the shape of لطيلسان to below the city of شابث at longitude 58° 15/55′ and latitude 10° 50′ (1129) [715]; it passes to longitude 59° 15′ and latitude 10° 50′ (1130) [716]; it passes to longitude 59° 0′ and latitude 10° 0′ (1131) [717]; it passes to longitude 61° 30′ and latitude 8° 10′ (1132) [718], along the lower side of a city; and passes in the shape of a ṭaylasān to p. 75
longitude 68° 15′ and latitude 10° 30′ (1133) [719]; it passes to longitude 64° 40′ and latitude 10° 20′ (1134) [720]; this place is the beginning of the boundary of the Green Sea; and it passes to longitude 64° 30′ and latitude 5° 20′ (1135) [721]; it passes to longitude 65° 20′ and latitude 5° 0′ (1136)

[722]; it passes to longitude 68° 0′ and latitude ⟨5°⟩ ⟨15′⟩ (1137) [723]; it passes below a city at longitude 69° 30′ and latitude 6° 10′ (1138) [724]; and passes in the shape of a qawwāra, near the lower side of the city of الطيب and touching the lower side of the city of فتانا, at longitude 72° 30′ and latitude 2/10/50° 20′ (1139) [725]; it passes to longitude 66° 20′ and latitude beyond the equator 0° 20′ (1140) [726]; it passes to longitude 68° 40′ and latitude 8° 30′ beyond the equator (1141) [727]; and passes to below the city of رافاطا at longitude 65° 0′ and latitude 7° 30′ beyond the equator (1142) [728]; and passes to longitude 68° 0′ and latitude 18° 0′ (1143) [729].

These latitudes that we mention are beyond the equator.

Until it crosses ⟨it⟩, and then we shall mention it.

It passes to longitude 72° 0′ and latitude 14° 0′ (1144) [730]; it passes to longitude 112° 0′ and latitude 14° 0′ (1145) [731]; it passes to longitude 164° 0′ and latitude 18° 30′ (1146) [732]; this place touches the Dark Sea; and the Green Sea passes to longitude 164° 0′ and latitude 10° 0′ (1147) [733]; it passes to longitude 161° 40′ and latitude 10° 0′ (1148) [734]; and passes to longitude 163° 10′ and latitude 6° 20′ (1149) [735]; it passes in the shape of a ṭaylasān to longitude 161° 5′ and latitude 3° 0′ (1150) [736]; and passes in the shape of a qawwāra to longitude 157° 30′ (1151) [737]; then it comes p. 76
to longitude 161° 0′ and latitude 0° 0′ to the equator (1152) [738].

Then the latitude that we mention now is again as we have always given it from the beginning of the book.

And passes from there in the shape of a ṭaylasān to longitude 162° 10′ (1153) [739]; and comes to longitude 160° 0′ and latitude 6° 0′ (1154) [740]; it passes in the shape of a qawwāra to longitude 159° 0′ (1155) [741]; and comes to longitude 160° 0′ and latitude 9° 30′ (1156) [742]; it passes in the shape of a ṭaylasān, passing at longitude 161° 30′ (1157) [743]; and comes to longitude 160° 50′ and latitude 16° 20′ (1158) [744]; it passes in the shape of a ṭaylasān again, passing by the city of اسفتر, which is the city of الرفأ; it passes to longitude 157° 0′ ⟨and latitude 16° 20′⟩ (1159) [745]; and comes to longitude 158° 0′ and latitude 16° 30′ (1160) [746]; and passes in the shape of a ṭaylasān also by the city of فرداثرا and the mouth of the river دوايس and comes to longitude 134° 40′ and latitude 8° 20′ (1161) [747]; and passes by the mouth of the river سالس and comes to longitude 151° 0′ and latitude 8° 0′ (1162) [748]; and passes to longitude 151° 30′ and latitude 1° 10′ (1163) [749]; and passes below the city of سمردن and comes to longitude 146° 10′ and latitude 1° 15′ (1164) [750]; and passes to longitude 146° 10′ and latitude 8° 20′ (1165); and passes in the shape of a qawwāra by the mouth of the river حوساں and comes to longitude 145° 45′ and latitude 6° 20′ (1166) [753]; and passes in the shape of a ṭaylasān to longitude 147° 0′ and latitude 7° 5′ (1167) [754]; and passes in the shape of a qawwāra to longitude 149° 0′ and latitude 7° 5′ (1168); and p. 77
passes in the shape of a qawwāra to longitude 149° ⟨0′⟩ and latitude 8° 30′ (1169) [755]; it passes in the shape of a ṭaylasān to longitude 148° 30′ and latitude 10° 0′ (1170) [756]; and passes in the shape of a ṭaylasān and passes by the mouth of the river فسوعس and comes to longitude 146° 30′ and latitude 11° 0′ (1171) [757]; and passes in the shape of a qawwāra, passing at latitude 9° 30′ (1172) [758]; and comes to longitude 145° 20′ and latitude 10° 0′ (1173) [759] a place the mouth of the river طماس and passes to longitude 144° 0′ and latitude 11° 0′ (1174) [760]; and passes to longitude 148° 0′ and latitude 15° 45′ (1175) [761]; and passes to longitude 141° 45′ and latitude 15° 40′ (1176) [762]; it passes in the shape of a ṭaylasān, passing by the mouths of ten rivers, among them the river Ganges, the river دالس, the river سروى and the river اسدوس, and others that have no name on the map; and comes to longitude 130° 30′ and latitude 18° 0′ (1177) [763]; and passes in the shape of a qawwāra, passing at latitude 12° 30′ (1178) [764]; and passes to longitude 126° 30′ and latitude 12° 40′ (1179) [765]; and passes to longitude 126° 20′ and latitude 14° 40′ (1180) [766] the mouth of the river ثوس it passes to longitude 128° 0′ and latitude 16° 20′ (1181) [767]; then it passes to longitude 120° 15/55′ and latitude 15° 40′ (1182) [768], having passed below the city of نيبرا; and passes to longitude 120° 0′ and latitude 14° 0′ (1183) [769]; and passes to longitude 117° 40′ and latitude 15° 0′ (1184) [770]; it passes to longitude 116° 40′ and latitude 15° 20′ p. 78

(1185) [771]; it passes to longitude 116° 55′ and latitude 18° 40′ (1186) [772]; and passes below the city of قطرا and the mouth of the river وبدس and comes to longitude 118° 30′ and latitude 14° 50′ (1187) [773]; and passes by the city of موزيرس and the mouth of the river فدس and comes to longitude 109° 0′ and latitude 16° 10′ (1188) [774]; it passes to longitude 105° 40′ and latitude 18° 45′ (1189) [775]; it passes to longitude 107° 0′ and latitude 16° 30′ (1190) [776] touching the city of قاطلا it passes to longitude 104° 30′ and latitude 17° 45′ (1191) [777]; it passes to longitude 106° 40′ and latitude 18° 30′ (1192) [778]; it passes to longitude 105° 50′ and latitude 19° 0′ (1193) [779]; it passes to longitude 106° 30′ and latitude 19° 20′ (1194) [780]; it passes to longitude 106° 0′ and latitude 19° 40′ (1195) [781]; it passes to longitude 106° 20′ and latitude 20° 0′ (1196) [782]; and passes by the city of اميرس and passes to longitude 108° 0′ and latitude 20° 10′ (1197) [783]; it passes to longitude 102° 40′ and latitude 20° 40′ (1198) [784]; it passes to longitude 100° 0′ and latitude 20° 10′ (1199) [785]; it passes to longitude 99° 40′ and latitude 21° 10′ (1200) [786]; it passes to longitude 98° 40′ and latitude 21° 15′ (1201) [787]; it passes in the shape of a qawwāra, passing at latitude 20° 20′ (1202) [788]; and passes to below a city at longitude 96° 20′ and latitude 21° 30′ (1203) [789]; it passes to longitude 87° 0′ and latitude 21° 15′ (1204) [790]; this place is at the whirlpool; it passes in the shape of a qawwāra, passing at longitude 86° 30′ (1205) [791]; and comes to longitude 87° 0′ and latitude 28° 0′ (1206) [792]; and passes in the shape of a qawwāra, passing at latitude 28° 30′ (1207) [793]; and comes to longitude 90° 0′ and latitude 23° 0′ (1208) [794]; and passes to longitude 92° 25′ and latitude 22° 20′ (1209) [795]; and passes in the shape of a ṭaylasān, passing by the city of النيرون and the city of al-Daybul, and passes to longitude 106° 0′ and latitude 29° 0′ (1210) [796]; and passes by the city of تيزونائن, Sīrāf, Jannāba, Mahrūbān and ʿAbbādān, and comes to longitude 78° 40′ and latitude 30° 20′ (1211) [797]; and passes in the shape of a ṭaylasān, passing by the city of al-Baḥrayn and comes to longitude 75° 0′ and latitude 24° 0′ (1212) [798]; and passes to longitude 85° 20′ and latitude 22° 20′ (1213) [799]; and passes in the shape of a qawwāra, passing at longitude 85° 30′ (1214) [800]; and comes to longitude 85° 0′ and latitude 21° 0′ (1215) [801]; and passes in the shape of a ṭaylasān, passing by the city of عمان and comes to longitude 84° 30′ and latitude 18° 20′ (1216) [802]; and passes in the shape of a ṭaylasān, passing at latitude 19° 0′ (1217) [803]; and comes to longitude 79° 0′ and latitude 16° 30′ (1218) [804]; and passes below a city, and passes to longitude 81° 5′ and latitude 18° 20′ (1219) [805]; and passes to longitude 77° 30′ and latitude 18° 40′ (1220) [806]; and passes in the shape of a qawwāra, passing at latitude 12° 50′[a] (1221) [807]; and comes to longitude 76° 0′ and latitude 14° 0′ (1222) [808]; and passes to longitude 75° 10′ and latitude 18° 50′ (1223) [809]; and passes in the shape of a qawwāra to longitude 71° 40′ and latitude 12° 0′ (1224) [810]; and passes in the shape of a qawwāra to longitude 67° 30′ and latitude 10° 20′ (1225) [811]; and passes by the city of ساوانى and comes to longitude 68° 10′ and latitude 11° 40′ (1226) [812]; and passes by the city of الفس and comes to longitude 68° 0′ and latitude 13° 20′ (1227) [813]; and passes by the city of مارا and comes to longitude 68° 0′ and latitude 18° 0′ (1228) [814]; and passes in the shape of a qawwāra, passing by the mouths of two rivers and comes to longitude ⟨65°⟩ ⟨0′⟩ and latitude 21° 30′ (1229) [815]; and passes by Judda and al-Jār, and comes to longitude 63° 0′ and latitude 26° 0′ (1230) [816]; and passes in the shape of a ṭaylasān, passing near Madyan and below the city of al-Qulzum, and comes to the place from which we began, at longitude 55° 50′ and latitude 28° 0′.

p. 80

The sea of Khwārazm and the sea of Jurjān

And Ṭabaristān and Daylam, which are one

It begins from longitude 74° 40′, touching the mountain يون, and latitude 48° 5′ (1231) [839]; it passes to longitude 76° 0′ and latitude 37° 50′ (1232) [840]; it passes to longitude 77° 30′ and

[a]The print has بب ن, which is no abjad number of degrees; the editor's additions and corrections (p. 163) read يب

latitude 38° 0′ (1233) [841]; and passes to longitude 78° 40′ and latitude 38° 40′ (1234) [842]; it passes to longitude 79° 0′ and latitude 39° 30′ (1235) [843]; it passes to longitude 81° 0′ and latitude 39° 45′ (1236) [844]; it passes to longitude 87° 0′ and latitude 42° 30′ (1237) [845]; it passes to longitude 87° 40′ and latitude 48° 20′ (1238) [846]; it passes to longitude 90° 0′ and latitude 42° 20′ (1239) [847]; it passes to longitude 90° 40′ and latitude 44° 0′ (1240) [848]; it passes to longi- p. 81
tude 90° 20′ and latitude 45° 0′ (1241) [849]; and passes to longitude 90° 30′ and latitude 46° 0′ (1242) [850]; it passes in the shape of a ṭaylasān to longitude 89° 0′ and latitude 48° 30′ (1243) [851]; and passes in the shape of a qawwāra, passing at longitude 88° 20′ (1244) [852]; and comes to longitude 89° 20′ and latitude 50° 0′ (1245) [853]; and passes in the shape of a ṭaylasān, passing at longitude 89° 30′ (1246) [854]; and comes to longitude 88° 30′ (1247) [855]; and passes to longitude 86° 0′ and latitude 50° 20′ (1248) [856]; and passes to longitude 86° 30′ and latitude 50° 40′ (1249) [857]; and passes in the shape of a qawwāra, passing at latitude 50° 20′ (1250) [858]; and comes to longitude 85° 30′ and latitude 51° 30′ (1251) [859]; and passes in the shape of a ṭaylasān to longitude 84° 30′ and latitude 50° 20′ (1252) [860]; and comes to longitude 88° 0′ and latitude 51° 10′ (1253) [861]; and passes in the shape of a ṭaylasān to longitude 82° 0′ and latitude 49° 20′ (1254) [862]; and passes to longitude 81° 0′ and latitude 49° 30′ (1255) [863]; and passes to longitude 78° 0′ and latitude 48° 10′ (1256) [864]; and passes by the mouths of two rivers and passes to longitude 77° 40′ and latitude 46° 0′ (1257) [865]; it passes to longitude 76° 10′ and latitude 45° 20′ (1258) [866]; it passes in the shape of a qawwāra, passing at latitude 44° 30′ (1259) [867]; and comes to longitude 76° 0′ and latitude 44° 0′ (1260) [868]; and passes and touches the mountain from which we began, that is, the mountain نون: it touches it at longitude 74° 40′ and latitude 43° 50′.

p. 82

The Dark Sea

Its boundary is from the boundary of the Sea of China; its beginning is at longitude 164° 0′ and latitude 10° 0′ beyond the equator ⟨it passes to longitude 164° 0′ and latitude 13° 30′ beyond the equator⟩ it passes to longitude 180° 0′ and latitude 18° 30′ ⟨beyond the equator⟩ (1261) [817]; it passes to longitude 180° 0′ and latitude 27° 0′ (1262) [818]; and passes in the shape of a ṭaylasān, passing at latitude ⟨28° 0′⟩ (1263) [819]; and touches the mountain of the river سفس, which surrounds Gog, and comes to longitude 169° 0′ and latitude 25° 30′ (1264) [820]; and passes to longitude 171° 30′ and latitude 21° 10′ (1265) [821]; and passes to longitude 178° 30′ and latitude 28° 0′ (1266) [822]; it passes to longitude 178° 0′ and latitude 24° 0′ (1267) [823]; and passes to longitude 176° 30′ and latitude 25° 40′ (1268) [824]; it passes to longitude 176° 45′ and lati- p. 83
tude 21° 30′ (1269) [825]; it passes to longitude 174° 0′ and latitude 22° 30′ (1270) [826]; there is the mouth of a river, and in this place there is an island that is called the Shining Fortress; it passes to longitude 172° 30′ and latitude 21° 0′ (1271) [827]; it passes to longitude 171° 30′ and latitude 6° 0′ (1272) [828]; and passes and touches the mountain of the Island of the Ruby and the Jewels at longitude 178° 20′ and latitude 5° 30′ (1273) [829]; and passes joined to the mountain that surrounds the Island of the Jewels, along the mountain, until it comes to longitude 171° 40′ and latitude 4° 20′ (1274) [830]; it passes to longitude 171° 0′ and latitude 1° 0′ beyond the equator (1275) [831]; it passes to longitude 168° 30′ and latitude 6° 30′ ⟨beyond the equator⟩ (1276) [832]; it passes to longitude 169° 10′[a] and latitude 7° 5′ ⟨beyond the equator⟩ (1277) [833]; it passes to longitude 172° 30′ and latitude 3° 30′ beyond the equator (1278) [834]; it passes to longitude 178° 30′ and latitude 7° 0′ ⟨beyond the equator⟩ (1279) [835], the mouth of a river; and passes in the shape of a ṭaylasān, passing at latitude 9° 30′ beyond the equator (1280) [836]; and comes to longitude 170° 0′ and latitude 8° 0′ beyond the equator (1281) [837]; it passes to longitude 168° 0′ and latitude 7° 0′ beyond the equator (1282) [838]; and there is an island there that is called the Island

نن, 12° 50′.

[a]The print has فسطى without a space; it is read as فسط ى, 169° 10′.

of Silver; and it passes by the mouth of the river سواس and comes to its place from which we began, which is at longitude 164° 0′ and latitude 10° 0′ beyond the equator.

p. 84

The description of the islands that are in the seas

The islands that are in the outer Sea of the West

The island of فطوا, its size is two degrees by a degree and a half, its middle is at longitude 8° 0′ and latitude 7° 30′ (1283) [869].

The island of فلرازيا, its size is a degree and a half by a degree and a quarter, its middle is at longitude 4° 40′ and latitude 11° 0′ (1284) [870].

The island of هارا, the size of a degree and a half by a degree, its middle is at longitude 3° 0′ and latitude 18° 5′ (1285) [871].

The island of كسافارسيا, the size of a degree and a half by a degree, its middle is at longitude 6° 0′ and latitude 12° 30′ (1286) [872].

The island of داعوطلا, the size of a degree and a half by a degree, its middle is at longitude 8° 10′ and latitude 18° 40′ (1287) [873].

An island of the size of a degree, its middle is at ⟨longitude⟩ 3° 20′ and latitude 15° 0′ (1288).

The island of رفانوطس round, of the size of a degree and a half, its middle is at longitude 8° 20′ and latitude 16° 20′ (1289) [874].

An island of the size of a degree, its middle is at longitude 4° 0′ and latitude 17° 0′ (1290).

An island of the size of a degree and a half by the same, its middle is at ⟨longitude 4° 20′ and latitude 18° 40′⟩ (1291).

⟨An island of the size of a degree and a half by the same, its middle is at longitude⟩ 7° 30′ and latitude 21° 0′ (1292).

An island of the size of a degree and a half by the same, its middle is at longitude 5° 30′ and latitude 26° 0′ (1293).

An island of the size of a degree and a half by the same, its middle is at longitude 5° 30′ and latitude 23° 0′ (1294).

p. 85

An island of the size of a degree and a half by the same, its middle is at longitude 4° 0′ and latitude 30° 30′ (1295).

An island of the size of a degree and a half by a degree, its middle is at longitude 5° 0′ and latitude 38° 40′ (1296).

An island of the size of a degree by a degree and a quarter, its middle is at longitude 4° 0′ and latitude 41° 10′ (1297).

Eleven small islands close together in a space of three degrees by two degrees and a quarter, its middle is at longitude 4° 40′ and latitude 45° 10′ (1298).

Three small islands, each of the size of a quarter of a degree, their sizes all together within a space of a degree and a half by the same; the middle of that is at longitude 8° 30′ and latitude 47° 0′ (1299).

The island of بوارنيا with cities in it, its beginning is at longitude 7° 30′ and latitude 58° 0′ (1300) [875]; and passes and touches below the city of مزبدس and passes to longitude 14° 40′ and latitude 57° 30′ (1301) [876]; it passes to longitude 18° 40′ and latitude 58° 50′ (1302) [877]; and passes

by the mouths of two rivers and below the city of نور and comes to longitude 16° 30′ and latitude 61° 40′ (1303) [878]; it passes to longitude 14° 0′ and latitude 61° 0′ (1304) [879]; it passes by the mouth of a river and comes to longitude 11° 10′ and latitude 61° 30′ (1305) [880]; and passes by the mouth of a river and comes to longitude 12° 0′ and latitude 60° 30′ (1306) [881]; and p. 86
passes by the mouths of two rivers until it reaches the place ⟨from⟩ which we began, which is at longitude 7° 30′ and latitude 58° 0′.

Five small islands in one row, each of the size of a quarter of a degree by a quarter of a degree, from longitude 14° 0′ (1307) to 18° 0′[a] (1308), and their middles are on latitude 62° 20′.

A small island of the size of a third of a degree, its middle is at longitude 15° 10′ and latitude 59° 0′ (1309).

A small island of the size of a third of a degree, its middle is at longitude 17° 20′ and latitude 61° 10′ (1310).

A small island of the size of a third of a degree, its middle is at longitude 14° 30′ and latitude 58° 0′ (1311).

The island of اوليا with cities in it, its beginning is at longitude 18° 30′ and latitude 51° 30′ (1312) [882]; and passes in the shape of a qawwāra, passing at latitude 51° 0′ (1313) [883]; and comes to the mouth of a river at longitude 18° 0′ and latitude 52° 30′ (1314) [884]; and passes to the mouth of a river at longitude 19° 45′ and latitude 52° 40′ (1315) [885]; it passes by the city of اماعس and by the mouth of a river and comes to longitude 22° 40′ and latitude 55° 30′ (1316) [886]; it passes to longitude 22° 0′ and latitude 56° 0′ (1317) [887]; it passes to longitude 28° 0′ and latitude 56° 30′ (1318) [888]; it passes to longitude 22° 10′ and latitude 57° 40′ (1319) [889]; it passes to longitude 28° 0′ and latitude 58° 10′ (1320) [890]; it passes to the mouth of a river at longitude 21° 45′ and latitude 59° 15′ (1321) [891]; it passes to longitude 28° 0′ and latitude 59° 10′ (1322) [892]; it passes to longitude 22° 40′ and latitude 59° 45′ (1323) [893]; it passes to longitude 27° 30′ and latitude 58° 30′ (1324) [894]; it passes by the mouth of a river then it comes to longitude 26° 45′ and latitude 59° 20′ (1325) [895]; it passes to longitude 27° 15′ and latitude 59° 40′ (1326) [896] a place where two rivers flow out and passes in the shape of a qawwāra, passing at latitude 59° 10′ (1327) [897]; and comes to longitude 31° 10′ and latitude 60° 15/55′ (1328) [898]; p. 87
it passes to longitude 28° 20′ and latitude 60° 30′ (1329) [899]; it passes to longitude 26° 0′ and latitude 61° 30′ (1330) [900]; and passes by the mouth of a river and comes to longitude 23° 30′ and latitude 60° 45′ (1331) [901]; and passes by the mouths of two rivers and comes to longitude 20° 20′ and latitude 61° 15/55′ (1332) [902]; it passes to longitude 20° 25′ and latitude 60° 40′ (1333) [903]; it passes to longitude 19° 10′ and latitude 60° 40′ (1334) [904]; then it passes to the city of الوى the great at longitude 19° 30′ and latitude 59° 45′ (1335) [905]; and passes by the mouth of a river and comes to longitude 18° 0′ and latitude 60° 0′ (1336) [906]; and comes to longitude 16° 40′ and latitude 59° 40′ (1337) [907]; and passes in the shape of a ṭaylasān to the mouth of a river and comes to longitude 16° 10′ and latitude 58° 0′ (1338) [908]; and passes in the shape of a qawwāra, passing at latitude 57° 20′ (1339) [909]; and comes to longitude 19° 30′ and latitude 58° 0′ (1340) [910], the mouth of a river; it passes to the place from which we began, which is at longitude 13° 30′ and latitude 51° 30′.

An island of the size of half a degree, its middle is at longitude 21° 0′ and latitude 58° 10′ (1341).

An island of the size of a quarter of a degree, its middle is at longitude 28° 40′ and latitude 57° 0′ (1342).

An island of the size of a third of a degree, its middle is at longitude 24° 50′ and latitude 57° 0′ (1343).

The island of ولى with a city in it, its beginning is at longitude 26° 20′ and latitude 63° 0′ (1344) [911]; it passes in the shape of a qawwāra at latitude 62° 0′ (1345) [912]; and comes to lon-

[a]The print has خ, 18° or 58°; the neighbouring longitudes (14°, then 15° 10′ and 17° 20′) give 18°.

gitude 30° 0′ and latitude 62° 20′ (1346) [913]; it passes by the mouth of a river and comes to longitude 32° 20′ and latitude 68° 10′ (1347) [914]; it passes in the shape of a qawwāra, passing at latitude 64° 40′ (1348) [915]; and comes to longitude 26° 20′ and latitude 68° 0′ and it is the place from which we began. p. 88

Five ten small islands in a space of two degrees and a half by two degrees, its middle is at longitude 32° 30′ and latitude 62° 0′ (1349).

An island of the size of a quarter of a degree, its middle is at longitude 34° 10′ and latitude 62° 5′ (1350).

An island of the size of a quarter of a degree, its middle is at longitude 34° 10′ and latitude 61° 10′ (1351).

An island of the size of a third of a degree, its middle is at longitude 35° 10′ and latitude 61° 30′ (1352).

An island of the size of a quarter of a degree, its middle is at longitude 36° 10′ and latitude 62° 0′ (1353).

An island of the size of a quarter of a degree, its middle is at longitude 37° 30′ and latitude 62° 30′ (1354).

An island of the size of a quarter of a degree, its middle is at longitude 37° 30′ and latitude 68° 40′ (1355).

An island of the size of a quarter of a degree, its middle is at longitude 39° 40′ and latitude 59° 0′ (1356).

An island of the size of two thirds of a degree, its middle is at longitude 37° 30′ and latitude 68° 30′ (1357).

An island of the size of a quarter of a degree, its middle is at ⟨……⟩ (1358).

An island of the size of two thirds of a degree, its middle is at longitude 40° 50′ and latitude 59° 10′ (1359).

An island of the size of a sixth of a degree, its middle is at longitude 41° 40′ and latitude 59° 30′ (1360).

The island of سقيديا with a city in it, its beginning is at longitude 42° 30′ and latitude 59° 40′ (1361) [916]; it passes in the shape of a qawwāra, passing at latitude 59° 0′ (1362) [917]; and comes to the mouth of a river at longitude 46° 0′ and latitude 59° 45′ (1363) [918]; and passes in the shape of a qawwāra, passing at latitude 60° 30′ (1364) [919]; and comes to the place from which we began, which is at longitude 42° 30′ and latitude 59° 40′. p. 89

The island of امراتوس, in which are the men, its beginning is at longitude 49° 40′ and latitude 64° 45′ (1365) [920]; it passes to longitude 50° 20′ and latitude 62° 20′ (1366) [921]; it passes to longitude 56° 50′ and latitude 65° 20′ (1367) [922]; it passes to longitude 54° 20′ and latitude 66° 40′ (1368) [923]; it passes to the place from which we began, which is at longitude 49° 40′ and latitude 64° 45′.

The island of امرانوس, in which are the women, its beginning is at longitude 50° 30′ and latitude 61° 10′ (1369) [924]; and passes to longitude 52° 30′ and latitude 59° 50′ (1370) [925]; it passes to longitude 56° 0′ and latitude 61° 20′ (1371) [926]; and passes in the shape of a ṭaylasān to longitude 57° 25′ and latitude 64° 40′ (1372) [927]; then it passes to the place from which we began, which is at longitude 50° 30′ and latitude 61° 10′.

The islands that are in the Sea of Tangier and مرطاس

A round island the size of a degree, its middle is at longitude 18° 10′ and latitude 38° 50′ (1373).

An island of the size of a degree and a half by a degree, its middle is at longitude 18° 30′ and latitude 32° 40′ (1374).

A round island the size of a degree and a quarter, its middle is at longitude 20° 0′ and latitude 39° 10′ (1375). p. 90

Four islands, each island of the size of a third of a degree by a third of a degree, all of them within a space of two degrees by two degrees; the middle of that is at longitude 26° 40′ and latitude 38° 0′ (1376).

The island of قيرش with two cities in it, its beginning is at longitude 28° 50′ and latitude 38° 50′ (1377) [928]; it passes to longitude 32° 0′ and latitude 39° 0′ (1378) [929]; it passes to longitude 32° 20′ and latitude 40° 40′ (1379) [930]; it passes to longitude 29° 30′ and latitude 40° 50′ (1380) [931]; it passes to the place from which we began, which is at longitude 28° 50′ and latitude 38° 50′.

The island of سرحس with four cities in it, its beginning is at longitude 28° 20′ and latitude 35° 45′ (1381) [932]; it passes to longitude 32° 40′ and latitude 34° 45′ (1382) [933]; it passes to longitude 32° 0′ and latitude 35° 50′ (1383) [934]; it passes to longitude 28° 40′ and latitude 37° 50′ (1384) [935]; and passes to the place from which we began, which is at longitude 28° 20′ and latitude 35° 45′.

Four islands of the size of two thirds of a degree, from longitude 32° 0′ (1385) to longitude 37° 20′ (1386); they are in one row, and their middles are on latitude 40° 0′.

An island of the size of a quarter of a degree, its middle is at longitude 32° 30′ and latitude 37° 40′ (1387).

An island of the size of a quarter of a degree, its middle is at longitude 32° 40′ and latitude 37° 30′ (1388).

Three islands, each of a third of a degree by a third of a degree, from longitude 33° 0′ (1389) to longitude 35° 20′ (1390); their middle is on latitude 34° 30′.

An island of the size of a third of a degree, its middle is on ⟨longitude⟩ 34° 0′ and latitude 32° 20′ (1391).

An island of the size of half a degree, its middle is on longitude 35° 30′ and latitude 33° 0′ (1392). p. 91

The island of فلفوسس with a city in it, its beginning is at longitude 38° 45′ and latitude 35° 30′ (1393) [936]; it passes to longitude 37° 0′ and latitude 35° 30′ (1394) [937]; it passes to longitude 36° 0′ and latitude 37° 40′ (1395) [938]; it passes to longitude 38° 45′ and latitude 37° 40′ (1396) [939]; then it passes to the place from which we began at longitude 38° 45′ and latitude 35° 30′.

An island of the size of two thirds of a degree, its middle is at longitude 36° 45′ and latitude 38° 0′ (1397).

An island of the size of a degree and a quarter, its middle is at longitude 39° 0′ and latitude 40° 0′ (1398).

An island of the size of a degree and a quarter, its middle is at longitude 40° 40′ and latitude 39° 50′ (1399).

An island of the size of half a degree, its middle is at longitude 39° 0′ and latitude 36° 0′ (1400).

An island of the size of a quarter of a degree, its middle is at longitude 38° 0′ and latitude 34° 20′ (1401).

An island of the size of a quarter of a degree, its middle is at longitude 38° 50′ and latitude 34° 20′

(1402).

An island of the size of two thirds of a degree, its middle is at longitude 40° 10′ and latitude 34° 20′ (1403).

An island of the size of ⟨a quarter of a degree⟩, its middle is at longitude 41° 30′ and latitude[a] 35° 30′ (1404).

The island of قرينوس, the size of two degrees by a degree, its middle is at longitude 42° 20′ and latitude 36° 20′ (1405) [940].

The island of شامس, the size of two degrees by a degree, its middle is at longitude 42° 0′ and latitude 38° 10′ (1406) [941].

The island of قوقارا, the size of two degrees by a degree, its middle is at longitude 44° 20′ and latitude 34° 20′ (1407) [942].

An island with a city in it, its beginning is at longitude 45° 50′ and latitude 34° 0′ (1408) [943]; it passes in the shape of a ṭaylasān, passing at latitude 38° 0′ (1409) [944]; and comes to longitude 49° 0′ and latitude 34° 0′ (1410) [945]; it passes to longitude 47° 0′ and latitude 34° 20′ (1411) [946], the mouth of a river; and passes to the place from which we began, which is at longitude 45° 50′ and latitude 34° 0′. p. 92

Five small islands, each of a sixth of a degree by a sixth of a degree, from longitude 47° 50′ (1412) to longitude 50° 50′ (1413), all of them on latitude 31° 50′.

An island with a city in it, its beginning is at longitude 49° 20′ and latitude 35° 0′ (1414) [947]; and passes in the shape of a ṭaylasān, passing at latitude 34° 40′ (1415) [948]; and comes to longitude 51° 20′ and latitude 35° 30′ (1416) [949]; it passes to longitude 51° 0′ and latitude 36° 0′ (1417) [950]; it passes to longitude 49° 30′ and latitude 36° 0′ (1418) [951]; it passes to longitude 49° 20′ and latitude 35° 0′ and it is the place from which we began.

Ten small islands, each of a tenth of a degree by a tenth of a degree; their place is within a space of a degree and a half by a degree and a half, and the middle of these islands is at longitude 50° 20′ and latitude 37° 20′ (1419).

The island of كيوس, the size of a degree and a half by a degree, its middle is at longitude 51° 20′ and latitude 38° 45′ (1420) [952].

The island of حرنيس, the size of a degree and a quarter by ⟨half a degree, its middle is at longitude 51° 40′⟩ and latitude 32° 0′ (1421) [953].

An island of the size of a quarter of a degree, its middle is at longitude 58° 0′ and latitude 38° 30′ (1422).

An island of the size of a quarter of a degree, its middle is at longitude ⟨54° 0′⟩ and latitude 38° 30′ (1423).

An island of the size of a quarter of a degree, its middle is at longitude 54° 0′ and latitude 34° 30′ (1424). p. 93

The island of Cyprus, with three cities in it; its beginning is at longitude 54° 50′ and latitude 35° 10′ (1425) [954]; it passes to longitude 55° 0′ and latitude 34° 10′ (1426) [955]; it passes to longitude 58° 45′ (1427) [956]; and passes in the shape of a ṭaylasān, passing at longitude 59° 0′ (1428) [957]; and comes to a place ⟨whose longitude is⟩ 58° 40′ and latitude 35° 15/55′ (1429) [958]; it passes to the place from which we began, which is at longitude 54° 50′ and latitude 35° 10′.

An island, its beginning is at longitude 46° 50′ and latitude 39° 10′ (1430) [959]; it passes to longitude 47° 30′ and latitude 36° 50′ (1431) [960]; and passes in the shape of a ṭaylasān, passing at longitude 48° 50′ (1432) [961]; and comes to its place from which we began, which is at longi-

[a]The print has والغرض, with a dot over the ʿayn; every other island of the section has والعرض, «and latitude».

tude 46° 50′ and latitude 39° 10′.

An island of the size of a third of a degree, its middle is at longitude 48° 0′ and latitude 40° 30′ (1433).

The islands of the Sea of al-Qulzum

An island of the size of three quarters of a degree, its middle is at ⟨longitude⟩ 58° 40′ and latitude 26° 10′ (1434) [962].

An island of the size of two thirds of a degree, its middle is at longitude 60° 0′ and latitude 24° 40′ (1435) [963].

An island of the size of two thirds of a degree, its middle is at longitude 60° 50′ and latitude 26° 30′ (1436).

An island of the size of two thirds of a degree, its middle is at longitude 62° 20′ and latitude 24° 30′ (1437).

An island of the size of a quarter of a degree, its middle is at longitude 60° 0′ and latitude 21° 20′ (1438).

An island of the size of two thirds of a degree, its middle is at longitude 59° 40′ and latitude 19° 20′ (1439) [970]. p. 94

An island of the size of half a degree, its middle is at longitude 60° 30′ and latitude 17° 40′ (1440).

An island of the size of a quarter of a degree, its middle is at longitude 58° 50′ and latitude 18° 0′ (1441).

An island of the size of a third of a degree, its middle is at longitude 68° 30′ and latitude 28° 30′ (1442) [964].

An island of the size of a quarter of a degree, its middle is at longitude 62° 40′ and latitude 20° 40′ (1443) [965].

An island of the size of a degree, its middle is at longitude 60° 30′ and latitude 15° 50′ (1444) [966].

An island of the size of two thirds of a degree ⟨, its middle is⟩ at longitude 60° 30′ and latitude 18° 50′ (1445) [967].

An island of the size of half a degree, its middle is at longitude 62° 0′ and latitude 18° 10′ (1446).

An island of the size of a third of a degree, its middle is at longitude 60° 30′ and latitude 10° 20′ (1447) [968].

An island of the size of half a degree, its middle is at longitude 62° 10′ and latitude 10° 10′ (1448) [969].

⟨The islands that are in⟩ the Green Sea

and of Sind, India and China

An island of the size of a quarter of a degree, its middle is at longitude 66° 10′ and latitude 9° 10′ (1449).

An island of the size of half a degree, its middle is at longitude 67° 30′ and latitude 6° 40′ (1450) [971].

An island of the size of two thirds of a degree, its middle is at longitude 68° 20′ and latitude 8° 20′ (1451) [972].

An island of the size of a quarter of a degree, its middle is at longitude 70° 20′ and latitude 7° 10′ (1452).

An island, its beginning is at longitude 74° 30′ and latitude 8° 20′ (1453) [973]; it passes to longitude 77° 0′ and latitude 11° 0′ (1454) [974]; it passes to longitude 78° 0′ and latitude 9° 0′ (1455) [975]; and comes to the place from which we began, which is at longitude 74° 30′ and latitude 8° 20′. p. 95

Seven islands of the size of a quarter of a degree to half a degree, all of them within three degrees by three degrees; their middle is at longitude 82° 0′ and latitude 16° 30′ (1456).

The island of الميذ, which is الكرل, with three cities in it; its middle is at longitude 87° 0′ and latitude 12° 0′ (1457) [976], and it encloses the cities that are in it, the mouths of its rivers and all that is in it.

An island of the size of a degree and a half by the same, its middle is at longitude 90° 30′ and latitude 17° 30′ (1458).

An island of the size of three degrees by a degree and a quarter, its middle is at longitude 95° 30′ and latitude 18° 20′ (1459) [977].

An island of the size of half a degree, its middle is at longitude 101° 10′ and latitude 18° 0′ (1460).

An island of the size of half a degree, its middle is at longitude 91° 10′ and latitude 18° 0′ (1461).

An island of the size of half a degree, its middle is at longitude 99° 30′ and latitude 18° 50′ (1462).

An island of the size of a third of a degree, its middle is at longitude 101° 10′ and latitude 8° 0′ (1463).

An island of the size of half a degree, its middle is at longitude 103° 10′ and latitude 17° 40′ (1464).

A round island the size of four degrees and a quarter by the same, its middle is at longitude 101° 0′ and latitude the equator (1465) [978].

An island of the size of a degree and a half by a degree and a quarter, its middle is at longitude 104° 0′ and latitude 15° 20′ (1466). p. 96

An island of the size of a degree and a half by a degree, its middle is at longitude 104° 40′ and latitude 12° 10′ (1467).

An island of the size of two degrees and a quarter in latitude a degree and a half, its middle is at longitude 105° 0′ and latitude 8° 0′ (1468).

An island of the size of two thirds of a degree, its middle is at longitude 107° 30′ and latitude 12° 40′ (1469).

An island of the size of two thirds of a degree, its middle is at longitude 110° 40′ and latitude ⟨18/58° 10′⟩ (1470) [979].

An island of the size of half a degree, its middle is at longitude 110° 40′ and latitude 8° 0′ (1471).

A square island, three degrees by three degrees, its middle is at longitude 109° 0′ and latitude 2/10/50° 0′ (1472) [980].

An island of the size of a degree, its middle is at longitude 160° 30′ and latitude 8° 0′ (1473).

An island of the size of a degree and a quarter by a degree, its middle is at longitude 114/154° 20′ and latitude 9° 40′ (1474).

An island of the size of two thirds of a degree, its middle is at longitude 114/154° 30′ and latitude 11° 40′ (1475).

An island of the size of a degree by the same, its middle is at longitude 117/157° 30′ and latitude 12° 40′ (1476).

An island of the size of a sixth of a degree, its middle is at longitude 109° 0′ and latitude beyond the equator 2/10/50° 0′ (1477) [981].

An island of the size of a quarter of a degree, its middle is at longitude 110° 0′ and latitude 8° 0′ beyond the equator (1478).

An island of the size of a degree and a half by a degree, its middle is at longitude 160° 0′ and latitude 4° 0′ beyond the equator (1479).

An island of the size of a degree and a half by the same, its middle is at longitude 114° 30′ and latitude 4° 20′ beyond the equator (1480) [982].

An island of the size of a degree and a quarter by the same, its middle is at longitude 118/158° 40′ and latitude 7° 0′ beyond the equator (1481).

The island of العقارب, its beginning is at longitude 158° 0′ and latitude 9° 0′ beyond the equator (1482) [983]; it passes in the shape of a ṭaylasān, passing on ⟨longitude⟩ 160° 50′ (1483) [984]; p. 97
and comes to longitude 118/158° 0′ and latitude 10° 0′ beyond the equator (1484) [985]; it passes to longitude 114/154° 40′ and latitude 10° 10′ beyond the equator (1485) [986]; and passes to longitude 115/155° ⟨0′⟩ and latitude 11° 0′ beyond the equator (1486) [987]; it passes to longitude 121° 20′ and latitude 11° 0′ ⟨beyond the equator⟩ (1487) [988]; it passes to longitude 119° 30′ and latitude 10° 20′ beyond the equator (1488) [989]; it passes to longitude 119° 40′ and latitude 8° 40′ beyond the equator (1489) [990]; it passes to longitude 121° 0′ and latitude 8° 30′ beyond the equator (1490) [991]; it passes to longitude 119° 0′ and latitude 7° 50′ beyond the equator (1491) [992]; it passes to longitude 115° 0′ and latitude 9° 0′ beyond the equator (1492) [993]; and comes to its place from which we began, which is at longitude 118° 0′ and latitude 9° 0′ ⟨beyond the equator⟩.

The island of Sarandīb, its beginning is at longitude 116° 20′ and latitude on the equator (1493) [994]; and comes to the mouth of ⟨the river⟩ اربوس and comes to longitude 118° 0′ and latitude beyond the equator 8° 20′ (1494) [995]; and passes in the shape of a ṭaylasān, passing at latitude 8° 20′ ⟨beyond the equator⟩ (1495) [996]; and comes to below the city of اعنا the City of the Moon at longitude 121° 30′ and latitude 8° 0′ beyond the equator (1496) [997]; it passes in the p. 98
shape of a ṭaylasān, passing at latitude 8° 20′ ⟨beyond the equator⟩ (1497) [998]; and comes to برقانا at ⟨longitude⟩ 124° 30′ and latitude 2/10/50° 50′ beyond the equator (1498) [999]; and passes in the shape of a ṭaylasān to the mouth of the river رفس and passes from the river رفس to longitude 125° 10′ and latitude 4° 10′ (1499) [1000]; and passes to the corner of the city of فوسفورى at longitude 124° 20′ and latitude 5° 0′ (1500) [1001]; and passes to longitude 125° 10′ and latitude 5° 30′ (1501) [1002]; it passes to longitude 125° 0′ and latitude 6° 50′ (1502) [1003]; it passes by the mouth of the river حمحس and passes by the mouth of ⟨the river⟩ ثاسس at the corner of the city of فلمادى and passes from there in the shape of a ṭaylasān, passing at latitude 12° 30′ (1503) [1004]; and comes to longitude 119° 0′ and latitude 12° 0′ (1504) [1005]; it passes to longitude 118° 20′ and latitude 6° 30′ (1505) [1006]; and passes touching what is other than it,[a] and comes to the place from which we began, which is at longitude 116° 20′ and latitude on the equator.

Three islands, each of the size of one degree, from longitude 119° 0′ (1506) to longitude 124° 30′ (1507), their middles are on latitude 5° 0′ beyond the equator.

An island of the size of two degrees by two degrees, its middle is at longitude 129° 30′ and latitude 5° 30′ (1508) [1007].

An island of the size of a degree, its middle is at longitude 138° 0′ and latitude 11° 10′ (1509).

An island of the size of two degrees and a quarter by two degrees, its middle is at longitude 138° 30′

[a]The print has «⟨ه⟩ لغير *مماسّ», «touching what is other than it»; the sense is not clear.

and latitude 6° 30′ (1510).

Ten islands, each of the size of one degree, from longitude 129° ⟨0′⟩ (1511) to longitude 134° ⟨0′⟩ (1512), the middle of them all is at longitude 132° 0′ and latitude 2/10/50° 0′ beyond the equator (1513). p. 99

A round island the size of two degrees by the same, its middle is at longitude 132° 0′ and latitude 8° 30′ beyond ⟨the equator⟩ (1514) [1008].

⟨The island of the naked people⟩, square, of the size of four degrees by three degrees; its middle is at longitude 137° 30′ and latitude 18° 0′ (1515) [1009]; its boundaries are the mouths of its rivers.

The island of the Zanj who eat people, square, of the size of four degrees and a half by four degrees and a half; its middle is at longitude 138° 0′ and latitude 8° 0′ (1516) [1010], and its boundary passes by the mouths of its rivers.

An island of the size of two degrees by a degree and a half, its middle is at longitude 142° 0′ and latitude 8° 20′ (1517) [1011].

Five islands, each of two thirds of a degree by two thirds of a degree, from longitude 140° 50′ (1518) to longitude 144° 20′ (1519), its middle is at longitude 142° 30′ and latitude 2/10/50° 0′ beyond the equator (1520).

Three islands, each of the size of one degree, from longitude 141° 30′ (1521) to longitude 145° 20′ (1522), its middle is at longitude 148° 0′ and latitude 9° 0′ beyond the equator (1523).

Three islands, each of the size of one degree, from longitude 146° 0′ (1524) to longitude 150° 0′ (1525), its middle is at longitude 148° 0′ and latitude 4° 0′ beyond the equator (1526).

An island of the size of two degrees and a quarter by two degrees, its middle is at longitude 155° 20′ and latitude 8° 0′ (1527).

A round island the size of a degree and a half by the same, its middle is at longitude 156° 0′ and latitude on the equator (1528).

A round island the size of two degrees by two degrees, its middle is at longitude 158° 0′ and latitude 4° 20′ beyond the equator (1529). p. 100

The island of Silver, its beginning is from longitude 154° 20′ and latitude 5° 40′ beyond the equator (1530) [1012]; it passes to longitude 154° 0′ and latitude 8° 40′ beyond the equator (1531) [1013]; it passes to longitude 159° 30′ and latitude 9° 0′ beyond the equator (1532) [1014]; it passes to longitude 159° 30′ and latitude 4° 20′ beyond the equator (1533) [1015]; it passes to the place from which we began, which is at longitude 154° 20′ and latitude 5° 40′ beyond the equator.

The islands that are in the sea of Basra

An island of the size of a degree, its middle is at longitude 76° 0′ and latitude 28° 0′ (1534).

An island of the size of a degree, its middle is at longitude 76° 0′ and latitude 24° 40′ (1535) [1016].

An island of the size of a degree, its middle is at longitude 78° 20′ and latitude 26° 30′ (1536) [1017].

An island of the size of a degree, its middle is at longitude 80° 0′ ⟨and latitude⟩ 24° 30′ (1537) [1018].

An island of the size of ⟨two thirds of a degree, its middle is at longitude 81° 0′⟩ and latitude 24° 20′ (1538) [1019].

An island of the size of a degree, its middle is at longitude 80° 0′ and latitude 24° 20′ (1539) [1020].

An island of the size of a degree, its middle is at longitude 80° 0′ and latitude 27° 40′ (1540) [1021].

Three islands the size of one degree each from longitude 84° 0′ (1541) to longitude 87° 30′ (1542), the middle of them all is at longitude 85° 45′ and latitude 26° 0′ (1543).

p. 101

The islands of the sea of Jurjān and Ṭabaristān

An island of the size of two degrees by a degree and a half, its middle is at longitude 79° 30′ and latitude 46° 0′ (1544) [1022].

An island of the size of two degrees by a degree, its middle is at longitude 84° 0′ and latitude 44° 40′ (1545) [1023].

An island of the size of two degrees by a degree, its middle is at longitude 85° 50′ and latitude 48° 30′ (1546).

An island of the size of two degrees by two thirds of a degree, its middle is at longitude 88° 0′ and latitude 47° 30′ (1547) [1024].

The places where the boundaries of the countries are written

The land of نيفل, the inner: the middle of the writing is at longitude 26° 0′ and latitude 5° 30′ beyond the equator (1548) [497].

Ghāna, a people called اغرمطين: the middle of the writing is at longitude 41° 0′ and latitude 20° 30′ (1549) [498].

The land of الدملى, in which there is no rain: the middle of the writing is at longitude 44° 30′ and latitude 5° 0′ (1550) [499].

The land of ليبوانى, the inner: the middle of its writing is at longitude 20° 0′ and latitude 21° 30′ (1551) [500].

p. 102

A land in the kingdom of the Berbers: the middle of the writing is at longitude 26° 0′ and latitude 19° 0′ (1552) [501].

The land of Arabia Felix, which is the land of Yemen, al-Yamāma, al-Baḥrayn and ʿUmān: the middle of its writing is at longitude 73° 0′ and latitude 19° ⟨0′⟩ (1553) [502].

The land of Sind, the middle of its writing is at longitude 88/108° 30′ and latitude 22° 40′ (1554) [503].

The land of India that lies beyond the river Ganges, the middle of its writing is at longitude 100° 0′ and latitude 28° 30′ (1555) [504].

The land of China, the middle of its writing is at longitude 160° 30′ and latitude 16° 30′ (1556) [505].

The land of Tangier, the middle of its writing is at longitude 11° 0′ and latitude 32° 0′ (1557) [506].

The land of مرطانيه ⟨the middle of⟩ its writing at longitude 20° 0′ and latitude 26° 0′ (1558) [507].

The land of Ifrīqiya, the middle of its writing is at longitude 34° 30′ and latitude 26° 30′ (1559) [508].

The land of مرماوقى, its middle is at longitude 48° 0′ and latitude 27° 30′ (1560) [509].

The land of مدين, its middle is at longitude 62° 0′ and latitude 30° 20′ (1561) [510].

The land of Kirmān, its middle is at longitude 96° 5′ and latitude 28° 30′ (1562) [511].

The desert of Kirmān, its middle is at longitude ⟨96° 0′⟩ and latitude 29° 40′ (1563) [512].

The land of Kābul, the middle of its writing is at longitude 101° 30′ and latitude 29° 0′ (1564) [513].

The land of سوريه and it is Syria, its middle is at longitude 65° 0′ and latitude 32° 0′ (1565) [514].

The land of Fārs, its middle is at longitude 80/100° 0′ and latitude 38° 30′ (1566) [515].

p. 103

The land of Herat, its middle is at longitude 86/106° 0′ and latitude 35° 50′ (1567) [516].

The land of al-Andalus, its middle is at longitude 10° 0′ and latitude 37° 40′ (1568) [517].

The land of افرس, its middle is at longitude 45° 0′ and latitude 38° 45′ (1569) [518].

The land of لوقيه, its middle is at longitude 54° 0′ and latitude 38° 30′ (1570) [519].

The land of فلقمه, its middle is at longitude 57° 0′ and latitude 37° 30′ (1571) [520].

The land of Mosul, its middle is at longitude 68° 50′ and latitude 38° 0′ (1572) [521].

The land of لسطانا, its middle is at longitude 8° 30′ and latitude 41° 20′ (1573) [522].

The land of اسمانيه, its middle is at longitude 8° 30′ and latitude 42° 20′ (1574) [523].

The land of تيرسنا, its middle is at longitude 24° 0′ and latitude 48° 30′ (1575) [524].

The land of افليقيه, its middle is at longitude 36° 0′ and latitude 44° 50′ (1576) [525].

The land of ماقدونيه, its middle is at longitude 42° 0′ and latitude 43° 30′ (1577) [526].

The land of موسيا الفوقانيّة, its middle is at longitude 44° 30′ and latitude 44° 0′ (1578) [527].

The land of موسيا السفليّة, its middle is at longitude 46° 0′ and latitude 44° 30′ (1579) [528].

The land of برقه, its middle is at longitude 47° 0′ and latitude 42° 40′ (1580) [529]. p. 104

The land of اسيه, its middle is at longitude 52° 30′ and latitude 43° 30′ (1581) [530].

The land of علاطيه, its middle is at longitude 56° 30′ and latitude 48° 0′ (1582) [531].

The land of قبادوقيه, its middle is at longitude 56° 30′ and latitude ⟨41°⟩ 0′ (1583) [532].

The land of Adharbayjān, its middle is at longitude ⟨73°⟩ 40′ and latitude 41° 30′ (1584) [533].

The land of al-Shāsh and طاربند, its middle is at longitude 98° 0′ and latitude 42° 0′ (1585) [534].

The land of Gog, its middle is at longitude 167° 30′ and latitude 44° 0′ (1586) [535].

The land of فطانيا, its middle is at longitude 20° 30′ and latitude 46° 10′ (1587) [536].

The land of لوربوسه, its middle is at longitude 22° 40′ and latitude 46° 40′ (1588) [537].

The land of اطا, its middle is at longitude 31° 10′ and latitude 45° 10′ (1589) [538].

The land of يلورقيون واماطيه, its middle is at longitude 42° 0′ and latitude 45° 30′ (1590) [539].

The land of سوسه, its middle is at[a] longitude 52° 20′ and latitude 45° 0′ (1591) [540].

The land of فلطاعلاطيه, its middle is at longitude 26° 30′ and latitude 49° 50′ (1592) [541]. p. 105

The land of عرمانيا, which is the land of the Slavs, its middle is at longitude 36° 40′ and latitude 52° 0′ (1593) [542].

The land of سمرقى, which is the island that opens onto the mainland, its middle is at longitude 41° 40′ and latitude 61° 0′ (1594) [543].

The land of the forest of ارقونيوس, its middle is at longitude 41° 0′ and latitude 58° 0′ (1595) [544].

The land of سرماطيه, which is the land of the Burjān, its middle is at longitude 45° 0′ and latitude 52° 0′ (1596) [545].

The land of التز, its middle is at longitude 57° 0′ and latitude 58° 0′ (1597) [551].

The island of طوقيا, which is joined to التيز, its middle is at longitude 58° 30′ and latitude 53° 30′ (1598) [552].

The land of سرماطيه, which is the land of the Alans, its middle is at longitude 78° 0′ and latitude 59° 30′ (1599) [546].

[a]The print has عنا for عند, «at».

The land of اسقونيا, which is the land of the Turks, its middle is at longitude 104° 0′ and latitude 57° 30′ (1600) [547].

The land of اسقوثيا, which is the land of the Toghuzghuz, its middle is at longitude 148° 0′ and latitude 59° 30′ (1601) [548].

The land of سيرق, which is the land of سينستان, its middle is at longitude 160° 0′ and latitude 54° 30′ (1602) [549].

The land of Magog at longitude 171° 30′ and latitude 58° 0′ (1603) [550].

p. 106

ا⟨. . . . .⟩ار ⟨the springs⟩ that are beyond the equator[a]

A spring comes out of the mountain الّهه from ⟨beyond⟩ the equator from longitude 30° 30′ and latitude 5° 0′ (1604) [2230]; and passes to longitude 27° 0′ and latitude 8° 30′ (1605) [2231]; then it passes to the sea in the first clime at longitude 19° 0′ and latitude 6° 10′ (1606) [2232].

⟨The Nile of Egypt and the springs and the rivers that fall into it⟩.

Two round marshes, the diameter of each five degrees: the centre of the first is at longitude 50° 0′ and latitude 7° 0′ (1607) [1503], and the centre of the second at longitude 57° 0′ and latitude 7° 0′ (1608) [1504].

Into the first there pour five rivers from the Mountain of the Moon: the beginning of the first river is at longitude 48° 0′ (1609) [1505], the second at ⟨longitude⟩ 49° 0′ (1610) [1506], the third at longitude 50° 0′ (1611) [1507], the fourth at longitude 51° 0′ (1612) [1508] and the fifth at longitude 52° 0′ (1613) [1509].

From the Mountain of the Moon there also come out five rivers to the second marsh: the beginning of the first river is at longitude 55° 20′ (1614) [1510], the second at 56° 20′ (1615) [1511], the third at 57° 20′ (1616) [1512], the fourth at 58° 20′ (1617) [1513] and the fifth at 59° 20′ (1618) [1514]. p. 107

From these two marshes there come out, from each of them, four rivers to a round marsh in the first clime; the diameter of this marsh is two degrees, and its centre is at longitude 58° 30′ and latitude, in the first clime, 2° 0′ (1619) [1515].

The beginning of the first river from the first marsh is at longitude 48° 40′ (1620) [1516], the second at longitude 49° 30′ (1621) [1517] and the third at longitude 51° 15′ (1622) [1518]; the second and the third join at longitude 52° 0′ and latitude 1° 0′ beyond the equator (1623) [1519]; then it passes to the marsh that we have mentioned as one river; and the fourth river is at longitude 52° 0′ (1624) [1520].

And of the rivers that come from the second marsh to the small one, the beginning of the first is likewise at longitude 55° 30′ (1625) [1521], the second at longitude 56° 20′ (1626) [1522] and the third at ⟨longitude⟩ 58° 0′ (1627) [1523]; the second and the third meet at longitude 56° 0′ and latitude 1° 0′ beyond the equator (1628) [1524]; then it passes to the marsh that we have mentioned as one river; and the fourth river is at longitude 59° 0′ (1629) [1525]. All these rivers come to the small marsh, the mouth of each not touching the other.

Then ⟨there comes out of this small marsh a great river, which is the Nile⟩ of Egypt. It passes by the land of the Blacks, ⟨ʿAlwa and Zaghāwa⟩, Fazzān and Nubia, and passes by Dunqula, the city of Nubia, at longitude 52° 20′ and latitude 2° 0′ from the first clime, counted from beyond it towards the equator, or, from the equator to it, 15° 0′ (1630) [1526]. The Nile passes on and cuts the line of the first clime at longitude 53° 0′ and latitude 16° 20′ (1631) [1527], and it passes on until it goes beyond the line of the. p. 108

[a]The first word is printed with a gap of dots in angle brackets, as the editor leaves a lacuna of the manuscript; it

First clime by a degree and a half in its direction (1632) [1528]; then it turns aside to longitude 52° 0′ and latitude 18° 40′ (1633) [1529]; then it turns aside to longitude 51° 0′ and latitude 17° 0′ (1634) [1530]; then it turns aside to longitude 50° 0′ and latitude 17° 30′ (1635) [1531]; then it turns aside to longitude 50° 20′ and latitude 18° 20′ (1636) [1532]; then it turns aside to longitude 52° 30′ and latitude 19° 40′ (1637) [1533]; then it passes and comes to the city of ملوى at longitude 51° 30′ and latitude 19° 20′ (1638) [1534]; then it passes and comes to the city of Aswān, touching it, at longitude 55° 30′ and latitude 22° 30′ (1639) [1535]; then it turns aside ⟨to longitude⟩ 58° 0′ and latitude 24° 0′ (1640) [1536], touching the mountain اليوفا; then it turns aside to longitude 55° 30′ and latitude 24° 20′ (1641) [1537]; then it passes and falls in the third clime, touching in some places the mountain al-Muqaṭṭam and the cities on it, whose longitude and latitude we have written down; then it passes to Miṣr, touching it, at longitude 54° 30′ and latitude 29° 15′ (1642) [1538]; then it branches off from Miṣr to the sea in seven channels.

The first of them passes to Alexandria at longitude 51° 30′ (1643) [1539].

From this channel there come out two channels, the first of them at longitude 51° 40′ (1644) [1540] and the other at longitude 58° 0′ (1645) [1541]. p. 109

And the mouth of the second channel that comes out of Miṣr to the sea is at longitude 53° 0′ (1646) [1542], the third at ⟨longitude⟩ 58° 30′ (1647) [1543], the fourth at longitude 58° 40′ (1648) [1544], the fifth at longitude 58° 50′ (1649) [1545], the sixth at longitude 54° 20′ (1650) [1546] and the seventh at longitude 54° 30′ (1651) [1547]; and there is Damietta.

The description of the spring on the equator that flows into the Nile of Egypt.

A round spring, its centre on the equator and its outflow into the Nile at the city of Nubia; the diameter of this spring is three degrees, and its centre is at longitude 62° 0′ (1652) [1548]. A river comes out of it at longitude 61° 30′ (1653) [1549]; its mouth is in the Nile at longitude 58° 0′ and latitude 16° 20′ (1654) [1550], touching.

The first clime; and there is a channel between the river of this spring and the Nile, above the city of Nubia.

A spring in the Island of Silver in the Sea of China, at longitude 154° 40′ and latitude 8° 30′ beyond the equator (1655) [2233]. Three rivers come out of it from one place; the middle one of them passes by the corner of the city that is on the island and passes to the sea at longitude 159° 40′ and latitude 4° 30′ (1656) [2234]; the first river flows into the sea at longitude 154° 40′ and latitude 5° 20′ (1657) [2235], and the third flows into the sea at longitude 159° 50′ and latitude 7° 45′ (1658) [2236].

A spring in the Island of Silver in the Dark Sea, at longitude 172° 30′ and latitude 5° 20′ beyond the equator (1659) [2237]. Two rivers come out of it, both flowing into the sea: the mouth of the first is at longitude 169° 40′ and latitude 8° 20′ (1660) [2238], and the second at longitude 178° 40′ and latitude 6° 40′ (1661) [2239].

p. 110

The first clime and the springs and the rivers that are in it

A spring in the mountain قاقس a river, درطوس, comes out of it flows into the sea the beginning of the river at longitude 26° 30′ and latitude 11° 0′ (1662) [1684] and its end is at longitude 10° 20′ and latitude 14° 0′ (1663) [1685].

A spring in the mountain ثلا a river comes out of it its mouth is in the river درطوس, its beginning is at longitude 37° 30′ and latitude 9° 40′ (1664) [1686]; and passes to longitude 28° 0′ and latitude 7° 30′ (1665) [1687]; then it passes to longitude 21° 45′ bending a little to the city of ثمنوربقى and latitude 7° 0′ (1666) [1688]; then it passes and flows into the river درطوس at longitude 7° 0′ and latitude 12° 30′ (1667) [1689].

is not restored here.

A spring in the second clime; a river comes out of it and flows into this ⟨river; its beginning is at⟩ longitude ⟨د⟩ا ⟨30′⟩ and latitude 7° 20′ (1668) [1690] ⟨and its mouth is⟩ at longitude ⟨28°⟩ ⟨0′⟩ and latitude 17° 20′ (1669) [1691].

A spring falls also into the first river, its beginning is in the mountain سرعاطوس at longitude 29° 30′ ⟨and latitude 20° 0′⟩ (1670) [1692]; it passes to a small marsh whose centre is at longitude 28° 0′ ⟨and latitude 18° 30′⟩ (1671) [1693]; and passes and falls into the river that we have described at longitude 27° 30′ and latitude 17° 30′ (1672) [1694]. p. 111

A spring in the mountain flows into the first river also the beginning of the spring at longitude 24° 0′ and latitude 20° 30′ (1673) [1695], and its mouth is in the river at longitude 26° 20′ and latitude 18° 20′ (1674) [1696]; it passes by the city of بغيرا.

And a spring also flows into the first river, its beginning is at longitude 7° 0′ and latitude 19° 30′ (1675) [1697], and its mouth is in the river at longitude 21° 40′ and latitude 7° 0′ (1676) [1698].

A spring comes out of the mountain of Ghāna; its mouth is in the sea; the beginning of the spring is at longitude 44° 30′ and latitude 11/51° 40′ (1677) [1667]; it passes to longitude 39° 30′ and latitude 16/56° 40′ (1678) [1668]; then it passes by the great city of جرمى to the mountain سرعاطوس, cutting across it, at longitude 31° 0′ (1679) [1669]; it passes by the yellow mountain and cuts across it at longitude 31° 0′ (1680) [1670]; and passes to Qayrawān, touching it, at longitude 31° 0′, and flows into the sea at longitude 31° 30′ and latitude 32° 40′ (1681) [1671].

And there falls into this river a river from two springs called the Lakes of the Tortoises, one of them at longitude 45° 0′ and latitude 22° 20′ (1682) [1672] and the second at longitude 46° 20′ and latitude 22° 0′ (1683) [1673] out of each comes a river, and they meet at longitude 45° 30′ and latitude 21° 0′ (1684) [1674] and become one river, which flows into the first at longitude 39° 40′ and latitude 16° 40′ (1685) [1675].

A river comes out of the mountain باليس by Yemen at longitude 67° 20′ and latitude 14° 0′ (1686) [1663]; it passes by Ṣanʿāʾ and by the city of مارا and flows into the sea at longitude ⟨62°⟩ 50′ and latitude 16° 0′ (1687) [1664]. p. 112

And a river comes out of this mountain ⟨also⟩ at longitude 67° 20′ and latitude 14° 45′ (1688) [1699]; and flows into the sea at longitude 68° 0′ and latitude 16° 40′ (1689) [1700].

A river comes out of the mountain ⟨at⟩ longitude 67° 40′ and latitude 16° 0′ (1690) [1665]; it passes by Jurash and Sabaʾ and Mahra and flows into the sea at ⟨longitude 63° 10′⟩ and latitude 19° 0′ (1691) [1666].

A spring that does not flow at the city of مبس longitude ⟨68° 30′ and latitude⟩ 18° 30′ (1692).

A spring on the first clime at longitude ⟨76° 40′⟩ (1693) [1701] a river, قونيسس, comes out of it it passes by the city of سربا and flows into the sea at longitude 75° 9′ and latitude 14° 0′ (1694) [1702].

A spring in the island of الميذ at longitude 85/105° 0′ and latitude 14° 0′ (1695) [1703] two rivers come out of it: one of them passes by two cities and flows into the sea at longitude 85/105° 30′ and latitude 9° 30′ (1696) [1704] and the other passes by a city and flows into the sea at longitude 89/109° 0′ and latitude 12° 30′ (1697) [1705].

A river comes out of the mountain مالا at longitude 119° 30′ and latitude 4° 0′ (1698) [1706]; it passes by the city of اموزى and passes along the coast of the sea to a small marsh at longitude 117° 30′ and latitude 6° 10′ (1699) [1707].

The river اروس comes out of the mountain مالا also at longitude 121° 30′ and latitude 2/10/50° 45′ (1700) [1708], and its mouth is in the sea at longitude 117° 40′ and latitude beyond the equator 2/10/50° 40′ (1701) [1709]. p. 113

The river مرفس comes out of the mountain مالا also at longitude 128° 30′ and latitude 2/10/50° 20′ (1702) [1710], and its mouth is in the sea at longitude 125° 20′ and latitude 1° 45′ beyond the

equator (1703) [1711].

The river حمحس comes out of the mountain اما at longitude 120° 50′ and latitude 5° 15/55′ (1704) [1712]; it passes by the city of ماحرولون and flows into the sea at longitude 128° 0′ and latitude 8° 0′ (1705) [1713].

The river فاسس from this mountain also, its beginning is at longitude 121° 0′ and latitude 8° 0′ (1706) [1714]; it passes by the city of قلهادى and flows into the sea at longitude 121° 10′ and latitude 11° 0′ (1707) [1715].

A spring in the island of العراة at longitude 136° 5′ and latitude 11° 40′ (1708) [1716]; it passes to longitude 136° 5′ and latitude 18° 0′ (1709) [1717]; then two rivers come out of here both flow into the sea one of them at longitude 137° 30′ and latitude 11° 10′ (1710) [1718] and the mouth of the other at longitude 138° 0′ and latitude 14° 30′ (1711) [1719].

A spring in the island of الزنج, its beginning is at longitude 138° 0′ and latitude 4° 30′ (1712) [1720]; then flows into the sea at longitude 138° 0′ and latitude 1° 0′ (1713) [1721] and a river comes out of this river at longitude 138° 0′ and latitude 2/10/50° 0′ (1714) [1722], and its mouth is in the sea at longitude 136° 0′ and latitude 2/10/50° 0′ (1715) [1723].

⟨The river⟩ بيسوعس comes out of a spring in the mountain منيدروس, its beginning is at longitude 147° 40′ and latitude 16° 50′ (1716) [1724]; and flows ⟨in⟩ the sea at longitude 147° 0′ and latitude 11° 30′ (1717) [1725]. p. 114

The river سالس comes out of the mountain منيدروس at longitude 148° 0′ and latitude 16° 30′ (1718) [1726], and its mouth is in the sea at longitude 160° 20′ and latitude 8° 10′ (1719) [1727].

A river, سورس, comes out of this river and enters the island of الذهبانّية; its beginning is at longitude 150° 0′ and latitude 10° 0′ (1720) [1728], and its mouth is in the sea at longitude 147° 0′ and latitude 1° 15/55′ (1721) [1729].

Out of this river سورس come two rivers, one of them حوسان; its beginning is at longitude 149° 0′ and latitude 7° 0′ (1722) [1730] and its end is in the sea at longitude 145° 30′ and latitude 5° 20′ (1723) [1731].

And the second river اطانس, its beginning is at ⟨longitude 148° 30′ and latitude 4° 30′ (1724) [1732], and its mouth is in the sea at longitude⟩ 101° 30′ and latitude 1° 45′ (1725) [1733].

The river سوا س comes out of the mountain اروس احروسس, which is the Mountain of the Ruby; its beginning is at longitude 169° 30′ and latitude 5° 0′ (1726) [1734]; this river passes by the city of سوسه, by a city without a name near the equator, by the city of قطيغورا and by a city beyond the equator whose latitude is 6° 45′ (1726/1) [1735]; and flows into the sea at longitude 167° 0′ and latitude beyond the equator 9° 0′ (1727) [1736].

A river comes out of this river and turns back into it; its beginning is at longitude 166° 0′ and latitude 1° 40′ beyond the equator (1728) [1737]; it reaches longitude 166° 40′ and latitude 8° 0′ beyond the equator (1729) [1738].

And its mouth is at longitude 165° 40′ and latitude 5° 0′ beyond the equator (1730) [1739]. p. 115

The river اوطاسى comes out of a spring in the Island of the Jewels; the beginning of the spring is at longitude 174° 0′ and latitude 5° 45′ (1731) [1740]; this river passes from it to the city of صلمى, then returns to the city of صلاى, then passes to a marsh between the mountain and the city of مخلاى; the beginning of the marsh is at latitude 5° 10′ (1732) and its end at latitude 4° 10′ (1733).

The second clime and the springs and the rivers that are in it

The river رودس comes out of a mountain, its beginning is at longitude 15° 0′ and latitude 18° 20′ (1734) [1741], and its mouth is in the sea at longitude 9° 20′ and latitude 18° 20′ (1735) [1742].

The river فالوس, which is the River of the Snakes, comes out ⟨of the mountain⟩; its beginning is at longitude 15° 0′ and latitude 20° 25′ (1736) [1743], and its mouth is in the sea at longitude ⟨9° 40′⟩ and latitude 20° 25′ (1737) [1744].

The river حوسوس comes out of a mountain at longitude ⟨15°⟩ ⟨0′⟩ and latitude 21° 45′ (1738) [1745], and its mouth is in the sea at longitude 9° 45′ and latitude 21° 45′ (1739) [1746].

The river سالس comes out of a mountain at longitude 15° 0′ and latitude 22° 25′ (1740) [1747], and its mouth is in the sea at longitude 9° 0′ and latitude 28° 45′ (1741) [1748].

A river comes out of a mountain at longitude 28° 10′ and latitude 22° 30′ (1742) [1749], and its mouth is in the sea at longitude 9° 0′ and latitude 25° 40′ (1743) [1750]. p. 116

A river comes out of the mountain سرجيس, its beginning is at longitude 39° 20′ and latitude 21° 0′ (1744) [1751]; it passes by the mountain رحوما and cuts it in two halves and flows into the sea at the city of ماون at longitude 39° 40′ and latitude 32° 0′ (1745) [1752].

A river also comes out of the mountain سرحس, whose mouth is in this river; its beginning is at longitude 41° 45′ and latitude 21° 0′ (1746) [1753], and its mouth is in the river at longitude 40° 0′ and latitude 24° 0′ (1747) [1754].

A spring at longitude 41° 30′ and latitude 16° 30′ (1748) [1755]; a river comes out of it to the lake نوبا at longitude 44° 0′ and latitude 14° 40′ (1749) [1756]; the lake is of the size of half a degree.

A spring, its beginning is at longitude 69° 40′ and latitude 18° 30′ (1750) [1757]; it passes باله and its mouth is in the sea at longitude 68° 10′ and latitude 20° 0′ (1751) [1758].

The river لادو comes out of a spring, its beginning is at longitude 74° 0′ and latitude 18° 20′ (1752) [1759], and its mouth is in the sea at longitude 78° 20′ and latitude 22° 20′ (1753) [1760].

A river from a mountain, its beginning is at longitude 79° 45′ and latitude 20° 30′ (1754), and its mouth is in the sea at longitude 80° 0′ and latitude 18° 0′ (1755).

A river from the mountain of Kirmān, its beginning is at longitude 94° 30′ and latitude 28° 40′ (1756) [1761], and its mouth is in the sea beside the city of النيرون at longitude 92° 20′ and latitude 28° 40′ (1757) [1762].

A river from a mountain, its beginning is at longitude 102/110/150° 0′ and latitude 22° 0′ (1758) [1763], and its mouth is in the sea at longitude 100° 0′ and latitude 20° 15′ (1759) [1764].

And a river from this mountain also, its beginning is at longitude 102° 0′ and latitude 21° 15/55′ (1760) [1765], and its mouth is in the sea at longitude 100° 30′ and latitude 20° 30′ (1761) [1766]. p. 117

The river قيدس from a spring at the edge of the mountain سطعى, its beginning is at longitude 118° 30′ and latitude 20° 0′ (1762) [1767], and its mouth is in the sea at longitude 111° 30′ and latitude 14° 30′ (1763) [1768].

The river فربدس from the mountain سطعى, its beginning is at longitude 120° 30′ and latitude ⟨20°⟩ ⟨0′⟩ (1764) [1769], and its mouth is in the sea at longitude 114° 30′ and latitude 15° 20′ (1765) [1770].

The river سالس from a spring ⟨in⟩ the mountain سطعى, its beginning is at longitude 120° 20′ and latitude 19° 40′ (1766) [1771], and its mouth is ⟨in the sea at⟩ longitude ⟨ط⟩و ⟨0′⟩ ⟨and latitude⟩ 14° 45′ (1767) [1772].

The river حارس comes out of the mountain اداسرون, its beginning is at ⟨longitude 127° 10′⟩ and latitude 21° 10′ (1768) [1773]; it passes by the city of حارن and its mouth is in the sea at longitude 128° 30′ and latitude 15° 40′ (1769) [1774].

A spring from the mountain ادورا a river comes out of it called بوس, its beginning is at longitude 128° 0′ and latitude 16° 30′ (1770) [1775], and its mouth is in the sea at longitude 126° 0′ and latitude 14° 40′ (1771) [1776].

A river from the mountain اذورا also, its beginning is at longitude 129° 40′ and latitude 16° 20′ (1772) [1777], and its mouth is in the sea at longitude 128° ⟨0′⟩ and latitude 12° 20′ (1773) [1778].

And a river from this mountain also, its beginning is at longitude 131° 30′ and latitude 16° 30′ (1774) [1779], and its mouth is in the sea at longitude 131° 0′ and latitude 14° 20′ (1775) [1780]. p. 118

The river بدوس from the mountain اوكستر, its beginning is at longitude 132° 0′ and latitude 28° 40′ (1776) [1781], and its mouth is in the sea at longitude 132° 30′ and latitude 15/55° 40′ (1777) [1782].

And the river سرون from this mountain also, its beginning is at longitude 138° 45′ and latitude 28° 40′ (1778) [1783], and its mouth is in the sea at longitude 138° 40′ and latitude 17° 0′ (1779) [1784].

And the river دالس also from this mountain, its beginning is at longitude 135° 15′ and latitude 24° 0′ (1780) [1785], and its mouth is in the sea at longitude 134° 40′ and latitude 17° 45′ (1781) [1786].

And a river comes out of the city of اطراسن, its beginning is at longitude 142° 0′ and latitude 22° 0′ (1782) [1787], and its mouth is in the sea at longitude 141° 30′ and latitude 16° 30′ (1783) [1788].

A river comes out of the mountain منيدروس, its beginning is at longitude 144° 0′ and latitude 19° 0′ (1784) [1789], and its mouth is in the sea at longitude 148° 0′ and latitude 15° 40′ (1785) [1790].

And a river from this mountain also, its beginning is at longitude 145° 45′ and latitude 18° 0′ (1786), and its mouth is in the sea at longitude 144° 0′ and latitude 12° 0′ (1787).

The river طماس from this mountain also, its beginning is at longitude 147° 0′ and latitude 17° 0′ (1788) [1791], and its mouth is in the sea at longitude 145° 20′ and latitude 10° 45′ (1789) [1792].

A spring in the Shining Fortress in the Dark Sea, its beginning is at longitude 176° 0′ and latitude 22° 45′ (1790) [1793] ⟨comes out⟩ from it two rivers both flow into the sea the mouth of the first at longitude 178° 0′ and latitude 28° 45′ (1791) [1794] ⟨and the mouth of the other at⟩ longitude 174° 0′ and latitude 22° 40′ (1792) [1795].

p. 119

⟨The⟩ third clime and the springs and ⟨the rivers⟩ that are in it

⟨A spring, its beginning is⟩ at longitude 10° 40′ and latitude 29° ⟨0′⟩ (1793) [1796] ⟨and its mouth is in the sea⟩ at longitude 8° 20′ and latitude 28° 15/55′ (1794) [1797].

A spring, its beginning is at longitude ⟨11°⟩ ⟨15′⟩ and latitude 28° 0′ (1795) [1798], and its mouth is in the sea at longitude 8° 0′ and latitude 27° 30′ (1796) [1799].

A spring ⟨, its beginning is⟩ at longitude 11° 15′ and latitude 27° 20′ (1797) [1800], and its mouth is in the sea at longitude 8° 0′ and latitude 27° 0′ (1798) [1801].

The river حلفاث, its beginning is at longitude 18° 0′ and latitude 30° 0′ (1799) [1802], and its mouth is in the sea at longitude 17° 45′ and latitude 32° 0′ (1800) [1803].

The river ساوس, its beginning is a spring at longitude 19° 40′ and latitude 30° 0′ (1801) [1804], and its mouth is in the sea at longitude 20° 20′ and latitude 32° 0′ (1802) [1805].

A river, its beginning is a spring at longitude 22° 45′ and latitude 29° 30′ (1803) [1808], and its mouth is in the sea at longitude 23° 45′ and latitude 32° 0′ (1804) [1809].

The river سوسولس, its beginning is at longitude 23° 30′ and latitude 29° 40′ (1805) [1810], and its mouth is in the sea at longitude 24° 40′ and latitude 32° 0′ (1806) [1811].

A river, its beginning is a spring at longitude 23° 40′ and latitude 25° 40′ (1807) [1812], and its mouth is in the sea at longitude 24° 30′ and latitude 32° 0′ (1808) [1813]. p. 120

A river from a mountain, its beginning is at longitude 37° 20′ and latitude 26° 45′ (1809) [1814], and its mouth is in the sea at longitude 37° 30′ and latitude 32° 10′ (1810) [1815].

Two rivers flow into this river from two springs one of them, its beginning is at longitude 36° 30′ and latitude 29° 40′ (1811) [1816], and its mouth is in the river at longitude 37° 20′ and latitude 29° 40′ (1812) [1817] and the second, its beginning is at longitude 37° 0′ and latitude 30° 40′ (1813) [1818], and its mouth is in the river at longitude 37° 20′ and latitude 30° 0′ (1814) [1819].

A river comes out of the city of طاووس, its beginning is a spring at longitude 50° 0′ and latitude 28° 0′ (1815) [1820]; it passes by the mountain اسلوس at latitude 29° 30′ and longitude 48° 0′ (1816) [1821]; and passes to the mountain مقلان at latitude 27° 0′ and longitude 46° 0′ (1817) [1822]; and passes to the Mountain of the Sun at latitude 30° 0′ and longitude 48° 0′ (1818) [1823]; and flows into the sea between Barqa and اسفاربوس, at longitude 42° 20′ and latitude 38° 20′ (1819) [1824].

And a river comes out of the mountain زارس, its beginning is at longitude 45° 10′ and latitude 24° 45′ (1820) [1825]; and passes ⟨to⟩ latitude 28° 30′ (1821) [1826]; and flows into a small marsh at the city of رماريا at longitude 50° 0′ and latitude ⟨24°⟩ ⟨20′⟩ (1822) [1827].

⟨A river from the mountain⟩ Kirmān, its beginning is at longitude 90° 0′ and latitude 29° 0′ (1823) [1828], and its mouth is in ⟨the sea at longitude 89° 0′⟩ and latitude 28° 0′ (1824) [1829]. p. 121

And a river from this mountain also ⟨, its beginning is at longitude 92° 0′⟩ and latitude ⟨27°⟩ ⟨0′⟩ (1825) [1830] ⟨and its mouth is⟩ in the sea at longitude 90° 0′ and latitude 26° 50′ (1826) [1831].

A river from the mountain of Kirmān also, its beginning is at longitude 93° 0′ and latitude 25° 45′ (1827) [1832], and its mouth is in the sea at longitude 91° 10′ and latitude 25° 30′ (1828) [1833].

And a river from this mountain also, its beginning is at longitude 98° 20′ and latitude 25° 0′ (1829) [1834], and its mouth is ⟨in the sea at longitude 91° 50′ and latitude⟩ 24° 40′ (1830) [1835].

A river, its beginning is a spring at longitude 100° 20′ and latitude 24° 30′ (1831) [1836], and its mouth is in the sea at longitude 99° 45′ and latitude 21° 10′ (1832) [1837].

A river from a mountain, its beginning is at longitude 108° 30′ and latitude 25° 0′ (1833) [1838], and its mouth is in the sea at the city of امرس at longitude 108° 0′ and latitude 20° 0′ (1834) [1839] falls into this river a river from the mountain ارسطا, its beginning is at longitude 106° 0′ and latitude 24° 30′ (1835) [1840], and its mouth is in the river at longitude 103° 30′ and latitude 20° 40′ (1836) [1841].

A river from the mountain اوبدون, its beginning is at longitude 121° 30′ and latitude 27° 0′ (1837) [1842]; it passes to longitude 108° 0′ and latitude 19° 30′ (1838) [1843]; then two rivers branch off from it both flow to the sea the mouth of one of them at longitude 106° 30′ and latitude 20° 0′ (1839) [1844] and the mouth of the other at longitude 106° 0′ and latitude 17° 0′ (1840) [1845]. p. 122

A river from this mountain also, its beginning is at longitude 125° 30′ and latitude 26° 45′ (1841) [1846]; it passes between the city of فافورا and the mountain سنودس and passes by the city of ايشنا and comes to longitude 108° 30′ and latitude 16° 40′ (1842) [1847]; then two rivers branch off from it whose mouths are in the sea the mouth of one of them at longitude 106° 30′ and latitude 16° 0′ (1843) [1848] and the mouth of the other at longitude 108° 0′ and latitude 15° 0′ (1844) [1849].

The river دوانس comes out of the mountain رماسا, its beginning is at longitude 149° 50′ and latitude 29° 0′ (1845) [1850]; then it passes to longitude 148° 30′ and latitude 27° 0′ (1846) [1851]; then it passes near the city of طعولا and by the city of فرداثرا and flows into the sea at longitude 153° 30′ and latitude 11° 15′ (1847) [1852].

And the river دوربوس comes out of this mountain also, its beginning is at longitude 150° 45′ and latitude 29° 0′ (1848) [1853], and its mouth is in the sea at longitude 155° 20′ and latitude 18° 40′ (1849) [1854].

The river سمس فس comes out of the mountain سمس, its beginning is at longitude 168° 40′ and latitude 26° 30′ (1850) [1855], and its mouth is in the sea at longitude 89/109° 40′ and latitude ⟨18°⟩ ⟨20′⟩ (1851) [1856].

The fourth clime and the springs and the rivers that are in it

A river, its beginning is a spring at longitude 10° 45′ and latitude 32° 30′ (1852) [1857]; it passes along the mountain دبلوں and flows into the sea at longitude 7° 40′ and latitude 38° 30′ (1853) [1858]. p. 123

A river, its beginning is a spring at longitude 11° 0′ and latitude 31° 30′ (1854) [1859]; it passes between the Mountain of the Sun and the mountain of the Little Atlas; its mouth is in the sea at longitude 8° 20′ and latitude 32° 0′ (1855) [1860].

A river, its beginning is a spring at longitude 11° 15′ and latitude 31° 30′ (1856) [1861], and its mouth is in the sea at longitude 12° 0′ and latitude 38° 30′ (1857) [1862].

A spring, its beginning is at longitude 18° 10′ and latitude 31° 50′ (1858) [1863], and its mouth is in the sea at longitude 18° 30′ and latitude 38° 0′ (1859) [1864].

A spring, its beginning is at longitude 14° 10′ and latitude 31° 0′ (1860) [1865], and its mouth is in the sea at longitude 14° 10′ and latitude 32° 30′ (1861) [1866].

A spring, its beginning is at longitude 14° 40′ and latitude 31° 0′ (1862) [1867]; its mouth is in the sea at longitude 14° 40′ and latitude 32° 20′ (1863) [1868].

A spring, its beginning is at longitude 18° 50′ and latitude 30° 30′ (1864) [1869]; its mouth is in the sea at longitude 18° 45′ and latitude 32° ⟨0′⟩ (1865) [1870].

A spring, its beginning is at longitude 19° 10′ and latitude 31° 0′ (1866) [1871]; its mouth is in the sea at longitude 19° 25′ and latitude 32° 0′ (1867) [1872].

A river in an island, its beginning is at longitude 30° 0′ and latitude 35° 0′ (1868) [1873]; it passes to latitude 36° 0′ along the same longitude (1869) [1874] and turns aside to the middle of the city of اثلا and flows into the sea at longitude 28° 20′ and latitude 35° 40′ (1870) [1875].

A spring in this island also at longitude 30° 40′ and latitude 35° 30′ (1871) [1876] and its end is in the city of قا at longitude 31° 45′ and latitude 35° 40′ (1872) [1877].

A spring in the mountain نويربورا; two rivers come out of it to two small marshes; the first of them begins at longitude 33° 50′ and latitude 30° 0′ (1873) [1880]; one of the two marshes is at longitude 35° 0′ and latitude 31° 0′ (1874) [1878] and the second at longitude 35° 30′ and latitude 30° 40′ p. 124
(1875) [1879].

A spring, its beginning is at longitude 36° 0′ and latitude 30° 40′ (1876) [1881], and its mouth is in the sea at longitude 35° 20′ and latitude ⟨32°⟩ 0′ (1877) [1882].

A spring in an island, its beginning is at longitude 45° 30′ and latitude 35° 40′ (1878) [1887], and its mouth is ⟨in the sea at⟩ longitude 45° 50′ and latitude 36° 45′ (1879) [1888].

A spring in this island also, its beginning is at longitude ⟨45°⟩ ⟨45′⟩ and latitude 35° 20′ (1880) [1883]; its mouth is in the sea at[a] longitude 46° 20′ and latitude 36° 0′ (1881) [1884].

And a spring in this island also, its beginning is at longitude 45° 45′ and latitude 35° 0′ (1882) [1885], and its mouth is in the sea at longitude 46° 30′ and latitude 35° 20′ (1883) [1886].

A spring in an island, its beginning is at longitude 47° 0′ and latitude 34° 0′ (1884) [1889], and its mouth is in the sea at longitude 47° 0′ and latitude 34° 30′ (1885) [1890].

And a spring in this island also, its beginning is at longitude 47° 30′ and latitude 34° 0′ (1886), and its mouth is in the sea at longitude 47° 0′ and latitude 34° 30′ (1887).

And a spring in this island also, its beginning is at longitude 48° 0′ and latitude 33° 40′ (1888) [1891], and its mouth is in the sea at longitude 47° 20′ and latitude 34° 0′ (1889) [1892].

[a]The print has غند, with a dot over the ʿayn, for عند, «at».

And a spring its size is half a degree from which no river comes near Alexandria at longitude 50° 30′ and latitude 30° 30′ (1890) [1893].

A spring in the island of Cyprus, its beginning is at longitude 56° 10′ and latitude 34° 40′ (1891) [1894], and its mouth is in the sea at longitude 55° 50′ and latitude 35° 20′ (1892) [1895].

A spring in this island also, its beginning is in the city of سمار at longitude 57° 40′ and latitude 35° 0′ (1893) [1896], and its mouth is in the sea at longitude 57° 0′ and latitude 34° 20′ (1894) [1897]. p. 125

The Lake of Tiberias, of the size of half a degree, its length like its width, at longitude 58° 20′ and latitude 32° 0′ (1895) [1025]; a river comes out of it and passes by the Mountain of Snow and the mountain سنير, then flows into the sea at longitude 61° 0′ and latitude 35° 0′ (1896) [1557]; and there also comes out of this lake a river to the Dead Lake, at longitude 58° 20′ and latitude 30° 30′ (1897) [1026]; the size of the Dead Lake is half a degree, round.

A river from the Mountain of Snow, its beginning is at longitude 59° 45′ and latitude 32° 15′ (1898), and its mouth is in the city of Damascus: it passes a little beyond it to a lake into which it flows.

A river comes out of Mount Lebanon, its beginning is at longitude 61° 0′ and latitude 33° 40′ (1899) [1898]; and passes by Ḥimṣ and Ḥamāh and it is the Jordan and flows into the sea at Antioch at longitude 61° 0′ and latitude 34° 45′ (1900) [1899].

A river comes out of a mountain, its beginning is at longitude 79° 20′ and latitude ⟨35°⟩ 40′ (1901) [1900]; and passes and cuts across the mountain of Iṣṭakhr and Jūr and flows into the sea near Sīrāf at longitude 80° 0′ and latitude 29° ⟨30′⟩ (1902) [1901].

A river comes out of a mountain, its beginning is at longitude 84° 30′ and latitude 35° 40′ (1903) [1902]; and flows into the sea at longitude 84° 40′ and latitude 29° 20′ (1904) [1903].

The river روس comes out of the mountain سيمس, its beginning is at longitude 158° 30′ and latitude 32° 0′ (1905) [1904], and its mouth is in the sea at longitude 158° 0′ and latitude 18/58° 50′ (1906) [1905].

The river فطروس: its beginning is a spring from the mountain of the river سمس, at ⟨longitude⟩ 166° 10′ and latitude 31° 30′ (1907) [1906]; it passes to a marsh the size of a p. 126
degree at longitude 165° 20′ and latitude 20° 40′ (1908) [1907]; and passes from this marsh and cuts through the city of China, and passes on until it flows into the sea at longitude 162° 10′ and latitude 3° 40′ (1909) [1908]. And there falls into the marsh that is on this river a river from the mountain of the river سمس also; ⟨its beginning is⟩ at longitude 169° 0′ and latitude 28° 0′ (1910) [1909], and its mouth is in the marsh.

The fifth clime and the springs and the rivers that are in it

The river اس, its beginning is a spring at longitude 12° 15/55′ and latitude 40° 45′ (1911) [1910], and its mouth is in the sea at longitude 4° 30′ and latitude 38° 20′ (1912) [1911]; it passes by the city of فسطورن and by the city of اسقلس and by the city of اروثى.

A river from the mountain ارطسفازا, its beginning is at longitude 12° 15′ ⟨and latitude 38° 0′⟩ (1913) [1912]; it passes by the city of وبه and between the mountain لوس and the city of اطلما at longitude 7° 40′ and latitude 38° 40′ (1914) [1913]; then two rivers branch off from it both flow into the sea the mouth of the first at longitude 7° 0′ and latitude 37° 20′ (1915) [1914] and the other at longitude 6° 30′ and latitude 37° 20′ (1916) [1915]; this river goes round the mountain لوس and the city of اووى until it flows into the sea.

A river comes out of the city of مارنا and passes by the city of مكسارا, its beginning is at longitude 14° 30′ and latitude 40° 40′ (1917) [1917], and its mouth is in the sea at longitude 18° 0′ and latitude 45° 40′ (1918) [1918]. p. 127

A river comes out of the mountain ايدوقرا, its beginning is at longitude 15° 35′ and latitude 39° 40′ (1919) [1919], and its mouth is in the sea at longitude 16° 20′ and latitude ⟨38°⟩ ⟨45′⟩ (1920) [1920].

A river in the island of فرس, its beginning is at longitude 30° 20′ and latitude 39° 40′ (1921) [1921]; it passes by the city of شرفى and its mouth is in the sea at longitude 29° 25′ and latitude 40° 15′ (1922) [1922].

A river in the island of Sarakhs, its beginning is a spring at longitude 30° 20′ and latitude 36° 50′ (1923) [1923], and its mouth is in the sea at longitude 28° 40′ and latitude 37° 0′ (1924) [1924].

And a river in this island also, its beginning is a spring at longitude 31° 0′ and latitude 36° 0′ (1925) [1925]; it passes inside the city of ليس and its mouth is in the sea at longitude 32° 0′ and latitude 37° 0′ (1926) [1926].

A spring in the island of قرنس, its beginning is at longitude 31° 45′ and latitude 39° 15/55′ (1927) [1927]; it passes to a place whose longitude is 31° 10′ and latitude 40° 20′ (1928) [1928].

Then two rivers branch off from this place; one of them enters the city of قروى and comes out from it and flows into the sea at longitude 32° 0′ and latitude 39° 10′ (1929) [1929] and the other river flows into the sea at longitude 31° 30′ and latitude 40° 45′ (1930) [1930].

And a river also comes out of this spring, its beginning is at longitude 31° 30′ and latitude 40° 10′ (1931) [1931], and its mouth is in the sea at longitude 32° 15/55′ and latitude 40° 10′ (1932) [1932].

A river comes out of the mountain اطى in an island, its beginning is at longitude 35° 0′ and latitude 36° 15′ (1933) [1933]; its mouth is in the sea at longitude 38° 40′ and latitude 36° 45′ (1934) [1934].

p. 128

And a river in this island also, its beginning is a spring at longitude 35° 25′ and latitude 37° 10′ (1935) [1935], and its mouth is in the sea at longitude 35° 45′ and latitude 35° 30′ (1936) [1936].

A river comes out of a city; it has two mouths into the sea, at the two sides of the city; the beginning of the river is at longitude 44° 30′ and latitude 40° 45′ (1937) [1937] its first mouth is at longitude 40° 40′ and latitude 42° 20′ (1938) [1938] and the second mouth at longitude 45° 0′ and latitude 40° 0′ (1939) [1939].

A river comes out of the city of, its beginning is at longitude 46° 30′ and latitude 37° 0′ (1940) [1940], and its mouth is in the sea at longitude 47° 10′ and latitude 36° 30′ (1941) [1941].

A river, its beginning is a spring at longitude 52° 0′ and latitude 40° 30′ (1942) [1942]; it passes to the city of طروب; its mouth is in the city, at longitude 49° 40′ and latitude 40° 30′ (1943) [1943].

A spring in the city of قرغامس; three rivers come out of it.

The first of the rivers: ⟨its beginning is⟩ at longitude 50° 30′ and latitude 40° 20′ (1944) [1944]; it passes by the mountain اندس and cuts it and flows into the sea at longitude 49° 50′ and latitude 41° 30′ (1945) [1945].

And the second river, its beginning is at longitude 51° 30′ and latitude 40° 30′ (1946) [1946]; it passes and cuts through the mountain اندس, passes inside the city of ابليون, comes out of it and flows into the sea at longitude 50° 40′ and latitude 42° 45′ (1947) [1947].

And the third river, its beginning is at longitude 51° 40′ and latitude 40° 30′ (1948) [1948]; it passes touching the beginning of the boundary of the mountain اندس and enters the city of ابلون and comes out from it and flows into the sea at longitude 50° 50′ and latitude 48° 10′ (1949) [1949].

A river comes out of the city of افاسس at longitude 51° 30′ and latitude 37° 40′ (1950) [1676 1950] it passes between the mountain سيفولس and the mountain بلمون it passes to the city of قبلوميلس and turns back and passes between the mountain سيفولس and the mountain دورمر and passes to a place whose longitude is 15° 0′ and latitude 45° 0′ (1951) [1677 1951] and turns back, touching the city of اطوما, between it and هرقله, and flows into the sea at longitude 12° 40′ and latitude 47° 0′ (1952) [1678 1952].

p. 129

A river, its beginning is a spring at longitude 56° 0′ and latitude 40° 0′ (1953) [1679 1953] it passes باقره and flows into the sea at longitude 56° 25′ and latitude 49° 20′ (1954) [1680 1954].

A river, its beginning is a spring at longitude 56° 15′ and latitude 37° 30′ (1955) [1955], and its mouth is in the sea at longitude 56° 20′ and latitude 35° 35′ (1956) [1956].

A river, its beginning is a spring at longitude 57° 0′ and latitude 40° 20′ (1957) [1957]; it passes between the city of اماسیا and the city of سیسمای and passes at the corner of the city of تیمنا and flows into the sea at longitude ⟨59°⟩ ⟨25′⟩ and latitude 48° 40′ (1958) [1958].

The river Tigris: its beginning is a spring at longitude 64° 40′ and latitude 39° 0′ (1959) [1483]; it passes between two mountains at longitude 64° 45′ and latitude 37° 45′ (1960) [1484] and turns aside along the mountain to longitude 68° 0′ and latitude 38° 0′ (1961) [1485]; then it passes to p. 130
Āmid, then to Balad; between Balad and Shahrazūr it passes between Mosul and the mountain also; it passes by Takrīt, passes by Surra man raʾā, enters Baghdad ⟨and comes out of⟩ it, passes by al-Madāʾin and passes by Wā⟨siṭ⟩ on the side of Ḥulwān; then it comes to the marshes.

⟨۰ ۰ ۰⟩م the marshes, the size of a degree; the middle of the marshes is at longitude 78° 0′ and latitude 32° 0′ (1962) [1028 1486].

And it passes to longitude 74° 0′ and latitude 31° 45′ (1963), and from there it divides into three rivers.

The first of them has its mouth at Basra; the second passes on, its mouth between Basra, ʿAbbādān and al-Ahwāz; and the third flows into the sea at longitude 75° 45′ and latitude 30° 30′ (1964).

And there falls into the Tigris a river called ذیب, from a mountain; its beginning is at longitude 68° 30′ and latitude 39° 0′ (1965) [1495], and its mouth is in the Tigris at longitude 68° 20′ and latitude 37° 30′ (1966) [1496].

And there also falls into the Tigris the river فاقس; its beginning is a spring in a mountain at longitude 69° 0′ and latitude 39° 20′ (1967) [1497], and its mouth is in the Tigris at longitude 69° 15′ and latitude 36° 30′ (1968) [1498].

And there fall into the Tigris the two Zābs, from a mountain: the beginning of one of them is at longitude 71° 30′ and latitude 38° 30′ (1969) [1499], and its mouth at longitude 69° 30′ and latitude 35° 30′ (1970) [1500]; the second Zāb begins at longitude 72° 0′ and latitude 38° 0′ (1971) [1501], and its mouth is at longitude 69° 40′ and latitude 35° 0′ (1972) [1502].

A spring at the foot of the mountain حارث وحویرث, which does not flow, at longitude 69° 10′ and latitude 40° 20′ (1973) [1959]; its size is two quarters of a degree.

A river comes out of a mountain; its beginning is at longitude 87° 0′ and latitude 39° 0′ (1974) [1960]; it passes and cuts through Marw al-Rūdh, comes out of it and comes to Marw at longitude 83° 45′ and latitude 37° 45′ (1975) [1961]; then it vanishes.

A marsh of the size of half a degree; its middle is at longitude 86° 0′ and latitude 36° 40′ (1976) [1027]. Two springs flow into it from a mountain, one of them at longitude 80° 45′ and latitude 38° 30′ (1977) [1962] and the second at longitude 89° 20′ and latitude 39° 10′ (1978) [1963]. p. 131

The river Mihrān, its beginning is at longitude 126° 30′ and latitude 36° 10′ (1979) [1613]; it passes to a place whose longitude is 125° 20′ and latitude 32° 20′ (1980) [1614]; then it passes to a place whose longitude is 122° 30′ and latitude 32° 45′ (1981) [1615]; then it passes to a place whose longitude is 120° 10′ and latitude 32° 40′ (1982) [1616]; then it passes to a place whose longitude is ⟨119°⟩ 0′ and latitude 31° 0′ (1983) [1617]; then it passes between the yellow mountain and a city at longitude 111° 15′ and latitude 26° 0′ (1984) [1618]; then it passes to a place whose longitude is 107° 0′ and latitude 23° 30′ (1985) [1619].

Then two rivers branch off from this place; the mouth of the first of them in the sea at the city of امیرس at longitude 104° 15′ and latitude 20° 0′ (1986) [1620].

Then a river comes out of this river from a place whose longitude is 106° 30′ and latitude 28° 30′ (1987) [1621]; it passes to a place whose longitude is 106° 0′ and latitude 22° 10′ (1988) [1622].

Two rivers branch off from this place; the mouth of the first of them in the sea at longitude 104° 45′ and latitude 20° 0′ (1989) [1623] and the mouth of the second in the sea at longitude 105° 30′ and latitude 20° 0′ (1990) [1624].

The second, great river Mihrān: its mouth is in the sea at longitude 106° 30′ and latitude 20° 0′ (1991) [1625].

Two rivers also come out of the river; the beginning of one of them at longitude 107° 0′ and latitude 22° 20′ (1992) [1626], and its mouth is in the sea at longitude 106° 0′ and latitude 20° 0′ (1993) [1627] and the beginning of the second river at longitude 106° 40′ and latitude 21° 0′ (1994) [1628], and its mouth is in the sea at longitude 106° 15′ and latitude 20° 0′ (1995) [1629].

A spring falls to the river Mihrān, its beginning is at longitude 125° 30′ and latitude 36° 30′ (1996), and its mouth is in the river at longitude 125° 40′ and latitude 35° 0′ (1997). p. 132

And a spring falls also to the river Mihrān, its beginning is at longitude 124° 40′ and latitude 37° 0′ (1998) [1630], and its mouth is in the river at longitude 122° 30′ and latitude 32° 45′ (1999) [1631].

And a spring also falls to the river Mihrān, its beginning is at longitude 123° 0′ and latitude 36° 0′ (2000) [1632], and its mouth is in the river at longitude 120° 0′ and latitude 32° 45′ (2001) [1633].

And a spring falls also to the river Mihrān, its beginning is at longitude 83/103° 40′ and latitude 36° 0′ (2002) [1634], and its mouth is in the river at longitude 120° 10′ and latitude 32° 10′ (2003) [1635].

And there fall into this spring three rivers from three springs: the beginning of the first spring is at longitude 115° 0′ and latitude 36° 0′ (2004) [1636], and its mouth is in the river of the spring at longitude 116° 40′ and latitude 32° 30′ (2005) [1637]; the beginning of the second spring is at longitude ⟨106°⟩ ⟨45′⟩ and latitude 36° 0′ (2006) [1638], and its mouth is in the river of the spring at longitude 108° 0′ and latitude 32° 30′ (2007) [1639]; and the third spring begins at longitude 108° 0′ and latitude 36° 10′ (2008) [1640], and its mouth is in the river of the spring at longitude 109° 30′ and latitude 32° 30′ (2009) [1641].

A river comes out between the city of Eastern Alexandria and the mountain at longitude 104° 40′ and latitude 32° 50′ (2010) [1642]; it passes to a place whose longitude is 103° 0′ and latitude 32° 0′ (2011) [1643]; and passes between the city of Alexandria and the mountain and passes near the city of Qandahār and passes to a place whose longitude is 114° 0′ and latitude 29° 25′ (2012) [1644]; and passes and falls into the river Mihrān the first that we have mentioned at longitude 119° 0′ and latitude 30° 30′ (2013) [1645]. p. 133

Out of the river of this spring there comes a river that is also called the river Mihrān; its beginning is at longitude 88° 30′ and latitude 29° 30′ (2014) [1646]; it passes near Qandahār and passes and touches the mountain of Kirmān, and flows into the sea near al-Manṣūra at longitude 92° 20′ and latitude 22° 50′ (2015) [1647].

There falls into this river Mihrān a river from a mountain; its beginning is at longitude 83/103° 20′ and latitude 28° 20′ (2016) [1648]; and passes to a place whose longitude is 84/104° 40′ and latitude 27° 30′ (2017) [1649], and its mouth is in the river at longitude 88/108° 15′ and latitude 26° 40′ (2018) [1650].

And there also falls into this river Mihrān a river from the mountain ارسطا; its beginning is at longitude 107° 30′ and latitude 25° 0′ (2019) [1651], and its mouth is in the river at longitude 109° 40′ and latitude 24° 30′ (2020) [1652].

The river Ganges, its beginning is a spring from a mountain at longitude 135° 0′ and latitude 39° 0′ (2021) [1964]; it passes to a place whose longitude is 135° 30′ and latitude 31° 0′ (2022); and passes to a place whose longitude is 139° 30′ and latitude 28° 0′ (2023) [1965]; and passes to a place whose

longitude is 140° 10′ and latitude 26° 30′ (2024) [1966]; and passes to a place whose longitude is 139° 0′ and latitude 22° 0′ (2025) [1967]. p. 134

Two rivers come out of this place; the first of them reaches a place whose longitude is 137° 0′ and latitude 21° 30′ (2026) [1968], and flows into the sea at longitude 135° 20′ and latitude 17° 45′ (2027) [1969].

A river comes out of this river, its beginning is at longitude 137° 0′ and latitude ⟨21°⟩ ⟨20′⟩ (2028) [1970], and its mouth is in the sea at longitude 137° 30′ and latitude 18° 20′ (2029) [1971].

And the second river comes out of the river Ganges, its beginning is at longitude ⟨139°⟩ ⟨0′⟩ and latitude 22° 0′ (2030) [1972], and its mouth is in the sea at longitude 141° 0′ and latitude 17° 0′ (2031) [1973].

And two rivers come out of this river: the beginning of one of them is at longitude 139° 20′ and latitude 21° 0′ (2032) [1974], and its mouth is in the sea at longitude 138° 0′ and latitude 18° 10′ (2033) [1975]; and the beginning of the second is at longitude 139° 30′ and latitude 20° 0′ (2034) [1976], and its mouth is in the sea at longitude 139° 0′ and latitude 18° 40′ (2035) [1977].

And there falls into the river Ganges a spring, its beginning is at longitude 134° 0′ and latitude 37° 10′ (2036) [1978], and its mouth is in the river at longitude 135° 30′ and latitude 33° 30′ (2037) [1979].

And there falls into the river Ganges also a spring from a mountain, its beginning is at longitude 137° 10′ and latitude 38° 30′ (2038) [1980], and its mouth is in the river at longitude 135° 30′ and latitude 33° 30′ (2039) [1981].

And there falls into the river Ganges also a spring from a mountain, its beginning is at longitude 138° 40′ and latitude 25° 0′ (2040) [1982], and its mouth is in the river at longitude 139° 30′ and latitude 28° 0′ (2041) [1983].

And there falls into the river Ganges also a river from the mountain سورون, its beginning is at longitude 142° 30′ and latitude 32° 30′ (2042) [1984], and its mouth is in the river at longitude 139° 30′ and latitude 28° 0′ (2043) [1985]. p. 135

And there falls into the river Ganges also a river from the mountain سورون, its beginning is at longitude 144° 30′ and latitude 28° 40′ (2044) [1986], and its mouth is in the river at longitude 140° 10′ and latitude 26° 30′ (2045) [1987].

The river باطس, its beginning is a spring at longitude 146° 0′ and latitude 39° 40′ (2046) [1653]; it passes to a place whose longitude is 149° 0′ and latitude 41° 30′ (2047) [1654]; and passes to a place whose longitude is 88/108° 0′ and latitude 40° 10′ (2048) [1655][a]; and passes and enters between the mountain of the river سقس and the dam, and passes below the city of Gog and Magog, touching it, and passes to a place whose longitude is 180° 0′ and latitude 47° 30′ (2049) [1656].

And there falls into this river a spring, its beginning is at longitude 147° 20′ and latitude 45° 20′ (2050) [1657], and its mouth is in the river at longitude 149° 0′ and latitude 41° 30′ (2051) [1658].

And there also falls into the river باطس ⟨a spring⟩, its beginning is between two cities and a mountain, at longitude 149° 30′ and latitude 38° 40′ (2052) [1659], ⟨and its mouth is in⟩ the river ⟨at⟩ longitude 88/108° 0′ and latitude 40° 0′ (2053) [1660].

And there also falls into the river باطس a river from the mountain اوفروس, its beginning is at longitude 156° 30′ and latitude 39° 45′ (2054) [1661], ⟨and its mouth is⟩ in the river at longitude 86/106° 25′ and latitude 41° 0′ (2055) [1662].

[a]The print has غ here and at (2053), and ف at (2055): 88 or 108, and 86 or 106. Neither reading fits a river that runs from 149° to 180°, or tributaries that begin at 149° 30′ and 156° 30′.

The sixth clime and the springs and the rivers that are in it

The river بوارس, its beginning is at longitude 12° 0′ and latitude 41° 0′ (2056) [1988], and its mouth is in the sea at longitude 6° 10′ and latitude 41° 30′ (2057) [1989]. p. 136

A river, its beginning is a spring at longitude 12° 15/55′ and latitude 44° 10′ (2058) [1990], and its mouth is in the sea at longitude 6° 40′ and latitude 44° 10′ (2059) [1991].

A river, its beginning is a spring at longitude 9° 10′ and latitude 44° 45′ (2060) [1992], and its mouth is in the sea at longitude 7° 0′ and latitude 44° 45′ (2061) [1993].

A river from a mountain, its beginning is at longitude 19° 30′ and latitude 44° 20′ (2062) [1994], and its mouth is in the sea at longitude 18° 0′ and latitude 44° 45′ (2063) [1995].

A river from this mountain also, its beginning is at longitude 20° 0′ and latitude 44° 0′ (2064) [1996], and its mouth is in the sea at longitude 21° 0′ and latitude 42° 30′ (2065) [1997].

A river from this mountain also, its beginning is at longitude 20° 15/55′ and latitude 44° 20′ (2066) [2000], and its mouth is in the sea at ⟨longitude⟩ 21° 30′ and latitude 42° 30′ (2067) [2001].

The river اغتل from this mountain also, its beginning is at longitude 20° 30′ and latitude 44° 45′ (2068) [1998], and its mouth is in the sea at longitude 21° 50′ and latitude 42° 30′ (2069) [1999].

A river comes out of this mountain ⟨also⟩, its beginning is at longitude 20° 40′ and latitude 44° 50′ (2070) [2002]; it passes below the city of ماربانوس, then reaches longitude 20° 0′ and latitude 47° 0′ (2071) [2003], and flows into the sea at longitude 18° 30′ and latitude 47° 10′ (2072) [2004].

The river دربوس, its beginning is from the mountain اروس at longitude 27° 40′ and latitude 44° 50′ (2073) [2005]; and passes between the city of لوعزبون and the city of باتوبا, then reaches longitude 28° 0′ and latitude 44° 45′ (2074) [2006]; then it turns aside and flows into the sea at longi- p. 137
tude 22° 20′ and latitude 42° 30′ (2075) [2007].

And a river that flows into the sea comes out of this river; its beginning is at longitude 22° 20′ and latitude 43° 0′ (2076) [2008], and its mouth is in the sea at longitude 22° 40′ and latitude ⟨42°⟩ ⟨30′⟩ (2077) [2009].

And there falls ⟨into⟩ the river دريوس a river from the mountain اروس, its beginning is at longitude 27° 15/55′ and latitude 44° 30′ (2078) [2010], and its mouth is in the river at longitude 26° 30′ and latitude 44° 30′ (2079) [2011]; and passes between the city of دقسالا and the city of فلون.

And there falls into the river دربوس also a river from the mountain اروس at longitude 27° 0′ and latitude 43° 10′ (2080) [2012], and its mouth is in the river at longitude 22° 30′ and latitude 43° 30′ (2081) [2013].

And there falls into the river دريوس also a river from the mountain اروس, its beginning is at ⟨longitude⟩ 27° 0′ and latitude 42° 40′ (2082) [2014]; it passes between the city of طلسا and the city of دقسالا and flows into the river at longitude 22° 20′ and latitude 43° 10′ (2083) [2015].

Two rivers come out of this river, both flowing into the sea: the first of them, its beginning is at longitude 24° 40′ and latitude 48° 10′ (2084) [2016], and its mouth is in the sea at longitude 24° 40′ and latitude 42° 30′ (2085) [2017]; and the second river, its beginning is at longitude 26° 10′ and latitude 48° 0′ (2086) [2018], and its mouth is in the sea at longitude 26° 10′ and latitude 42° 30′ (2087) [2019].

A river comes out of the mountain اروس, passes between the city of فلون and the river دربوس, and flows into the city of باتونا; its beginning is at longitude 27° 30′ and latitude 43° 40′ (2088) [2020], and its mouth is in the city at longitude 28° 40′ and latitude 44° 30′ (2089) [2021].

A river comes out of a spring, its beginning is at longitude 28° 40′ and latitude 44° 20′ (2090) [2022]; it passes near the city of منطيا at longitude 31° 0′ and latitude 48° 40′ (2091) [2023], and its p. 138
mouth is in the sea at longitude 38° 30′ and latitude 44° 10′ (2092) [2024].

There falls into this river a river from a spring, its beginning is at longitude 29° 15′ and latitude 42° 45′ (2093) [2025], and its mouth is in the river at longitude 30° ⟨0′⟩ and latitude 44° 0′ (2094) [2026].

And there also falls into the first river another spring, its beginning is at longitude 29° 30′ and latitude 45° 10′ (2095) [2027], and its mouth is in the river at longitude 30° 30′ and latitude 44° 0′ (2096) [2028].

A spring, its beginning is at longitude 30° 30′ and latitude 44° 45′ (2097) [2029], and its mouth is in the sea at longitude 31° 20′ and latitude 44° 20′ (2098) [2030].

A spring comes out from below the city of نبانبا, its beginning is at longitude 32° 15/55′ ⟨and latitude⟩ 42° 35′ (2099) [2031]; its mouth is in the sea at longitude 29° 30′ and latitude 41° 40′ (2100) [2032].

A spring between the city of باسدوں and the city of اهس, its beginning is at longitude 33° 45′ and latitude 48° 30′ (2101) [2033], and its mouth is in the sea at longitude 31° 45′ and latitude 41° 30′ (2102) [2034].

A spring, its beginning is at longitude 35° 20′ and latitude 48° 45′ (2103) [1681 2035]; it passes to a place whose longitude is 35° 0′ and latitude 48° 0′ (2104) [1682 2036]; it passes on and enters the city of great Rome, comes out, and flows into the sea at longitude 35° 20′ and latitude 41° 40′ (2105) [1683 2037].

A spring, its beginning is at longitude 37° 25′ and latitude 48° 0′ (2106) [2038]; it passes between the city of قوما and the city of فارنبسطين and flows into the sea at longitude 36° 25′ and latitude 41° 30′ (2107) [2039]. p. 139

A river comes out of a city on the sea, its beginning is at longitude 41° 35′ and latitude 48° 0′ (2108) [2040], and its mouth is in a city at longitude 48° 0′ and latitude 42° 10′ (2109) [2041].

A river comes out of a mountain, its beginning is at longitude 48° 45′ and latitude 42° 50′ (2110) [2042]; it passes between two cities that have no names and flows into the sea between a city on which there is no name on the map and the city of لرسو, at longitude 45° 10′ and latitude 40° 0′ (2111) [2043].

A river comes out of a mountain and passes between a city without a name on the map and the city of اسلينو; its beginning is at longitude 44° 10′ and latitude 48° 10′ (2112) [2044], and its mouth is in the sea at longitude 45° 30′ and latitude 41° 0′ (2113) [2045].

A river comes out of a mountain, its beginning is at longitude 44° 30′ and latitude 48° 50′ (2114), and its mouth is in the sea at longitude 45° 0′ and latitude 42° 20′ (2115).

A river comes out of the mountain بلمون, its beginning is at longitude 54° 30′ and latitude 42° 0′ (2116) [2046], and its mouth is in the sea at longitude 55° 40′ and latitude 35° 40′ (2117) [2047].

A spring from which no river flows, at longitude 58° 40′ and latitude 44° 40′ (2118); its size is a sixth of a degree.

The river طور, its beginning is a spring at longitude 68° 0′ and latitude 44° 40′ (2119) [2048]; it passes between the sea and the city of Jurzān, and passes between the city of Bardhaʿa and the city of باسيا and flows into the sea at longitude 74° 40′ and latitude 42° 15′ (2120) [2049].

The river Euphrates, its beginning is a spring in the mountain اوردخس at longitude 68° 30′ and latitude 41° ⟨20′⟩ (2121) [1487]; ⟨it passes to the edge of⟩ the mountain مفنبا at longitude 60° 20′ p. 140
and latitude 42° 20′ (2122) [1488]; and passes between Malaṭya and the city of هنزيط; and passes between the mountain al-Lukkām and the city of Shimshāṭ ⟨and the city of⟩ Sumaysāṭ, on its bank; and passes between a mountain ⟨and⟩ the city of Manbij, and over the bridge of Manbij; and passes by Bālis, al-Raqqa and al-Rāfiqa, all of them, with what lies between them; and passes on and surrounds ʿĀna, al-Ḥadītha, Ālūsa and al-Nāʾūsa; and passes on and touches Hīt; and

passes by al-Anbār; and a part of it passes to Kufa; and it passes to a place whose longitude is 71° 0′ and latitude 31° 0′ (2123) [1489], and its mouth is in the marshes at longitude 78° 0′ and latitude 31° 30′ (2124) [1490].

And a river also comes out of the Euphrates, from a place whose longitude is 71° 0′ and latitude 31° 0′ (2125) [1491], and flows into the marshes.

And there also comes out of the Euphrates ⟨a river⟩ touching al-Anbār, between al-Anbār and Kufa, from a place whose longitude is 68° 50′ and latitude 32° 25′ (2126) [1494], and its mouth is in Baghdad at longitude 69° 40′ and latitude 38° 0′ (2127).

And there falls into the river Euphrates a river from a mountain, its beginning is at longitude 62° 20′ and latitude 41° 0′ (2128) [1492]; it passes by the city of هنزيط and flows into the Euphrates at longitude 61° 30′ and latitude 39° 20′ (2129) [1493]. p. 141

A river comes out of a mountain, its beginning is at longitude 71° 45′ and latitude 41° 30′ (2130) [2050]; it passes to a place whose longitude is 71° 50′ and latitude 48° 0′ (2131) [2051]; it passes between Bardhaʿa and the city of نشوى and flows into the sea at longitude 74° 50′ and latitude 41° 45′ (2132) [2052].

The seventh clime and the springs and the rivers that are in it

A river, its beginning is a spring at longitude 20° 40′ and latitude 47° 15/55′ (2133) [2053], and its mouth is in the sea at longitude 18° 0′ and latitude 47° 30′ (2134) [2054].

The river حرس, its beginning is a spring at longitude 21° 30′ and latitude 45° 20′ (2135) [2055]; it passes to longitude 21° 10′ and latitude 48° 0′ (2136) [2056]; then flows into the sea at longitude 19° 0′ and latitude 48° 30′ (2137) [2057].

⟨The river⟩ اسماوس, its beginning is ⟨in⟩ the mountain بورسس at longitude 25° 0′ and latitude 47° 0′ (2138) [2062]; ⟨it passes by the city of⟩ درفطى and flows into the sea at longitude 21° 0′ and latitude 51° 50′ (2139) [2063].

The river رنوس, its beginning is a spring at longitude 28° 30′ and latitude 47° 0′ (2140) [2058], by the city of السس and by the city of بورما, and flows into the sea at longitude 29° 0′ and latitude 57° 0′ (2141) [2059]. p. 142

And there flows into this river a spring, its beginning is at longitude 26° 40′ and latitude 51° 30′ (2142) [2060], and its mouth is at longitude 28° 40′ and latitude 49° 45′ (2143) [2061].

And there also comes out of the river ديوس a river, its beginning is at longitude 29° 0′ and latitude 55° 20′ (2144) [2064], and its mouth is in the sea at longitude 28° 0′ and latitude 56° 20′ (2145) [2065].

The river نويس, its beginning is a spring at longitude 29° 20′ and latitude 46° 20′ (2146) [2066]; it passes between نياقيلون and the city of اراطى; it passes to a place whose longitude is 40° 40′ and latitude 47° 15′ (2147) [2067]; and passes between the city of ورقس and the city of اندس to a place whose longitude is 42° 0′ and latitude 48° 0′ (2148) [2068]; and passes to a place whose longitude is 44° 0′ and latitude 46° 0′ (2149) [2069]; and passes to a place whose longitude is 47° 30′ and latitude 45° 0′ (2150) [2070]; and passes to a place whose longitude is 48° 0′ and latitude 46° 0′ (2151) [2071]; and passes to a place whose longitude is 47° 30′ and latitude 48° 30′ (2152) [2072]; and passes and flows into the sea at longitude 51° 0′ and latitude 51° 40′ (2153) [2073].

And six rivers come out of this river and flow into the sea. The first of the rivers: its source is from longitude 48° 45′ and latitude 49° 50′ (2154) [2074]; its mouth is in the sea at longitude 51° 0′ and latitude 49° 0′ (2155) [2075]. And the five rivers: ⟨their mouths⟩ are between the mouth of this river and the mouth of the first, great river, at equal distances, in five parts (2156–2160) [2076–2080].

And there comes out of this first, great river a river, from a place whose longitude is 44° 0′ and latitude 46° 0′ (2161) [2081]; it passes near, below the city of داطه, and passes at the corner of the city of دواسس, and passes at the corner of the city of اكلس, and falls into the river out of which it comes, at longitude 47° 30′ and latitude 45° 0′ (2162) [2082]. p. 143

And there falls into the great river a spring, its beginning is at longitude ⟨34°⟩ ⟨0′⟩ and latitude 46° ⟨15′⟩ (2163) [2083], and its mouth is in the river, touching a city ⟨that has no⟩ name, at longitude 48° 0′ and latitude 46° 50′ (2164) [2084].

And there also falls into this great river a river from a city ⟨that has no⟩ name on the map; ⟨its beginning is⟩ at longitude ⟨34°⟩ ⟨20′⟩ and latitude 45° 45′ (2165) [2085], and its mouth is in the river, also touching a city, at longitude 48° 40′ and latitude 46° 15′ (2166) [2086].

And there falls into the great river also a river from the mountain سورطانا, its beginning is at longitude 40° 15′ and latitude 49° 30′ (2167) [2087], and its mouth is in the river at longitude 42° 0′ and latitude 48° 0′ (2168) [2088].

And there also falls into the great river a spring, its beginning is at longitude 44° 30′ and latitude 48° 10′ (2169) [2089], and its mouth is in the river at longitude 44° 30′ and latitude 46° 0′ (2170) [2090].

And there also falls into the great river a spring, its beginning is at longitude 45° 30′ and latitude 48° 40′ (2171), and its mouth is in the river at longitude 45° 30′ and latitude 46° 0′ (2172). p. 144

And there also falls into the great river a spring, its beginning is at longitude 46° 10′ and latitude 48° 40′ (2173) [2091], and its mouth is in the river at longitude 45° 30′ and latitude 45° 30′ (2174) [2092].

And there also falls into the great river a spring, its beginning is at longitude 46° 10′ and latitude 48° 5′ (2175) [2093], and its mouth is in the river at longitude 46° 40′ and latitude 45° 30′ (2176) [2094].

And there also falls into the great river a spring, its beginning is ⟨at⟩ longitude 46° 40′ and latitude 49° 5′ (2177) [2095]; its mouth is in the river at longitude 47° 30′ and latitude 45° 20′ (2178) [2096].

And there also falls into this river a spring, its beginning is at longitude 44° 30′ and latitude 48° 40′ (2179) [2097], and its mouth is in the river at longitude 50° 30′ and latitude 51° 25′ (2180) [2098].

A spring, its beginning is at longitude 53° 30′ and latitude 45° 50′ (2181), and its mouth is in the sea at longitude 58° 0′ and latitude 46° 40′ (2182).

A spring, its beginning is at longitude 54° 0′ and latitude 45° 50′ (2183), and its mouth is in the sea at longitude 58° 20′ and latitude 46° 40′ (2184).

A spring from the city of اماسب, its beginning is at longitude 57° 20′ ⟨and latitude 45° 0′ (2185) [2099]; and flows into the sea at longitude 58° 40′⟩ and latitude 49° 0′ (2185/1) [2100].

A spring from the city of زيلا, its beginning is at longitude 59° 10′ and latitude 45° 10′ (2186) [2101], and its mouth is in the sea at longitude 60° 5′ and latitude 47° 40′ (2187) [2102]. p. 145

The river Jayḥān, its beginning is a spring at longitude 60° 30′ and latitude 46° 5′ (2188) [1551]; it passes at the corner of the city of سسماى and passes between two mountains at longitude ⟨58°⟩ 0′ and latitude 39° 0′ (2189) [1552]; ⟨it passes to⟩ the city of نوسا ⟨and Zibaṭra⟩, and passes between two mountains at longitude 60° 0′ and latitude 38° 0′ (2190) [1553]; and passes by al-Maṣṣīṣa and flows into the sea between al-Maṣṣīṣa and the mountain al-Lukkām, touching al-Maṣṣīṣa, at longitude 60° 10′ and latitude 35° 40′ (2191) [1554].

A river comes out of the mountain قوقا, its beginning is at longitude 72° 0′ and latitude 47° 30′ (2192), and its mouth is in a marsh, touching the city of طرمى on the side next to the city of اوسه, at longitude 69° 0′ and latitude 52° 30′ (2193).

The river اقسس comes out of the mountain قوقا, its beginning is at longitude 72° 30′ and latitude 47° 0′ (2194), and its mouth is in the marsh, touching the city of طرمى from the other side, at longitude 69° 10′ and latitude 53° 0′ (2195).

The river of Balkh, its beginning is a lake at longitude 100° 30′ and latitude 43° 0′ (2196) [1029 1559]; the size of the lake is one degree. It passes to the corner of a mountain at longitude 102° 0′ and latitude 47° 0′ (2197) [1560]; and turns back to a place whose longitude is ⟨96°⟩ ⟨40′⟩ and latitude 44° 30′ (2198) [1561]; and passes to a place whose longitude is 96° 30′ and latitude 42° 0′ (2199) [1562]; and it comes and cuts through the city of Khwārazm, comes out of it and comes to a place whose longitude is 91° 30′ and latitude 39° 40′ (2200) [1563]; and passes near Balkh and flows into a marsh at longitude 88° 0′ and latitude 39° 10′ (2201) [1564].

And this marsh extends from longitude 86° 30′ (2202) [1030] to longitude 90° 0′ (2203) [1031], p. 146
and in latitude between the mouth of ⟨the river of⟩ Balkh and latitude 42° 0′ (2204) [1032]; and from the mouth of the river of Balkh to its edge on the side next to Khwārazm that side becomes narrow: its longitude on the side next to Khwārazm is 90° 0′, and the latitude there 41° 0′ (2205).

There comes out of the river of Balkh a river, its beginning is at longitude 91° 30′ and latitude 39° 40′ (2206) [1565]; it passes and cuts through a long mountain, and passes between the lower side of the city of Ushrūsana and the city of Khujanda, to a place whose longitude is 92° 30′ and latitude 34° 40′ (2207) [1566]; and passes at the corner of the city of al-Muḥammadiyya, and passes near ⟨the city of⟩ Kirmān, and flows into the sea at longitude 87° 30′ ⟨and latitude 28° 40′⟩ (2208) [1567].

There falls into this river the river سليمس, from a mountain; its beginning is at longitude 88° 0′ and latitude 36° 0′ (2209) [1568], and it flows ⟨into the river⟩ ⟨near⟩ al-Muḥammadiyya at longitude 89° 40′ and latitude 32° 0′ (2210) [1569].

A spring comes out of a mountain at longitude 99° 40′ and latitude 39° 0′ (2211) [1570], and passes near the city of the merchants, and passes to a place whose longitude is 100° 0′ and latitude 41° 30′ (2212) [1571], and passes on and flows into the river of Balkh at longitude 96° 40′ and latitude 44° 30′ (2213) [1572].

And there falls into this spring a river from a spring, its beginning is at longitude 101° 40′ and latitude 39° 20′ (2214) [1573]; it passes touching the city of the merchants and flows into the river of the spring at longitude 100° 0′ and latitude 41° 30′ (2215) [1574]. p. 147

And there also falls into this first spring a river from a mountain, its beginning is at longitude 84/104° 30′ and latitude 47° 5′ (2216) [1575], and its mouth is in the river of the spring at longitude 97° 20′ and latitude 44° 5′ (2217) [1576].

A long river[a], its beginning is a spring at longitude 129° 30′ and latitude 46° 0′ (2218) [1577]; it passes to a place whose longitude is 108° 0′ and latitude 46° 5′ (2219) [1578]; it passes to a place whose longitude is 107° 5′ and latitude 50° 30′ (2220) [1579]; and passes to a place whose longitude is 100° 30′ and latitude 51° 0′ (2221) [1580]; and passes near the city of the Khazars and near the sea, between the sea and the city of Khwārazm, and flows into the marsh of the river of Balkh at longitude 90° 5′ and latitude 41° 30′ (2222) [1581].

And there falls into this river a river from the mountain ارسانا, its beginning is at longitude 99° 0′ and latitude 57° 30′ (2223) [1582], and its mouth is in the great river at longitude 92° 5′ and latitude 45° 5′ (2224) [1583].

And there falls into the great river also a river from the mountain ارسانا, its beginning is at longitude 100° 0′ and latitude 19/59° 5′ (2225) [1584], and its mouth is in the river at longitude 94° 5′ and latitude 46° 5′ (2226) [1585].

And there falls into the great river also a river from the mountain اسقاسا, its beginning is at lon-

[a] نهر طويل, «a long river»; the following paragraphs call it «the great river».

gitude 104° 40′ and latitude 56° 5′ (2227) [1586], and its mouth is in the river at longitude 100° 30′ and latitude 51° 5′ (2228) [1587].

And there falls into the great river also a river from the mountain اسفاسا, its beginning is at longitude 106° 30′ and latitude 54° 5′ (2229) [1588], and its mouth is in the river at longitude ⟨104°⟩ 30′ and latitude ⟨51°⟩ ⟨0′⟩ (2230) [1589].

⟨And there falls⟩ into the great river also a river from the mountain اسفاسا, its beginning is ⟨at longitude⟩ 108° 5′ and latitude ⟨52°⟩ 30′ (2231) [1590], and its mouth is in the river at longitude 107° 20′ and latitude 50° 30′ (2232) [1591]. p. 148

And there also fall into the great river three rivers from a mountain: the source of the first river is ⟨at longitude⟩ 108° 0′ and latitude 48° 30′ (2233), and its mouth is in the river at longitude 103° 10′ and latitude 51° 30′ (2234); the second, its beginning is at longitude 103° 30′ and latitude 47° 30′ (2235), and its mouth is in the river at longitude 104° 30′ and latitude 50° 40′ (2236); and the third, its beginning is at longitude 104° 45′ and latitude 48° 5′ (2237), and its mouth is in the river at longitude 106° 5′ and latitude 50° 20′ (2238).

And there also fall into the great river three rivers from the mountain طغورا: the first of them, its source is at longitude 112° 0′ and latitude 58° 10′ (2239) [1592], and its mouth is in the river at longitude 109° 20′ and latitude 50° 5′ (2240) [1593]; the source of the second is at longitude 114° 5′ and latitude 52° 5′ (2241) [1594], and its mouth is in the river at longitude 112° 10′ and latitude 49° 30′ (2242) [1595]; and the source of the third is at longitude 115° 30′ and latitude 51° 30′ (2243) [1596], and its mouth is in the river at longitude 114° 5′ and latitude 48° 30′ (2244) [1597].

And there falls into this great river a spring, its beginning is at longitude 109° 40′ and latitude 44° 30′ (2245) [1598]; its mouth is in the river at longitude 118° 5′ and latitude 46° 5′ (2246) [1599].

And there falls into the great river also a spring, its beginning is at longitude 124° 30′ and latitude 49° 5′ (2247) [1600], and its mouth is in the river at longitude 123° 0′ and latitude 46° 20′ (2248) [1601].

The river بوخردس, its beginning is a spring at longitude 145° 30′ and latitude 47° 0′ (2249) [1602]; p. 149
it passes to a place whose longitude is 152° 30′ and latitude 51° 30′ (2250) [1603]; and passes and enters between the dam and the mountain of Gog at longitude 168° 30′ and latitude 50° 40′ (2251) [1604], and turns aside to the city of Magog, touching it, to a place whose longitude is 172° 0′ and latitude 62° 0′ (2252); and turns back to a place whose longitude is 172° 0′ and latitude 59° 0′ (2253) [1605]; ⟨then⟩ it returns to a place whose longitude is 175° 0′ and latitude 58° 30′ (2254) [1606], and comes to a place whose longitude is 175° 0′ and latitude 56° 0′ (2255) [1607], and comes to longitude 180° 0′ and latitude 49° 30′ (2256) [1608].

There falls into this river a spring, its beginning is at longitude 147° 30′ and latitude 52° 30′ (2257) [1609], and its mouth is in the river at longitude 152° 40′ and latitude 51° 30′ (2258) [1610].

And there falls into this first river a river from the mountain اسمريا, its beginning is at longitude 158° 0′ and latitude 58° 30′ (2259) [1611], and its mouth is in the river at longitude 158° 30′ and latitude 51° 0′ (2260) [1612].

The rivers and the springs beyond the seventh clime

Of them, ⟨in⟩ the island of بوبارنيا:

A spring, its beginning is at longitude 10° 45′ and latitude 58° 20′ (2261) [2103], and its mouth is in the sea at longitude 9° 0′ and latitude 59° 0′ (2262) [2104].

A spring, its beginning is at longitude 11° 40′ and latitude 58° 40′ (2263) [2105], and its mouth is in the sea at longitude 10° 30′ and latitude 59° 40′ (2264) [2106].

A spring, its beginning is at longitude 12° 10′ and latitude 58° 10′ (2265) [2109], and its mouth is in the sea at longitude 18° 40′ and latitude 58° 45′ (2266) [2110]. p. 150

A spring, its beginning is at longitude 12° 10′ and latitude 58° 10′ (2267) [2111], and its mouth is in the sea at longitude 12° 15′ and latitude 57° 30′ (2268) [2112].

A spring, its beginning is at longitude 12° 30′ and latitude 59° 30′ (2269), and its mouth is in the sea at longitude 14° 30′ and latitude 59° 20′ (2270).

A spring, its beginning is at longitude 12° 40′ and latitude 59° 45′ (2271) [2113], and its mouth is in the sea at longitude 18° 20′ and latitude 61° 30′ (2272) [2114].

A spring, its beginning is at longitude 14° 5′, latitude 60° 5′ (2273) [2115], and its mouth is in the sea at longitude 15° 5′ and latitude 60° 5′ (2274) [2116].

The springs and the rivers that are in the island of الوبا:

A spring, its beginning is at longitude 19° 10′ and latitude 57° 10′ (2275) [2117], and its mouth is in the sea at longitude 18° 5′ and latitude 52° 30′ (2276) [2118].

A spring, its beginning is at longitude 19° 20′ and latitude 58° 30′ (2277) [2119], and its mouth is in the sea at longitude 17° 10′ and latitude 58° 30′ (2278) [2120].

A spring, its beginning is at longitude 19° 45′ and latitude 56° 5′ (2279) [2121], and its mouth is in the sea at longitude 19° 30′ and latitude 52° 30′ (2280) [2122].

⟨A spring⟩, its beginning is at longitude 21° 5′ and latitude 58° 30′ (2281) [2123], and its mouth is in the sea at longitude 18° 30′ and latitude 58° 5′ (2282) [2124].

A spring touching the city بطربطسوں, at longitude ⟨20°⟩ ⟨50′⟩ and latitude 59° 30′ (2283) [2127]; it enters the city and flows into the sea at longitude 21° 50′ and latitude 59° 10′ (2284) [2128]. p. 151

A river comes out of the city of اونطا, its beginning is at longitude 21° 15′ and latitude 57° 10′ (2285) [2129]; it passes below the city of افدوں and flows into the sea at longitude 21° 0′ and latitude 54° 20′ (2286) [2130].

A spring, its beginning is at longitude 22° 5′ and latitude 59° 40′ (2287) [2131], and its mouth is in the sea at longitude 20° 40′ and latitude 61° 15′ (2288) [2132].

A spring, its beginning is at longitude 28° 10′ and latitude 60° 5′ (2289), and its mouth is in the sea at longitude 24° 0′ and latitude 61° 0′ (2290).

A spring, its beginning is at longitude 28° 45′ and latitude 59° 40′ (2291) [2133], and its mouth is in the sea at longitude 24° 0′ and latitude 61° 0′ (2292) [2134].

A spring from the city of فاطرطن, its beginning is at longitude 25° 10′ and latitude 60° 40′ (2293) [2135], and its mouth is in the sea at longitude 27° 0′ and latitude 59° 40′ (2294) [2136].

A spring from the city of طامی, its beginning is at longitude 25° 10′ and latitude 59° 20′ (2295) [2137], and its mouth is in the sea at longitude 27° 20′ and latitude 58° 45′ (2296) [2138].

A spring, its beginning is at longitude 28° 40′ and latitude 59° 40′ (2297) [2139], and its mouth is in the sea at longitude 27° 5′ and latitude 59° 40′ (2298) [2140].

A spring, its beginning is at longitude 30° 20′ and latitude 59° 50′ (2299) [2141], and its mouth is in the sea at longitude 30° 40′ and latitude 60° 30′ (2300) [2142].

A spring in the island of ثولی, its beginning is at longitude 27° 20′ and latitude 68° 20′ (2301) [2143]; it passes at the corner of the city of اثلی and flows into the sea at longitude 31° 5′ and latitude 62° 30′ (2302) [2144]. p. 152

A spring, its beginning is at longitude 21° 30′ and latitude 48° 40′ (2303), and its mouth is in the sea at longitude 18° 20′ and latitude 49° 15/55′ (2304).

A spring, its beginning is at longitude 21° 30′ and latitude 50° 5′ (2305), and its mouth is in the

sea at longitude 18° 0′ and latitude 50° 15/55′ (2306).

A spring from the city of درقطر, its beginning is at longitude 28° 30′ and latitude 49° 45′ (2307) [2145], and its mouth is in the sea at longitude 22° 20′ and latitude 52° 35′ (2308) [2146].

A spring, its beginning is at longitude 25° 40′ and latitude 52° 10′ (2309); its mouth is in the sea at longitude ⟨24°⟩ 30′ and latitude 54° 30′ (2310).

The river ماسوس, its beginning is at longitude 38° 0′ and latitude 51° 40′ (2311) [2147]; its mouth is in the sea at longitude 30° 30′ and latitude 58° 0′ (2312) [2148].

The river عاوس, its beginning is at longitude 41° 30′ and latitude ⟨52°⟩ 0′ (2313) [2149]; it passes touching the mountain مللاو, and its mouth is in the sea at longitude 32° 0′ and latitude 59° 0′ (2314) [2150].

A spring from the mountain اسمسورقيون, its beginning is at longitude 39° 50′ and latitude 56° 40′ (2315) [2151]; its mouth is in the sea at longitude 38° 0′ and latitude 58° 20′ (2316) [2152].

A spring from this mountain also, its beginning is at longitude 40° 0′ and latitude 56° 0′ (2317) [2153]; it passes to the place whose longitude is 35° 45′ and latitude 53° 20′ (2318) [2154]; then it passes to the city of اراساسا, enters it and comes out of it at longitude 39° 40′ and latitude 60° 30′ (2319) [2155], and its mouth is in the sea at longitude 38° 40′ and latitude 61° 30′ (2320) [2156].

A spring from this mountain also, its beginning is at longitude 42° 40′ and latitude 55° 45′ (2321) [2157], and its mouth is in the sea at longitude 41° 5′ and latitude 58° 0′ (2322) [2158]. p. 153

The river اسطولس from the mountain سرطاميفا, its beginning is at longitude 43° 5′ and latitude 52° 5′ (2323) [2159]; its mouth is in the sea at longitude 47° 0′ and latitude 58° 30′ (2324) [2160].

The river الفسلس, its beginning is at longitude 48° 45′ and latitude 50° 10′ (2325) [2161]; its mouth is in the sea at longitude 51° 30′ and latitude 51° 50′ (2326) [2162].

A river from a mountain, its beginning is at longitude 47° 5′ and latitude 55° 20′ (2327); its mouth is in the sea at longitude 49° 0′ and latitude 58° 30′ (2328).

A spring in the island of فذنا, its beginning is at longitude 43° 20′ and latitude 59° 50′ (2329) [2163], and its mouth is in the sea at longitude 46° 0′ and latitude 59° 40′ (2330) [2164].

A spring that comes to the marsh راستاس, its beginning is at longitude 59° 40′ and latitude 56° 20′ (2331) [2165], and its mouth is in the marsh at longitude 51° 0′ and latitude 54° 10′ (2332) [2166].

And the size of the marsh is half a degree, and its centre is at longitude 51° 30′ and latitude 58° 50′ (2333) [1034].

And there also falls into this marsh a spring, its beginning is at longitude 52° 20′ and latitude 55° 5′ (2334) [2167], and its mouth is in the marsh at longitude 51° 30′ and latitude 54° 10′ (2335) [2168].

A river that flows into the sea comes out of this marsh; ⟨its beginning is⟩ at longitude 51° 30′ and latitude 58° 30′ (2336) [2169], and its mouth is ⟨in⟩ the sea at longitude 51° 0′ and latitude 58° 40′ (2337) [2170].

Out of the river of this spring there comes a river, its beginning is at longitude 51° 10′ and latitude 57° 30′ (2338) [2171], and its mouth is in the sea at longitude 58° 0′ and latitude 59° 0′ (2339) [2172]. p. 154

A spring ⟨in⟩ the island of ارماوس of the women, its beginning is at longitude 52° 20′ and latitude 60° 40′ (2340) [2173], and its mouth is ⟨in⟩ the sea at longitude 57° 30′ and latitude 64° 0′ (2341) [2174]. Out of the river of this spring there come two rivers: the first of them, its source is at longitude 52° 40′ and latitude 61° 30′ (2342) [2175], and its mouth is in the sea at longitude 58° 20′ and latitude ⟨58°⟩ 0′ (2343) [2176]; and the source of the second river is at longitude 54° 30′ and latitude 62° 30′ (2344) [2177], and its mouth is in ⟨the sea⟩ at longitude 54° 10′ and latitude 64° 10′ (2345) [2178].

A spring in the island of امراوس of the men, its beginning is at longitude 54° 40′ and latitude 65° 40′ (2346) [2179]; its mouth is in the sea at longitude 50° 0′ and latitude 68° 0′ (2347) [2180]. Out of the river of this spring there come two rivers whose beginning is one place, at longitude 52° 30′ and latitude 65° 0′ (2348) [2181]; the mouth of one of them is in the sea at longitude 50° 30′ and latitude 65° 0′ (2349) [2182], and the mouth of the other in the sea at longitude 58° 40′ and latitude 66° 30′ (2350) [2183].

Two rivers from a mountain: the source of one of them is at longitude 54° 0′ and latitude 56° 30′ (2351) [2184], and its mouth is in the sea at longitude 54° 0′ and latitude 59° 10′ (2352) [2185]; and the source of the second river is at longitude ⟨54°⟩ ⟨10′⟩ and latitude 56° 30′ (2353) [2186], and its mouth is in the sea at longitude 57° 40′ and latitude 59° 25′ (2354) [2187]. p. 155

And four rivers come to the marsh from a mountain. ⟨And the first river⟩: its source is ⟨at longitude⟩ ⟨58°⟩ 10′ and latitude 58° 10′ (2355) [2188], and its mouth is in the marsh at ⟨longitude 58° 45′ and latitude 54° 20′⟩ (2356) [2189]. ⟨And the⟩ fourth ⟨river⟩: its source is from longitude 58° 10′ and latitude 54° 30′ (2357) [2190]; its mouth is in the sea at longitude ⟨58°⟩ ⟨45′⟩ and latitude 55° 20′ (2358) [2191]. And the two other rivers lie between them, at equal distances in longitude and latitude, so that there are four equal, straight rivers.

A spring that comes to this marsh ⟨also; its beginning is⟩ at longitude 56° 40′ and latitude 56° 50′ (2359) [2192], and its mouth is in the marsh at ⟨longitude 62° 0′⟩ and latitude 56° 30′ (2360) [2193].

The river طابس, its beginning is from a spring at longitude 68° 30′ and latitude 60° 20′ (2361) [2194]; it passes to the corner of the city of سورس and turns back and flows into the marsh at longitude 66° ⟨30′⟩ and latitude 57° 30′ (2362) [2195]. A river comes out of this river, its beginning is at longitude 68° 0′ and latitude 58° 0′ (2363) [2196], and its mouth is in the marsh at longitude 67° 30′ and latitude 57° 20′ (2364) [2197].

The river مرونس comes out of the mountain افقا, its beginning is at longitude 72° 40′ and latitude 56° 30′ (2365) [2198], and its mouth is in the marsh at longitude ⟨69°⟩ ⟨40′⟩ and latitude 55° 50′ (2366) [2199].

The river بوفاس from the mountain افقا ⟨also⟩, its beginning is at longitude 72° 30′ and latitude 56° 0′ (2367) [2200], and its mouth is in the marsh at longitude 69° 30′ and latitude 55° 20′ (2368) [2201].

The river اسطس from the mountain افيما ⟨also⟩, its beginning is at longitude 72° 30′ and latitude 55° 30′ (2369) [2202], and its mouth is in the marsh at ⟨longitude 69° 30′⟩ and latitude 54° 45′ p. 156
(2370) [2203].

The river اطفطيس from the mountain افينا ⟨also⟩, its beginning is at longitude 78° 0′ and latitude 54° 0′ (2371) [2204], and its mouth is in the marsh at longitude 69° 30′ and latitude 54° 20′ (2372) [2205].

The river انحارس from the mountain افما ⟨also⟩, its beginning is at longitude 74° 0′ and latitude 58° 30′ (2373) [2206], and its mouth is in the marsh at longitude 69° 0′ and latitude ⟨53°⟩ ⟨55′⟩ (2374) [2207].

Two rivers come out of this marsh. The beginning of one of them is at longitude 62° 0′ and latitude ⟨56°⟩ ⟨30′⟩ (2375) [2208]; it passes ⟨and cuts through⟩ the mountain دقيا, and passes on and flows into ⟨the sea⟩ at ⟨longitude⟩ 59° 20′ and latitude 60° 20′ (2376) [2209]. And the second river, its beginning is at longitude 68° 0′ ⟨and latitude 57° 40′⟩ (2377) [2210]; it passes and cuts through the mountain دقيا, and passes on and flows into the sea at longitude 60° 30′ and latitude 60° 30′ (2378) [2211].

Two rivers come out of the mountain فوقا, ⟨pass by⟩ the city of طرمى ⟨touching it⟩, and both flow into the marsh; and the city is on the marsh.

⟨This⟩ marsh: its beginning is from longitude 58° ⟨45′⟩ (2379) [1035] ⟨to longitude⟩ ⟨59°⟩ 40′ (2380) [1036]. It begins from the place of the channel of the four rivers, in the measure of the breadth p. 157

of the four ⟨rivers . . . . .⟩ the two sides, until it comes to that one of its sides which is next to the sea, at longitude 68° 30′ ⟨and latitude 52° 30′⟩ (2381); ⟨then⟩ the marsh ⟨turns⟩ and passes by the city of طرمى, and passes ⟨by the five rivers⟩ whose mouth is at longitude 69° 0′ (2382) and whose beginning is from the mountain افقا, until it reaches the corner of the city of ⟨طاس⟩; then it passes to a place whose longitude is 68° 40′ and latitude 57° 40′ (2383), and passes to a place whose longitude is 62° ⟨0′⟩ and latitude 55° 30′ (2384) [1037]; then it passes to a place below the channel of the four rivers. Then two rivers come out of it between the two seas, and their mouths are in the Sea of the North. And this is the picture of that.

⟨The river را: its beginning is from a mountain at longitude 72° 20′ and latitude 60° 30′⟩ (2385) [2212]; ⟨it passes to a place⟩ whose longitude is 81° 30′ and latitude ⟨58° 30′⟩ (2386) [2213]; and passes to a place whose longitude is 75° 40′ and latitude ⟨57°⟩ ⟨20′⟩ (2387) [2214]; ⟨and passes and strikes⟩ one of the two towers ⟨that⟩ Dhū l-Qarnayn ⟨built⟩, and passes on and flows into the sea at longitude ⟨81°⟩ 10′ and latitude 49° 20′ (2388) [2215].

⟨And there falls into⟩ this river a river from a mountain, its beginning is at longitude 92° 30′ and latitude 61° 0′ (2389) [2216], and its mouth is in the river at longitude 81° 30′ and latitude 58° 30′ (2390) [2217].

p. 158

Two rivers from the mountain فرمانيا: the beginning of one of them is at longitude ⟨78°⟩ ⟨0′⟩ and latitude 51° 0′ (2391) [2218], and its mouth is in the sea at longitude 79° 30′ and latitude 48° 30′ (2392) [2219]; and the source of the second is at longitude 78° 40′ and latitude 51° 30′ (2393) [2220], and its mouth is in the sea at longitude 80° 40′ and latitude ⟨49°⟩ ⟨0′⟩ (2394) [2221].

A river from the mountain روميقا, its beginning is at longitude 88° 0′ and latitude 57° 0′ (2395) [2222], and its mouth is in ⟨the sea⟩ at longitude 84° 0′ and latitude 50° 20′ (2396) [2223].

A river from the mountain زوميفا, its beginning is at longitude 89° 0′ and latitude 56° 45′ (2397) [2224], and its mouth is in the sea at longitude 85° 30′ and latitude 51° 0′ (2398) [2225].

There falls into it a river from the mountain روميفا, its beginning is at longitude 91° 0′ and latitude 56° 5′ (2399) [2226], and its mouth is in the river at longitude 88° 0′ and latitude 54° 0′ (2400) [2227].

And there falls into the first river also a river from the mountain ارسانا, its beginning is at longitude 97° 0′ and latitude 56° 0′ (2401) [2228], and its mouth is in the first river at longitude 87° 20′ and latitude 58° 0′ (2402) [2229].

The book is finished

p. 159

Contents

The cities on the globe of the inhabited earth

	page
The cities that are beyond the equator	3
The cities that are in the first clime	4–8
The cities that are in the second clime	8–11
The cities that are in the third clime	11–15
The cities that are in the fourth clime	15–23
The cities that are in the fifth clime	23–28

The cities that are in the sixth clime 28–32

The cities that are in the seventh clime 33–34

The cities that are beyond the seventh clime to latitude sixty-three 35–37
