Die astronomischen Tafeln des Muḥammed ibn Mūsā al-Khwārizmī

in der Bearbeitung des Maslama ibn Aḥmed al-Madjrīṭī und der lateinischen Uebersetzung des Athelhard von Bath

edited by H. Suter on the preliminary work of A. Bjørnbo and R. Besthorn
(Copenhagen: A. F. Høst & Søn, 1914)

the Wellcome Library copy, Internet Archive b24872489, JP2 images 0000–0295

the Latin text and tables of the recension, line by line

The Arabic *Zīj al-Sindhind* of Muḥammad ibn Mūsā al-Khwārizmī is lost. Suter's book edits a derivative line of it: the recension of Maslama ibn Aḥmad al-Majrīṭī, in the Latin translation ascribed to Adelard of Bath (twelfth century). It is not al-Khwārizmī's text. The book is transcribed in two files: the Latin text and tables of the recension, with the editor's apparatus, and Suter's German matter, his foreword, introduction, commentary, corrections, glossary and index, with the pages that carry no text.

Every printed line of the book is one line here, in the order of the images of the Wellcome copy (Internet Archive b24872489), with its number in the margin and its anchor AK07-J####-L## (JP2 image, line); the lines of the footnotes follow below a short rule with the anchors N##. The text is transcribed letter for letter as printed, with its punctuation, italics and spaced type, and the words divided at the ends of the lines. The folios of the manuscripts that the edition prints in the margin are set in the margin. Bookplates, stamps, shelfmarks and notes written in this copy are recorded in the page records, not reproduced. Where the print is in error, the transcription keeps it; the critical notes at the end, which are not part of the transcription, propose the correction.

The Latin text and Suter's edition are in the public domain, and this transcription is dedicated to the public domain (CC0 1.0). It is AI-integrated work (Claude); no person has proofread it. This file holds 5230 printed lines and 1127 lines of the footnotes from 154 images.

Incipit ezich Elkaurezmi per Athelardum Bathoniensem ex arabico sumptus[1]).

M 82[r], C 41[r]
O 99[v], N 8[r]

Liber iste septem planetarum atque draconis statum[2]) continet a meridie quartae feriae[3]) usque ad meridiem quintae feriae[4]) determinatum. Secundum hoc et[5]) in ceteris feriis idem convenit, a meridie[6]) scilicet praecedentis usque ad meridiem[7]) sequentis[8]). Quoniam enim meridies quartae feriae[9]) initium fuit elhigere[10]) mensisque[11]) elmuharram[12]), ideo et ab eo[13]) ezich[14] sumpsit exordium[15]).

Posita[16]) itaque est in hoc volumine ab *Elkaurezmo*[17]) examinatio planetarum et temporum secundum medium[18]) locum terrae dictum[19]) Arin[20]), a quo quidem ad[21]) quatuor mundi terminos aequalis habetur distantia, nonaginta videlicet gradus secundum quartam circuli partem[22]). Omnes enim[23]) terrae[24]) regiones describere omniaque tempora determinare et taediosum esset[25]) et inexplicabile, quare[26]) pro temporibus innumeris meridies, pro terris infinitis Arin[27]) annotata sunt, eo scilicet tenore, ut ab hac radice per regulas geometricales et arithmeticas ceteras[28]) regiones et tempora determinare non sit difficile.

Interim itaque id a lectore postulatum sit, ut si harum artium immunis accesserit, quicquid in his computationum lineis secundum regulas subscriptas[29]) inciderit,

C) diei exigunt. — [33]) Athofen] CM, atophen N. — [34]) elkarnain] CM, elcarnein N. — [35]) $\overline{\text{II}}$DCCXCIII] N, IIDCCXCIII M, DCCXCIII C. — [36]) Acofra] C, Cofra M, aszofra N. — [37]) era] N, eris CM. — [38]) autem] *om.* M. — [39]) domini] *om.* M. — [40]) supra dictum] suprascriptum N. — [41]) utilitati] utilitat C.

quam ab eo quidem anno quo hic liber in nostrum sermonem translatus est usque in[1]) tempora infinita ex annis quotlibet romanis et mensibus cum diebus annorum et mensium et dierum arabicorum aequalitas sumi queat. Huiusce ergo tabulae[2]) introitus talis est : Cum enim quotus sit ab elhigera[3]) annus vel mensis vel dies quaeris, per annos domini secundum trigenarium collectos in annos arabum sibi adiunctos intrandum erit, adiunctumque notandum ; deinde per annos eiusdem planos in suum item adiunctum ipsumque servandum, similique modo in mensibus. Quibus omnibus simul collectis minora in maiora reducenda sunt, quotiens autem menses XII in annum reducuntur, totiens VI dies dierum numero addendi sunt. Quod[4]) si menses annum non complentes remanserint, pro uno quidem[5]) nichil, pro duobus vero dies unus, pro tribus item[6]) unus, pro quatuor duo addendi sunt[7]). Sic igitur et annos et menses et dies arabum romanis annis cum mensibus et diebus aequatos habebis][8]).

M 84^{r} **Cap. 3. De numerorum praescriptionibus.**

N 10^{r} His hactenus explicatis hoc etiam addendum est, ut quoniam fere omnes huius libri tabulae[9]) nomine mensium vel annorum planorum[10]) vel annorum collectorum[11]) arabicorum praetitulatae sunt, quid sibi velit haec praesignatio intimetur.

Considerantes itaque philosophi planetarum rotas, rotarum deinde circumferentias, rotasque in signa, signa in gradus, gradus in dakaicas[12]), dakaicas[12]) in secundas[13])

O 159[r] dividentes, quantum[14]) istarum portionum[15]) | singuli planetae singulis temporibus peragrent[16]), determinare intenderunt. Quare et tempus dividendum esse, annum itaque[17]) in menses, menses in dies, dies in horas, horas in dakaicas[18]) diviserunt. Habentes itaque[19]) quot annis sive[20]) mensibus quisque planetarum rotam suam peragret[21]), ab annis ad menses, a mensibus ad[22]) dies, a diebus ad horas, ab horis ad[22]) dakaicas[23]) pervenerunt. Itemque habita anni unius ratione ab uno anno usque ad XXX ascenderunt. Habentes igitur[24]) quid planetae supradicti annis XXX percurrant[25]), addendo[26]) XXX super XXX usque ad LX, sicque in[27]) infinita annorum et[28]) mensium et[29]) dierum et horarum spatia stellarum motus dimensi sunt. Hac itaque ratione et dakaicis[30]) horarum et ipsis horis et diebus et mensibus et annis planis[31]) et annis collectis in prima linea praescriptis consequenter secundum ipsorum[32]) planetarum meatus signa et[33]) gradus et dakaicas[34]) et secundas[35]) ad-

O 159^{v}, C 42^{v}, N 11^{v}

Cap. 5. De anni bissextilis inventione.

Ratio inveniendi annum bissextilem, quotaque feria[1]) quilibet[2]) romanorum mensis introeat[3]), secundum tabulas sequentes[4]) haec est. Per annos arabum[5]) collectos, deinde per planos in annos Alexandri[6]) eis adiunctos, similiterque per menses arabum in sua adiuncta[7]) ; collecta itaque hac summa minora in maiora reducentur, partes scilicet in dies, dies[8]) in menses, menses in annos. Quoniam autem menses subscripti[9]) secundum continentiam XXX dierum annotati sunt, ideo quotiens XII menses in annum[10]) reducimus, totiens ab ipsa reductionis summa quinque dies[11]) et quartam subtrahemus[12]). Duodecim enim in XXX ducti non amplius quam CCCLX producunt. Annus vero[13]) romanorum CCCLXV dies et quartam continet. Hac itaque summa perpensa[14]) ab octobre[15]) usque ad mensem praesentem computandum est, et quot dies supra XXX mensibus ipsis[16]) ascripti sunt, totidem ab hac summa auferendi sunt. Si vero februarius qui[17]) XXVIII dierum est interciderit, supradictae summae propter eum[18]) duo dies addendi sunt. Sicque patebit et praesens mensis romanorum et dies[19]). Hoc ergo modo directa summa ab ea ipsa XXVIII[20]) anni detrahendi[21]), quotiens ab ea detrahi possunt. Ut autem huius detractionis[22]) labor minuatur, subiecta est tabula secundum XXVIII numerum[23]) coacervata. Eum itaque numerum, quem in hac tabula[24]) summae praedictae proximum eorum qui infra eam sunt[25]) reperies, ab ipsa summa auferes, et quod residuum fuerit memoriter teneto[21]).

Secundum hoc igitur residuum in tabulam bissextorum quos arabes *kebicen* vocant, intrato[27]), et quomodo bissextus ad annum praesentem se habeat apparebit. Mensis quoque quilibet, quota feria incipiat, non latebit[28]).

Certitudo autem tabularum negotii praesentis primo mensium, deinde annorum planorum, postremo annorum collectorum haec est. Quoniam enim menses arabum, qui post annos planos positi sunt, in annos planos mensesque[29]) solares[30]), quorum unusquisque, ut dictum est, XXX dierum est[31]), reducendi sunt[32]), ideo primo mensi

lunari[33]), qui et ipse XXX dierum est[34]), unitas adiuncta est[35]). Secundo vero unitas ex praecedente et XXIX[36]) dies ex se ipso annotantur. Secundum hanc igi-

N1 [1]) quotaque feria] qua etiam die O. — [2]) quilibet] quelibet M, quislibet O. — [3]) introeat] intret

tota reduces, ab ultimis videlicet secundis incipiens.

Quod si ex hac reductione XII accreverint signa, illis abiectis[1]) si quid signorum reliquum fuerit subnotabis. Alioquin[2]) loco ipsorum XII scribes figuram[3]) cifrae τ[4]). Similiter quoque et de ceteris.

Totum itaque residuum illud subnotatum, ipsius planetae erit elwacat secundum meridiem terrae *Arin*, iuxta quam haec institutio facta est.

Deinde autem loci tui longitudinem longitudini terrae *Arin*, quae est XC graduum, detrahe, eiusque reliqui[5]) pro quibusque XV gradibus horam numerato.

Quod autem ad XV non attinget in quaternarium ducito eritque qui producetur momentorum[6]) numerus.

Cum illis ergo horis item intrabis, itidemque cum his momentis in tabulam *elwacat*. Quod autem illic quodque istic[7]) inveneris, supra *elwacat* qui erat secun-

dum *Arin*[8]) adde, si fuerit locus tuus ex parte occidentali, sin autem ex orientali[9]), idem eidem subtrahe. Sic igitur cuiuslibet planetae status medialis secundum meridiem loci tui perpensus erit.

right column

similiter et mensium et dierum et horarum et partium, eorumque adiuncta sumendo, primo signis signa, gradus gradibus, dakaicas dakaicis et secundas secundis dando, deinde secundas ad dakaicas, dakaicas ad gradus, gradus ad signa reducendo.

Quod ex his reductionibus residuum fuerit reponetur. Ut si LXX fuerint secundae, X remanebunt, si LXX dakaicae, item X, si vero XL gradus, X recte restabunt, Si vero ex hac reductione XII accreverint signa, ea negligemus. Quod enim restabit ipsum cuiuscunque planetae, eius dico quem investigamus, erit medialitas secundum meridiem diei praesentis et terrae *Arin*, iuxta quam haec institutio facta est.

Quod si ab ea secundum longitudinem quidem (?) removemur, spatium quod inter nostrum locum fuerit et terram *Arin* notandum est. Perpenso ergo quot gradibus vel etiam dakaicis locus noster ab *Arin* distet, singulis quidem XV gradibus hora danda est.

Quod autem ad XV non attingit, ducetur in quaternarium, fiuntque horarum momenta.

Quod itaque horarum ex his omnibus collectum fuerit, hoc inter nostrum meridiem et meridiem terrae *Arin* habendum est. Callendumque quia si locus praesens ex parte orientali fuerit, inter ipsorum planetarum quantum ad praedictas horas meridiei terrae Arin subtrahendum est, quod si ex parte occidentali, addendum. Sicque status planetarum secundum meridiem loci nostri perpensus est.

XII[a] quaesiti indicium[1]). Noctis vero sic : Arcu quoque diei a CCCLX gradibus subtracto residuoque secundum XII diviso, ipsius[2]) XII[a] horae nocturnae quantitatem[3]) metietur[4]).

Cap. 26[a]. [De ortu signorum in qualibet regione secundum aequinoctialem circulum.

Ut autem in qualibet regione latitudine non carente differentiam ortus signorum quantum ad circulum aequinoctialem scias, tabula id ipsum determinans supposita est, cuius usus talis est : Primo quidem umbra arietis in praesenti regione notanda est ; deinde per quemlibet gradum in paginam differentiarum intrandum, eiusque adiunctum in umbram praedictam ducendum, atque inde producti arcus inveniendus. Erit igitur ille arcus significans minorationem arietis quantum ad circulum aequinoctialem pro gradu quidem introducente ; similiter etiam et piscium ; librae vero atque virginis additionem. Sequuntur autem arietem cum piscibus in diminutione, licet dissimili, taurus et aquarius, libram vero cum virgine scorpius et leo additione sed dissimili. Sequuntur item taurum cum aquario diminutione sed dissimili gemini et capricornus, scorpium vero cum leone additione sed dissimili cancer et sagittarius. Sicut enim donat aries sua tempora librae, sic cetera quinque suis oppositis, quod retinere nequeunt dimittunt.][5])

Cap. 28. Quomodo per artifa solis cuiuslibet corporis umbra elmustewia perpendatur.

Per *artifa* itaque, id est[6]) diurnam altitudinem solis, in *elgeib* intrandum est[7]), deinde ipsum *artifa* a XC minuendum, quodque residuum fuerit, per ipsum in *elgeib* secundo intretur[8]). Atque hoc idem[9]) *elgeib secundum* in duodenarium[10]) ducatur, totaque summa[11]) secundum *elgeib primum* dividatur. Quod si dakaica interfuerit, ipsa ducatur in sexagenarium[12]), quae summa item ut superior dividatur[13]), diceturque huius dividentis[14]) numerus aequalis numero digitorum corporis in umbra contentorum[15]), quolibet corpore in XII digitos diviso[16]).

Cap. 28[a]. Quomodo per umbram artifa solis perpendatur. C 75[v]

Cum autem per umbram *artifa* investigaveris[17]), umbra quidem in se ipsam ducenda erit, atque inde producto[18]) CXLIIII addenda sunt[19]), totiusque[20]) summae

---

N1 [1]) qua . . . . indicium] C, inveniri doceatur. Notandum vero praesentis arcus quotus gradus occupetur, quod quidem per tabulam ortuum praesentis regionis perpenditur ; deinde ipsa occupatio secundum XII dividenda, eritque duodecima illius quod quaeris significativa O. — [2]) ipsius] ipsa C. — [3]) quantitatem] quantitatum C. — [4]) Arcu . . . . metietur] C, Quod enim diei arcus occupat a CCCLX subtrahendum, residuumque secundum XII dividendum ; eius igitur duodecima gradus horae designat O. — [5]) *Quae in uncis inclusa om.* C. — [6]) id est] O, idem C. — [7]) est] C, *om.* O. — [8]) intretur] C, introducamur O. — [9]) Atque hoc idem] O, Postea vero ipsum C. — [10]) duodenarium] O, XII C. — [11]) totaque summa] O, denique ipsum productum C. — [12]) sexagenarium] O, LX C. — [13]) dividatur] C, ducatur O. — [14]) diceturque huius dividentis] diceturque huius ⟨*lacuna*⟩ O ; Huius itaque partitionis unius dividentis C. — [15]) in umbra contentorum] O, umbram numerantium divisio C. — [16]) digitos diviso] O, aequales partes quae digiti nuncupantur C. — [17]) investigaveris] O, investigaveritis C. — [18]) producto] O, productum C. — [19]) sunt] O, erit itaque C. — [20]) totiusque] O, totius C.

elgidher[1]), id est quadrati latus, notabitur, eritque hoc *elgidher* huius[2]) ipsius umbrae diametros. Deinde vero umbra ipsa in LX ducenda erit, atque inde productum secundum diametrum praedictam[3]) dividendum, dividentisque[4]) arcus inveniendus, arcusque inventus[5]) a XC subtrahendus ; residuum igitur *artifa* quod quaeris[5a]) ostendet.

Cap. 28[b]. Quomodo per artifa solis umbra elmankuz[6]) perpendatur.

O 133[r] Per ipsum itaque[7]) *artifa* in semitam *elgeib* introduceris. Itemque *artifa* idem[8]) a XC subtrahetur[9]), atque per residuum in semitam *elgeib* item[10]) intrabitur[11]). Deinde *elgeib primum* in duodenarium[10a]) ducetur, atque inde productum supra[12]) *elgeib secundnm* dividetur[13]). Quod si dakaicae interfuerint, ipsae in sexagenarium ducentur[14]), cuius summa ut supra dicta dividetur[15]) ; sicque in dividente habebimus et digitos et dakaikas *umbram elmankuz* significantes[16]).

Introitus itaque in tabulam[17]) umbrarum subscriptam hic est : per quodlibet enim solis[18]) *artifa* in tabulam ipsam[19]) introductis[20]) adiunctum illius umbram ostendet[21]).

Cap. 29. De elbuht et inventione eius.

C 76[r], O 133[v] Deinceps vero de *elbuht* dicendum est, quod quidem quantum ad nominis interpretationem *stupor* dici potest. Dicitur autem *elbuht* spatium circuli, quod quilibet planetarum[22]) quantolibet peragrat tempore. Quod equidem hoc modo deprehenditur : Examinato[23]) loco cuiuslibet planetae secundum diem praesentem, iterumque[24]) secundum sequentem, differentiaque locorum illorum considerata, quantum *elbuht* ipsi planetae ad tempus unius diei pertineat[25]), apparebit. Non dissimiliter quoque horarius vel momentaneus cuiusvis[26]) planetae stupor reperiri potest.

Cap. 30. De quantitate rotae solis[27]).

Nunc autem de quantitate rotae solis considerandum est. Et pro diei quidem spatio stupor solis in XXXIII[28]) dakaicas ducendus erit[29]) ; quod autem[30]) inde

Cap. 33. Quomodo defectus solis et lunae notari debeat[1]).

Quoniam ex his quae superius tractata sunt, quando et[2]) ubi coniunctio vel oppositio solis et lunae contingat, praesto est inveniri[3]), a modo ad eorundem defectus notandos res ammonet edoceri. Primum itaque utpote[4]) propinquiore de luna agendum censeo[5]). Notata itaque luminum coniunctione et oppositione[6]) secundum idem tempus[7]), necnon latitudinis argumento[8]) ut praedictum est, eorum ordine singulariter sigillato ; per ipsum idem argumentum defectus utrum futurus sit necne conicietur. Si enim nos introducere in semitas defectus aptum[9]) fuerit, introducat[10]), et introductis[11]) defectus et[12]) qualitatem atque etiam moram ostendet ; si vero non, nec hoc nec illud nec defectus futurus est[13]). Per aptum[14]) itaque in tabulam eclipsis introeatur[15]), eius autem[16]) adiunctum primo[17]) quidem ipsum defectum et defectus quantitatem ponet[18]) ; iuxta hoc quod[19]) diametros quidem umbrae in XX dividitur digitos, digitus vero[20]) in LX dakaicas[21]), diametros vero lunae in XII digitos divisa est ; secundo vero qualitatem et moram[22]) determinat. Omnis enim eclipsis vel partialis vel totalis est ; partialis autem apud a r a b e s dum ingreditur *elzukut*[23]), apud nos vero casus dicitur[24]) ; cum vero ab umbra exit, *elingile*[25]), quod a nobis respiratio[26]) dici potest. Totalis autem apud eos quidem *elmukdh*[27]), id est mora dicitur, interim dico, dum tota obscuratur. Cetera[28]) enim vel casus vel respiratio dicenda sunt. In supposita autem tabula[29]) tam casus quam morae tempora per *dakaicas*[30]) et *elthenias*[31]) horarum[32]) determinata sunt. Calle autem, ut si luna in spatio remoto fuerit, tabulam spatii remoti tractes, si vero in spatio propinquo, tabulum spatii propinqui investiges. Interest enim hoc[33]), quia cum diametros umbrae spatii longinqui in XX digitos divisa sit, diametros umbrae spatii propinqui in XXI, utpote maior dividitur, quod enim[34]) inde procedit, quia cuiuslibet planetae circulus respectu terrae excentricus[35]) invenitur. Quod si luna in neutro locorum praedictorum fuerit, per argumentum tamen latitudinis in utramque[36]) istarum tabularum[37]) intrando adiuncta notanda sunt. Deinde minor summa a[38]) maiori subtrahenda, quodque superfuerit reponendum[38]) Postea vero per argumentum (*anomaliam*) lunae in tabulam[39]) pro-

C 85^{v}, O 142^{r} N 47^{v}

Cap. 34. De diversitatibus aspiciendi lunam secundum horas longitudinis et latitudinis[3]).

Antequam ad eclipsim solis accingamur, diversitas aspectuum lunae tractanda est. Cum itaque diversitatem aspectuum eius in longitudine et horas distantiae[4]) quaeris, horoscopus quidem in hora coniunctionis firme diligenterque[5]) notandus[6]). Ab eo itaque tribus subtractis signis medium caelum invenietur. His autem perspectis per[7]) ipsius horoscopi medium caelum in[8]) tabulam[9]) circuli aequinoctialis[10]), postea per gradum lunae in circulo aequinoctiali[11]) iterum[12]) intrandum erit, eorumque adiuncta sumenda. Deinde si fuerit luna inter horoscopum et medium caelum, erit medium caelum a loco lunae subtrahendum; quod si fuerit luna inter occasum et medium caelum[13]), erit locus lunae a medio caelo subtrahendus. Quod itaque restiterit, interstitium lunae et medii caeli ipsius horoscopi[14]) ostendit. Per hoc ergo in tabulam[15]) diversitatis aspectuum suppositam intrandum erit, eiusque adiunctum in horis et earum partibus notandum. Idem enim adiunctum in motum lunae inaequalem horarium[16]) ducendum erit[17]), quodque[18]) inde producetur diversitatem aspectus lunae ostendet in longitudine[19]). Si enim fuerit luna inter horoscopum et medium caelum, erit hoc productum horis coniunctionis addendum; si vero[20]) inter occasum et medium caelum fuerit, erit idem[21]) ab eodem minuendum. Quodque inde surget, horam eclipsis supra locum pro quo inquiris ex diversitate aspectus mutatam ponit.

Ad sciendam aspectuum diversitatem in latitudine[22]). Quod si diversitatem aspectuum in latitudine scire desideras, horoscopus item in ea hora firmiter notandus. Per eum enim medium[23]) caelum ut superius captandum est. Deinde ipsius medii caeli obliquatio quanta sit diligenter observandum. Quae si fuerit septemtrionalis[24]) et minor, erit ipsa a latitudine regionis praesentis minuenda[25]); quod si maior, latitudo quidem regionis ab ea erit minuenda. Sin autem meridio-

tus itaque in eam hic est : Ab ariete enim incipiens quolibet eius gradu horoscopo existente, per eundem gradum in tabulam intrandum erit, quodque ei[1]) adiunctum fuerit tam secundae quam tertiae et quartae et quintae et sextae casarum initia[2]) ostendit. Notandum vero[3]), quod[4]) septima primae, octava secundae, ceteraeque ceteris hoc ordine respondent. Unde[5]) alias sex apponere neglectum est.

C 90[r], O 146[r] N 56[r]

Cap. 37. Quomodo stellarum radiatio sive exagonalis sive tetragonalis sive trigonalis inveniatur.[6])

Stellarum radiatio hoc modo investiganda est. Quaecunque enim radiatio quaeritur, sive exagonalis, sive tetragonalis, sive trigonalis, primo quidem horoscopus quotus sui signi sit[7]), considerandum est, utrum scilicet[8]) quintus vel decimus vel quintus decimus vel vicesimus vel vicesimus quintus[9]) vel etiam tricesimus fuerit. Deinde gradus ipsius planetae[10]), cuius radiationem quaeris, notandum est. Per gradum itaque planetae[11]) aut ei proximum eo maiorem in numerum graduum aequalium intrandum est ; prima quidem area quinario[12]), secunda denario, tertia quindenario, quarta vigenario, quinta vicesimo quinto[13]), sexta trigenario[14]) serviente. Ab eo autem in paginam horoscoporum usque sub signum[15]) ipsius planetae[16]) procedendum est, adiunctumque illius[17]) servandum. Deinde radiationis quaesitae numerus in capite paginae praescriptus addendus est, quodque inde coacervabitur in ipsa pagina quaerendum aut saltem ei proximum ; alterum enim[18]) signorum ei praesidentium secundum gradus aequales ei[19]) praescriptos radiationem quaesitam monstrat. Quod si nec ipsum nec ei proximum tabula offert[20]), illum aliquem, quem ei propinquiorem eo minorem inveneris[21]), subtrahe, residuumque in pagina quaere. Ipse enim tibi et signum et gradum radiationis modo supradicto ostendet, eo tamen excepto, quod sana quidem inventio vel sane proxima signum superius, diminuta vero inferius frequenter eligit. Quod si horoscopus inter decimum vel inter XV vel
N 56[v] inter XX vel inter XXV sive inter XXX[22]) | fuerit, duae radiationes exhibendae erunt, in[23]) duabus scilicet[24]) areis servientibus quidem illis[25]) numeris inter quos horoscopus continetur. Verbi gratia, si inter X[26]) fuerit, prima radiatio in area quinarii, id est prima, secunda vero in area denarii, id est secunda, facienda est, similique modo
O 146[v] in ceteris. Quibus executis[27]) harum radiationum | differentia notanda est eademque supra[28]) quinarium dividenda ; quodque ad hoc attinet in additionem[29]) horoscopi

ducendum ; ipsum itaque productum, si quidem prima radiatio maior fuerit, ei subtrahendum, si vero minor, e contrario addendum est. Sicque habebitur radiatio praesenti inquisitioni propria. Haec autem omnia pro radiatione sinistra dicta sunt ; sunt autem et aliae, quas dextras dicunt. Oppositum enim exagoni sinistri trigonum dextrum praetendit[1]) ; oppositum autem tetragoni sinistri tetragonum dextrum, atque oppositum trigoni sinistri exagonum[2]) dextrum ostendit.

[Cum volueris scire proiectionem lucis stellarum ex exagono et tetragono et trigono, scias ergo horoscopum et quantum illius ortum fuerit. Quod si fuerint quinque gradus aut X aut XV aut XX aut XXV aut XXX[3]), scias quoque gradum stellae cuius radiationem quaeris atque signum in quo ipsa est. Postea intra cum gradu ipsius stellae in semitam graduum aequalium de tabula gradus horoscopici, et accipe quod fuerit in eius contrapositione ex horoscopo signi in quo est ipsa stella, ipsumque memoriter teneto. Si ergo quaesieris exagonum, adde supra illud quod est supra caput tabulae ex exagono, et si quaeris tetragonum, adde quod est supra caput trigoni, et si quaesieris trigonum, adde super illud quod est supra caput trigoni. Coacervatum autem quaere eius simile in ipsa tabula, aut quod est affinius illi minusque eo, et ubi inveneris ipsum minus, revertere ad gradus aequales, sicut revertitur a gradu horoscopi ad gradum aequalem. Scias autem ad quem gradus exieris ex gradibus aequalibus, iste igitur est, in quem cadit radiatio sinistra a stella de signo quod est in supremo tabulae secundum ordinem signorum. Scito autem, quando acciderit stella in postremitate signorum, quod[4]) est in semita prima, erit coacervatum tibi ex horoscopo, a quo sursum reverti quaeris, maius eo quod est in[5]) postremitate areae, minue ergo inde numerum qui est in postremitate areae, et quaere residuum in ipsa area, et accipe signum quod est in capite tabulae numeri in semita secunda.

Quod si horoscopus inter V et X, aut inter X et XV, aut inter XV et XX etc., fac ergo radiationem[6]) secundum quinque[7]) quae[8]) sunt ante id quod est minus, deinde secundum quinque[9]) quae sunt post id quod est maius ; sciasque differentiam ipsam. Deinde scito[10]) quantum addit gradus horoscopi supra quinque[11]) quae sunt ante, sciasque quae[12]) est proportio ipsius differentiae ad quinarium, et accipe ipsam proportionem ex differentia quae est inter duos numeros et memoriter teneto. Deinde respice ad radiationem primam, quod[13]) si addit supra secundam, minue inde quod memoriter teneri iussi ; sin autem fuerit minus, adde id supra illud. Quod igitur fuerit post augmentum vel[14]) diminutionem erit radiatio ipsius stellae.

Pro rumoribus horoscopus eiusque dominus, lunae signum eiusque dominus consideranda sunt. Haec namque secundum hoc quod in signis firmis vel non firmis fuerint, rumores affirmant vel infirmant.][15])

Critical notes

These notes are not part of the transcription. They record errors of the print and propose corrections; the transcription keeps the print.

AK07-CN008 AK07-J0033-N04 (wrong note number)
printed: [2]) meridie . . . feriae] proposed: [3]) meridie . . . feriae]
the note on «meridie quartae feriae» is note 3 (L04 «feriae{sup:3})»); the number is printed 2, a second time after the note 2 on «statum» in the same line
confidence: high
impact: the variant belongs to note 3

AK07-CN009 AK07-J0033-L07 (missing bracket)
printed: ezich[14] proposed: ezich[14])
the note numbers of the text are followed by a bracket on the line, «13)», «15)»; after the raised 14 of «ezich» the bracket is not printed
confidence: high
impact: none

AK07-CN010 AK07-J0034-N08 (wrong punctuation)
printed: partes. erunt proposed: partes, erunt
the sentence «Si enim dies in XXX dividatur partes, erunt earum XI totius diei quinta et sexta» runs on: the condition and its consequence are divided by a full stop where a comma is needed
confidence: medium
impact: none on the reading of O that the note reports

AK07-CN011 AK07-J0034-N04 (wrong sort)
printed: XXlIII proposed: XXIIII
the numeral, twenty-four hours, is set with a lower-case l in the place of the first I
confidence: high
impact: none

AK07-CN012 AK07-J0035-N10 (misprint)
printed: ct N proposed: et N
«addid. C et N in margine», C and N add in the margin; the e of «et» is printed as c
confidence: high
impact: none

AK07-CN278 AK07-J0035-N10 (misprint)
printed: secundum librum hea (canonum N) proposed: secundum kiteb hea (librum canonum N)
the list of misprints, p. [237] (JP2 0271, L03), reads «kiteb hea (librum canonum N)» for «librum hea (canonum N)» in note 32, which runs on into N11: the addition is given in the words of C, with the readings of N in parentheses
confidence: high
impact: none

AK07-CN013 AK07-J0036-N01 (wrong bracket)
printed: quidem) proposed: quidem]
the lemma of the apparatus closes with a square bracket, «Quod] Qui C.», «item] autem M.»; after «quidem» a round bracket is printed
confidence: high
impact: none

AK07-CN014 AK07-J0036-N05 (wrong bracket)
printed: [18]] proposed: [18])
the note numbers of the apparatus are followed by a round bracket, «17)», «19)»; after 18 a square bracket is printed

confidence: high
impact: none

AK07-CN015 AK07-J0037-L22 (wrong note number)
printed: notula[33]) proposed: notula[38])
the note numbers of the line run 37, 38, 39, 40, and the apparatus has note 38 on «notula» (N12, «38) notula] nota O.»); the number after «notula» is printed 33, which is already the note on «coacervato» in L18
confidence: high
impact: the variant of O belongs to note 38

AK07-CN016 AK07-J0038-L20 (wrong note number)
printed: teneto[21]) proposed: teneto[26])
the note numbers run 25, 26, 27 (L19-L22), and the apparatus has note 26 on «memoriter teneto» (N10, «26) memoriter teneto] tene O.»); the number after «teneto» is printed 21, which is already the note on «detrahendi» in L15
confidence: high
impact: the variant of O belongs to note 26

AK07-CN017 AK07-J0039-L13 (missing point)
printed: Cap 6. proposed: Cap. 6.
the chapter headings print the abbreviation with its point, «Cap. 5.» (p. 6), «Cap. 7.» (L19); after «Cap» of chapter 6 the point is not printed
confidence: high
impact: none

AK07-CN018 AK07-J0039-L37 (wrong punctuation)
printed: collectorum. deinde proposed: collectorum, deinde
the sentence of the right column runs on, «per numerum annorum collectorum, deinde per numerum annorum planorum praeteritorum»; the full stop before the lower-case «deinde» stands where a comma is needed
confidence: medium
impact: none

AK07-CN019 AK07-J0040-L39 (wrong punctuation)
printed: stabunt, Si proposed: stabunt. Si
the sentence ends with «restabunt», and the next begins with a capital, «Si vero ex hac reductione XII accreverint signa»; the comma stands where the full stop is needed
confidence: medium
impact: none

AK07-CN020 AK07-J0040-N03 (missing bracket)
printed: [7] istic] proposed: [7]) istic]
the note numbers of the apparatus are followed by a round bracket; after the 7 the bracket is not printed
confidence: high
impact: none

AK07-CN021 AK07-J0041-N02 (wrong sort)
printed: XXXlIII proposed: XXXIIII
the numeral that C corrects, thirty-four, is set with a lower-case l in the place of the first I, as on p. 2 (N04)
confidence: high
impact: none

AK07-CN022 AK07-J0041-N14 (wrong punctuation)
printed: paginam tadil O. tabulam tadil M. proposed: paginam tadil O, tabulam tadil M.

the readings of the manuscripts within a note are divided by commas, «tadil] C, paginam tadil O, tabulam tadil M.»; after the siglum O a full stop is printed before the lower-case «tabulam»
confidence: medium
impact: none

AK07-CN023 AK07-J0042-N02 (wrong sort)
printed: examínatione proposed: examinatione
the i of the word is printed with an acute accent, í, a sort of another fount; the word is «examinatione», as «examinationi» in the next line
confidence: high
impact: none

AK07-CN024 AK07-J0042-N14 (wrong punctuation)
printed: elheca] CM. argumentum O. proposed: elheca] CM, argumentum O.
the readings of the manuscripts within a note are divided by commas; after the sigla CM a full stop is printed before the lower-case «argumentum», as on p. 9 (N14)
confidence: medium
impact: none

AK07-CN025 AK07-J0042-N18 (wrong bracket)
printed: elheca) CM proposed: elheca] CM
the lemma of the apparatus closes with a square bracket; after «elheca» of note 34 a round bracket is printed
confidence: high
impact: none

AK07-CN026 AK07-J0045-L24 (wrong sort)
printed: trîa proposed: tria
the i of «tria» is printed with a circumflex, î, a sort of another fount; the word is «tria», as «prima tria» (L19) and «reliqua tria» (L26)
confidence: high
impact: none

AK07-CN027 AK07-J0046-N06 (wrong punctuation)
printed: M. tabula C. proposed: M, tabula C.
the readings of the manuscripts within a note are divided by commas; after the siglum M a full stop is printed before «tabula», as on pp. 9 and 10
confidence: medium
impact: none

AK07-CN028 AK07-J0046-N12 (turned letter)
printed: iungetnr proposed: iungetur
the u of «iungetur», it shall be joined, is printed upside down, as an n
confidence: high
impact: none

AK07-CN029 AK07-J0046-N16 (wrong note number)
printed: [28]) dakaicae] proposed: [29]) dakaicae]
the note on «dakaicae» in L22 is note 29 («dakaicae{sup:29})»); the apparatus prints its number 28, a second time after the note 28 on «submissio»
confidence: high
impact: the variant belongs to note 29

AK07-CN030 AK07-J0048-L05 (wrong numeral)
printed: 35 tertiis proposed: 36 tertiis
the month of thirty days is thirty times the daily motion of L02-L03, 0;59,8,17,13,12,31, which gives 29;34,8,36,36,15,30; the text has 35 thirds and the other places as computed. Ptolemy's monthly motion of the sun (Almagest III.1) is the same 29;34,8,36,36,15,30

confidence: high
impact: the thirds of the monthly motion read 35 for 36

AK07-CN031 AK07-J0048-L13 (misprint)
printed: appararitione proposed: apparitione
«de lunae apparitione», the appearance of the moon, as the heading of the chapter (L11); the syllable «ar» is printed twice
confidence: high
impact: none

AK07-CN032 AK07-J0048-N04 (wrong punctuation)
printed: C. eiusdem O. … C. om. O. proposed: C, eiusdem O. … C, om. O.
the readings within a note are divided by commas, «C, mensis cuiuslibet die quidem O.» (N03); in notes 7 and 9 a full stop is printed after the siglum C
confidence: medium
impact: none

AK07-CN033 AK07-J0049-N11 (wrong punctuation)
printed: a nonaginta O, — proposed: a nonaginta O. —
each note of the apparatus ends with a full stop before the dash; after the siglum O of note 24 a comma is printed
confidence: high
impact: none

AK07-CN279 AK07-J0049-N04 (missing reading)
printed: CO, alius planus alius diminutus N proposed: CO, *sed supra* planum *scrips.* C elmustewi, *supra* diminutum elmaruz, alius planus alius diminutus N
the list of misprints, p. [237] (JP2 0271, L05-L06): «Note 8 muss zwischen CO und alius eingefügt werden: sed supra planum scrips. C elmustewi, supra diminutum elmaruz», the Arabic words that C writes above «planum» and «diminutum»
confidence: high
impact: none

AK07-CN034 AK07-J0051-L11 (turned letter)
printed: qnaestione proposed: quaestione
the u of «quaestione» is printed upside down, as an n
confidence: high
impact: none

AK07-CN035 AK07-J0052-L13 (wrong punctuation)
printed: indicat[16]), Item proposed: indicat[16]). Item
the sentence on Aries ends with «indicat», and the rule for Taurus begins with a capital, «Item ad taurum», as «designabit{sup:23}). Item ad geminos.» (L17-L18); a comma is printed where the full stop is needed
confidence: high
impact: none

AK07-CN036 AK07-J0054-L09 (wrong note number)
printed: duodenarium[10a]) proposed: duodenarium[11a])
the notes added within the series are numbered after the note that they follow, «quaeris{sup:5a})» after note 5; the note on «duodenarium» follows note 11 and the apparatus numbers it 11a (N04, «{sup:11a}) duodenarium] O, XII C.»); the text prints 10a
confidence: high
impact: the variant belongs to note 11a

AK07-CN037 AK07-J0054-L10 (turned letter)
printed: secundnm proposed: secundum
the second u of «secundum» is printed upside down, as an n

confidence: high
impact: none

AK07-CN038 AK07-J0054-N02 (turned letter)
printed: quod qnaeris] proposed: quod quaeris]
the lemma repeats the text of L04, «quod quaeris»; the u of «quaeris» is printed upside down, as an n
confidence: high
impact: none

AK07-CN039 AK07-J0054-N11 (probable misprint)
printed: differentia corum considerata proposed: differentia eorum considerata
the reading of O in note 25: «sic igitur differentia eorum considerata», the difference of them (the two places) being considered, as the text has «differentiaque locorum illorum considerata» (L21); «corum» is no Latin word, probably c for e. It may report the spelling of O itself
confidence: medium
impact: none on the text

AK07-CN040 AK07-J0056-N11 (wrong punctuation)
printed: quoque] C. om. O. proposed: quoque] C, om. O.
the readings within a note are divided by commas, «aut] C, om. O.» (N12); after the siglum C a full stop is printed before «om.»
confidence: high
impact: none

AK07-CN041 AK07-J0057-N08 (wrong bracket)
printed: [20]] duarum] proposed: [20]) duarum]
the note numbers of the apparatus are followed by a round bracket, «19)», «21)»; after 20 a square bracket is printed
confidence: high
impact: none

AK07-CN042 AK07-J0057-N09 (wrong bracket)
printed: [24]] invenisti] proposed: [24]) invenisti]
the note numbers are followed by a round bracket, «23)», «25)»; after 24 a square bracket is printed
confidence: high
impact: none

AK07-CN043 AK07-J0058-L21 (misprint)
printed: tabulum proposed: tabulam
«tabulam spatii propinqui investiges», as «tabulam spatii remoti tractes» in the same sentence (L20-L21); the a of the ending is printed as u
confidence: high
impact: none

AK07-CN044 AK07-J0058-L28 (wrong note number and missing point)
printed: reponendum[38]) Postea proposed: reponendum[39]). Postea
the apparatus has note 39 on «quodque . . . . reponendum» (N16); the text repeats 38, the number of the note on «a» in L27; and the sentence ends with «reponendum», before «Postea vero», where the full stop is not printed
confidence: high
impact: the variant of note 39 belongs here

AK07-CN045 AK07-J0058-N17 (wrong note number)
printed: [39]) in tabulam] proposed: [40]) in tabulam]
the note on «in tabulam» (L28, «tabulam{sup:39}»») is the note after note 39 on «quodque . . . . reponendum»: text and apparatus both number it 39 again, where it is 40

confidence: high
impact: none on the readings

AK07-CN046 AK07-J0058-N08 (wrong bracket)
printed: [14]] aptum] proposed: [14]) aptum]
the note numbers of the apparatus are followed by a round bracket; after 14 a square bracket is printed, its upper part missing
confidence: high
impact: none

AK07-CN280 AK07-J0058-L28 (wrong note number)
printed: tabulam[39]) proposed: tabulam[40])
the list of misprints, p. [237] (JP2 0271, L08), reads 39) and 40) for the 38) and 39) of this line, and 40) for 39) in the last line of the notes (critical notes AK07-CN044 and AK07-CN045): the note on «in tabulam» follows note 39 on «quodque . . . . reponendum»
confidence: high
impact: none

AK07-CN047 AK07-J0061-N03 (wrong bracket)
printed: [6]) meridionalis) N proposed: [6]) meridionalis] N
the lemmata of the apparatus are closed by a square bracket, «septemtrionalis] N» (note 5), «ergo] C» (note 7); after «meridionalis» a round bracket is printed
confidence: high
impact: none

AK07-CN281 AK07-J0063-L15 (wrong word)
printed: caput trigoni, et si quaesieris proposed: caput tetragoni, et si quaesieris
the list of misprints, p. [237] (JP2 0271, L10), reads «tetragoni» for «trigoni» at the beginning of the line: for the quadrature one adds the number at the head of the field over «Tetragonum» («et si quaeris tetragonum, adde quod est supra», L14), as for the trine the number over «Trigonum» at the end of the line
confidence: high
impact: none

AK07-CN083 AK07-J0141-L02 (wrong sort)
printed: dics proposed: dies
the head of the column of the days: the third letter is a c, with the ball of the c and no bar of an e; the column holds the days, «dies»
confidence: high
impact: none

AK07-CN084 AK07-J0141-N07 (wrong punctuation)
printed: *om,* M proposed: *om.* M
the abbreviation «om.» has its point everywhere in the apparatus, as «om. N» (N01) and «om. M» (N09); a comma is printed for the point
confidence: high
impact: none

AK07-CN085 AK07-J0146-N09 (wrong fount)
printed: Nota : **per** annos proposed: Nota : per annos
the word «per» in C's added rule is set in bold type; the rest of the quotation and of the apparatus is in roman
confidence: medium
impact: none

AK07-CN086 AK07-J0150-N09 (missing bracket)
printed: [o]) 22 O, 21 C proposed: [o]) 22] O, 21 C

the lemma of every note of the apparatus is closed by a square bracket, as «n) 17] O, 16 C» and «p) 13] O, 42 C» beside it; the bracket after 22 is not printed
confidence: high
impact: none

AK07-CN087 AK07-J0151-L06 (wrong sort)
printed: **Mln**.[7]) proposed: **Min**.[7])
the head of the minutes of the anomaly in the hours: the i is printed as an l, without its dot and with the full height of an ascender (21 px); «Min.» as in the other three heads of the minutes
confidence: high
impact: none

AK07-CN088 AK07-J0152-L13 (wrong note number)
printed: Scabin[15]) proposed: Scabin[14])
the apparatus has «14) Scabin] O, Sabhin C» and «15) Ramadh.] Rathă O, bothan C» (N05-N06); «Ramadh.15)» stands in the next row (L14), so that the number 15 is printed twice and 14 not at all
confidence: high
impact: none

AK07-CN089 AK07-J0152-N06 (missing siglum)
printed: Dulk' O, dulkeda — proposed: Dulk' O, dulkeda C —
every reading of the apparatus is followed by the siglum of its manuscript; the months are omitted in M (note 9), so that «dulkeda» can only be the reading of C, as «Sabhin C» and «bothan C» in the same line
confidence: medium
impact: none

AK07-CN090 AK07-J0152-N11 (missing bracket)
printed: [d]) 26 ON, 25 CM proposed: [d]) 26] ON, 25 CM
the lemma of every note of the apparatus is closed by a square bracket, as «c) 23] CO, 21 M» and «e) 13] OMN, 17 C» beside it; the bracket after 26 is not printed
confidence: high
impact: none

AK07-CN091 AK07-J0152-N12 (wrong punctuation)
printed: 27 M, — proposed: 27 M —
the readings of a note end with their siglum and no comma before the dash that divides the notes, as «31 M —» and «57 M —» in the same line
confidence: high
impact: none

AK07-CN286 AK07-J0152-L29 (wrong figure)
printed: 0 proposed: 1
the sign of the anomaly of Saturn for 60 days, the cell after «60»: 60 × 57′ 7.8″ = 57° 7′ 48″ = 1s 27° 7′ 48″, where 0s is printed; the list of misprints, p. [237] (JP2 0271, L17-L18), reads 1 for 0 in the column of the signs at 60 days in «Heza Saturni supradictum»
confidence: high
impact: none

AK07-CN092 AK07-J0154-L17 (missing bracket)
printed: Dulheia[16] proposed: Dulheia[16])
the note numbers in the text of the tables are followed by a round bracket, as «Dulkada15)» in the row above; after 16 it is not printed
confidence: high
impact: none

AK07-CN093 AK07-J0154-N01 (wrong punctuation)

printed: annis collectis C, [3]) planis] proposed: annis collectis C — [3]) planis]
the notes of the apparatus are divided by a long dash, as before note 2 and after note 3 in the same line; a comma is printed for the dash
confidence: high
impact: none

AK07-CN094 AK07-J0154-N02 (stray point)
printed: [8]) Rabe. I.] proposed: [8]) Rabe I.]
the lemma repeats the word of the table, «Rabe I.8)» (L08); no point stands after «Rabe», as in the lemma «Rabe II.]» of note 9
confidence: high
impact: none

AK07-CN095 AK07-J0154-N08 (wrong bracket)
printed: [i]] 54] proposed: [i]) 54]
the letters of the notes on the numbers are followed by a round bracket, as «h) 0]» and «k) 4]» beside it; after i a square bracket is printed
confidence: high
impact: none

AK07-CN096 AK07-J0155-L04 (wrong sort)
printed: dicrum proposed: dierum
the head of the column of the days, «Numerus dierum», as on p. 121 (JP2 0153); the e is printed without its bar, as a c, as in «dics» on p. 109 (JP2 0141)
confidence: high
impact: none

AK07-CN097 AK07-J0155-N01 (wrong sort)
printed: Dakaicac C proposed: Dakaicae C
C's word for the minutes of the hours, «Dakaicae horarum C» in the apparatus of Tab. 5 (p. 116, JP2 0148); the final e is printed without its bar, as a c
confidence: medium
impact: none

AK07-CN098 AK07-J0156-L04 (misprint)
printed: in mensibue proposed: in mensibus
«in mensibus», as the heads «in collectis» and «in planis» beside it and «in mensibus» on p. 122 (JP2 0154); the final s is printed as e
confidence: high
impact: none

AK07-CN099 AK07-J0156-L14 (missing point)
printed: Ramadh[11]) proposed: Ramadh.[11])
the abbreviation has its point in the lemma of note 11, «Ramadh.]», and in the table of p. 122 (JP2 0154), «Ramadh.13)»
confidence: medium
impact: none

AK07-CN100 AK07-J0156-N02 (wrong bracket)
printed: [7]) I.) proposed: [7]) I.]
the lemma of a note is closed by a square bracket, as «8) II.]» in the next line; after «I.» a round bracket is printed
confidence: high
impact: none

AK07-CN101 AK07-J0156-N11 (missing dash)
printed: 25 O [α]) proposed: 25 O — [α])

the notes of the apparatus are divided by a long dash; between z and α only a wide space is printed
confidence: medium
impact: none

AK07-CN102 AK07-J0157-L22 (wrong figure)
printed: 9 proposed: 0
the degrees of the motion of Mars in 17 hours, 22′ 16″ (17 × 1′ 18.6″): every other row of the hours has 0 in the column of the degrees, and the 9 is printed in that column of the 17 hours
confidence: high
impact: none

AK07-CN103 AK07-J0158-N04 (wrong punctuation)
printed: Rab.’ O — Babe elarhik C proposed: Rab.’ O, Babe elarhik C
within a note the readings of the manuscripts are divided by a comma, as «Rab.’ O, Rabe elawel C» in note 6; the long dash, which divides the notes, is printed between the two readings of note 7
confidence: medium
impact: none

AK07-CN104 AK07-J0158-N04 (missing point)
printed: Jumedi I] … Jumedi II] proposed: Jumedi I.] … Jumedi II.]
the lemmata repeat the words of the table, «Jumedi I.8)» and «Jumedi II.9)» (L10-L11), as «Rabe I.]» and «Rabe II.]» in the notes before them; the points after I and II are not printed
confidence: medium
impact: none

AK07-CN105 AK07-J0160-L05 (wrong sort)
printed: **See**. proposed: **Sec**.
the head of the seconds of the single years: the c is printed as an e, «See.» against «Sec.» in the heads of the other two parts of the table
confidence: high
impact: none

AK07-CN106 AK07-J0160-L03 (stray point)
printed: N 32^{v}.. proposed: N 32^{v}.
the folios in the margin beside the titles end with a single point, as «N 18v.» (p. 126, JP2 0158) and «N 19r.» (p. 127, JP2 0159); a second point is printed after «N 32v.»
confidence: medium
impact: none

AK07-CN107 AK07-J0160-N04 (stray bracket)
printed: Jumedi I.] Jumedi elawel] C proposed: Jumedi I.] Jumedi elawel C
the reading of C, «Jumedi elawel», is not a lemma and takes no bracket, as «Rabe elawel C» and «Rabe elakhir C» before it
confidence: high
impact: none

AK07-CN108 AK07-J0160-N04 (missing point)
printed: ^{10}) Jumedi II] proposed: ^{10}) Jumedi II.]
the lemma repeats the word of the table, «Jumedi II.10)» (L11), as «Jumedi I.]» in note 9
confidence: medium
impact: none

AK07-CN109 AK07-J0163-N04 (wrong sort)
printed: *tn quartam* proposed: *in quartam*
the preposition «in», as «in tertiam» later in the same line; an italic t, with its bar and its ascender (28 px), is printed for the i

confidence: high
impact: none

AK07-CN110 AK07-J0167-L04 (wrong sort)
printed: Sulcj numerorum (C) proposed: Sulci numerorum (C)
the head of C, «Sulci numerorum (C)» on p. 134 (JP2 0166) and «Sulci C» in the apparatus of p. 133 (JP2 0165); a j with its descender is printed for the final i
confidence: high
impact: none

AK07-CN111 AK07-J0168-L10 (wrong punctuation)
printed: **Sig**, proposed: **Sig**.
the abbreviation of «Signa», «Sig.» in the first column of the same head and in every head of the tables; the point is printed as a comma, its tail below the line
confidence: medium
impact: none

AK07-CN112 AK07-J0168-N01 (wrong fount)
printed: *om. C* proposed: *om.* C
the siglum after «om.» is in roman everywhere in the apparatus, as «om. M» (p. 109, JP2 0141); here the C is set in italics with «om.»
confidence: medium
impact: none

AK07-CN113 AK07-J0168-N03 (missing point)
printed: 46 COBj — proposed: 46 COBj. —
the abbreviation of Björnbo's name, «Bj.», as «16 COBj. —» on p. 135 (JP2 0167)
confidence: medium
impact: none

AK07-CN114 AK07-J0168-N04 (wrong punctuation)
printed: ^{f}) 32] ON. 22 C proposed: ^{f}) 32] ON, 22 C
the readings of a note are divided by a comma, as «g) 13] C, 14 ON» beside it; a point is printed after ON
confidence: high
impact: none

AK07-CN115 AK07-J0170-N08 (wrong bracket)
printed: $^{\alpha}$) 14) 17 M_2 proposed: $^{\alpha}$) 14] 17 M_2
the lemma of a note is closed by a square bracket, as «z) 47] 46 O» and «β) 35] 25 M2» beside it; a parenthesis is printed after 14
confidence: high
impact: none

AK07-CN116 AK07-J0170-N04 (stray comma)
printed: ^{c}) 4], *om.* C proposed: ^{c}) 4] *om.* C
«om.» follows the lemma directly, as «58] om. C» (p. 121, JP2 0153) and «1] om. O» (p. 110, JP2 0142); a comma is printed after the bracket
confidence: high
impact: none

AK07-CN117 AK07-J0172-L06 (wrong sort)
printed: Dimlnutio proposed: Diminutio
the head «Diminutio proprietatum omnium» on pp. 138-139 (JP2 0170-0171) and the lemma «Augmentum (Diminutio) . . . . omnium]» of note 2 here; an l, of the height of the d, is printed for the second i
confidence: high
impact: none

AK07-CN118 AK07-J0173-L05 (probable misprint)
printed: Catur eladed (C) proposed: Catar eladed (C)
the head of C, «Catar eladed (C)» on pp. 133 and 136-140 (JP2 0165, 0168-0172), and Suter's «Catar» (p. XIV, JP2 0018); p. 143 (JP2 0175) has «Catur» too; no note of the apparatus records a different spelling
confidence: medium
impact: none

AK07-CN119 AK07-J0173-L09 (missing point)
printed: **Min** proposed: **Min.**
the units «Min.» of the other columns and of pp. 138-140 (JP2 0170-0172)
confidence: high
impact: none

AK07-CN120 AK07-J0173-L11 (missing parenthesis)
printed: 34[b] proposed: 34[b])
the note marks of the tables close with a parenthesis, as «18c)» in the row above
confidence: high
impact: none

AK07-CN121 AK07-J0175-L18 (wrong figure)
printed: 2 proposed: 6
the sign of the arguments of the second column is 6 in every other row of the page, and 6s 21° = 201° = 360° − 159°, the complement of the 5s 9° of the row; a 2 is printed
confidence: high
impact: none

AK07-CN122 AK07-J0175-L05 (probable misprint)
printed: Catur eladed (C) proposed: Catar eladed (C)
the head of C, «Catar eladed (C)» on pp. 133 and 136-140 (JP2 0165, 0168-0172), and Suter's «Catar» (p. XIV, JP2 0018); p. 141 (JP2 0173) has «Catur» too; no note of the apparatus records a different spelling
confidence: medium
impact: none

AK07-CN123 AK07-J0177-L34 (wrong figure)
printed: 28 proposed: 18
the degrees of the Sublimatio at 56°: the column falls from 5s 18° 35′ at 55° to 5s 18° 28′ at 57°, and 5s 22° 32′ less half of the 8° 1′ of the row is 5s 18° 31½′; a 2 is printed for the 1 of 18
confidence: high
impact: none

AK07-CN287 AK07-J0177-N01 (misprint)
printed: Maudho Jauzezarhu proposed: Maudho Jauzegarhu
the list of misprints, p. [237] (JP2 0271, L20), reads «Jauzegarhu» for «Jauzezarhu» in note 1 of Tab. 34
confidence: high
impact: none

AK07-CN124 AK07-J0179-N04 (wrong bracket)
printed: [c])—[c]) 2) ON proposed: [c])—[c]) 2] ON
the lemma of a note is closed by a square bracket, as «4] ON» of note b in the same line; a parenthesis is printed after 2
confidence: high
impact: none

AK07-CN125 AK07-J0179-N04 (stray point)
printed: *om.* C. — [d]) proposed: *om.* C — [d])

the readings of a note end without a point before the dash, as «om. C —» of note b in the same line; a point is printed after the siglum
confidence: high
impact: none

AK07-CN126 AK07-J0180-L30 (wrong note letter)
printed: 34[e]) proposed: 34[c])
note c of the apparatus, «c) 34] ON, 33 C», is the note on the Sublimatio 5s 18° 34′ of this row, and no other cell of the table bears the letter c; note e, «15] ON, 12 C», belongs to the 15 of the Examinatio centri in L29
confidence: high
impact: none

AK07-CN127 AK07-J0180-N01 (missing point)
printed: Locus . . . . M] proposed: Locus . . . . M.]
the title reads «2 S. 22 G. 1 M.», and the lemma of p. 147 (JP2 0179) «Locus . . . . M.]»; p. 149 (JP2 0181) has «M]» too
confidence: medium
impact: none

AK07-CN128 AK07-J0180-N01 (stray comma)
printed: omnium], N, proposed: omnium] N,
the readings follow the lemma directly, as «omnium] N,» of note 3 in the next line; a comma is printed after the bracket
confidence: high
impact: none

AK07-CN129 AK07-J0181-N01 (missing point)
printed: 2 S . . . . M] proposed: 2 S . . . . M.]
the title reads «2 S. 22 G. 1 M.», and the lemma of p. 147 (JP2 0179) «Locus . . . . M.]»; p. 148 (JP2 0180) has «M]» too
confidence: medium
impact: none

AK07-CN130 AK07-J0181-L35 (probable misprint)
printed: 0 proposed: 1
the degrees of the Examinatio argumenti at 176°: the Sublimatio of the row, 5s 22° 2′, is 5s 22° 32′ less half of 1° 0′, and the column falls by 14′ or 15′ a degree, from 1° 14′ at 175° to 0° 45′ at 177°; an equation of 0° 0′ belongs only to 180°; no note of the apparatus reports it
confidence: medium
impact: none

AK07-CN131 AK07-J0182-L11 (missing point)
printed: **Sig** proposed: **Sig.**
the units «Sig.» of the other columns and of the Sublimatio on pp. 144-149 (JP2 0176-0181)
confidence: high
impact: none

AK07-CN132 AK07-J0182-N02 (missing bracket)
printed: [5]) Martis C, proposed: [5]) Martis] C,
the lemma of a note is closed by a square bracket before the sigla, as «Sublimatio] C» of note 2 and «ascendentis] O» of note 6
confidence: high
impact: none

AK07-CN133 AK07-J0183-L06 (turned letter)
printed: Semita nnmerorum (C) proposed: Semita numerorum (C)

«Pagina numerorum (O)» in the line above and «Semitae numerorum (C)» on pp. 144-146 (JP2 0176-0178); the first u is printed upside down as an n
confidence: high
impact: none

AK07-CN134 AK07-J0183-L05 (missing point)
printed: N 16^{r} proposed: N 16^{r}.
the folios in the margin beside the titles end with a point, as «N 15v.» (p. 150, JP2 0182) and «N 14r.» (p. 149, JP2 0181)
confidence: medium
impact: none

AK07-CN135 AK07-J0184-L05 (missing point)
printed: N 16^{v} proposed: N 16^{v}.
the folios in the margin beside the titles end with a point, as «N 15v.» (p. 150, JP2 0182); «N 16r» on p. 151 (JP2 0183) lacks it too
confidence: medium
impact: none

AK07-CN136 AK07-J0186-L03 (wrong punctuation)
printed: C 64^{r}, O 121^{v}. proposed: C 64^{r}, O 121^{v},
the folios of C and O end with a comma before the folio of N in the next line, as «C 63v, O 121r,» (p. 153, JP2 0185) and «C 63r, O 120v,» (p. 152, JP2 0184); a point is printed after «121v»
confidence: medium
impact: none

AK07-CN137 AK07-J0186-N01 (wrong sort)
printed: Sublimafio proposed: Sublimatio
«Sublimatio» in the lemma of the same note and in the head of the column; an f is printed for the t
confidence: high
impact: none

AK07-CN138 AK07-J0187-L33 (wrong figure)
printed: 3 proposed: 4
the sign of the Sublimatio at 173°: the column is in sign 4 from 171° (4s 0° 32′) to 180° (4s 8° 24′), and 4s 8° 24′ less half of 12° 36′, the Examinatio argumenti of the row, is 4s 2° 6′; a 3 is printed in the column of the signs
confidence: high
impact: none

AK07-CN139 AK07-J0187-L36 (wrong figure)
printed: 3 proposed: 4
the degrees of the Sublimatio at 176°: the column rises from 4s 3° 48′ at 175° to 4s 5° 34′ at 177°, and 4s 8° 24′ less half of 7° 28′, the Examinatio argumenti of the row, is 4s 4° 40′; a 3 is printed for the 4
confidence: high
impact: none

AK07-CN140 AK07-J0187-L08 (turned letter)
printed: proprietatnm proposed: proprietatum
«proprietatum» in the head at its left and in the heads of pp. 150-154 (JP2 0182-0186); the u is printed upside down as an n
confidence: high
impact: none

AK07-CN141 AK07-J0189-N05 (stray point)
printed: ^{n})—^{n}) 16] ON, *om.* C. — proposed: ^{n})—^{n}) 16] ON, *om.* C —

the readings of a note end without a point before the dash, as «om. C —» of note m in the same line; a point is printed after the siglum
confidence: high
impact: none

AK07-CN142 AK07-J0189-N06 (missing bracket)
printed: [t])—[t]) 4 ON, proposed: [t])—[t]) 4] ON,
the lemma of a note is closed by a square bracket, as «3] ON» of note s in the same line
confidence: high
impact: none

AK07-CN143 AK07-J0191-L02 (missing parenthesis)
printed: **Tadil** (O proposed: **Tadil** (O)
the sigla after the titles stand in parentheses, as «(N)» and «(C)» in the lines above and below and «Tadil (O)» on p. 157 (JP2 0189); the closing parenthesis is not printed
confidence: high
impact: none

AK07-CN144 AK07-J0191-N04 (stray point)
printed: [h])—[h]) 17] 27 O, *om.* C. — proposed: [h])—[h]) 17] 27 O, *om.* C —
the readings of a note end without a point before the dash, as «om. C —» of note f in the same line; a point is printed after the siglum
confidence: high
impact: none

AK07-CN145 AK07-J0192-L10 (missing point)
printed: **Gr** proposed: **Gr.**
the units «Gr.» of the other columns and of the Examinatio centri on pp. 156-159 (JP2 0188-0191)
confidence: high
impact: none

AK07-CN146 AK07-J0192-N01 (missing bracket)
printed: [2]) ascensus O, proposed: [2]) ascensus] O,
the lemma of a note is closed by a square bracket before the sigla, as «examinata] O» in the same line and «ascensus] O» on p. 158 (JP2 0190, note 1)
confidence: high
impact: none

AK07-CN147 AK07-J0192-N05 (wrong bracket)
printed: [m]) 48) 33 CO proposed: [m]) 48] 33 CO
the lemma of a note is closed by a square bracket, as «n) 42] 20 CO» beside it; a parenthesis is printed after 48
confidence: high
impact: none

AK07-CN148 AK07-J0193-L01 (wrong sort)
printed: **Côaequatio** proposed: **Coaequatio**
«Coaequatio» in the titles of N on pp. 156-160 (JP2 0188-0192); an o with a circumflex accent is printed for the o
confidence: high
impact: none

AK07-CN149 AK07-J0193-L28 (wrong figure)
printed: 0 proposed: 1
the degrees of the Latitudo secunda at 168°: 5° · sin 168° = 1° 2′ 22.4″, the column passes from 1° 7′ 29″ at 167° to 0° 57′ 15″ at 169°, and p. 156 (JP2 0188) at 12° and Saturn at 168° (p. 143, JP2 0175) have 1° 2′ 22″; a 0 is printed in the column of the degrees

confidence: high
impact: none

AK07-CN150 AK07-J0194-L37 (probable misprint)
printed: 56 proposed: 50
the minutes of the Latitudo secunda at 27°, printed 2° 56′ 15″: 6° 15′ · sin 27° = 2° 50′ 14.8″, with the seconds of the table; the column must rise to 90°, and 2° 56′ 15″ is more than the 2° 56′ 3″ of 28°, whose minutes it repeats; no note of the apparatus reports it
confidence: medium
impact: none

AK07-CN151 AK07-J0195-L02 (wrong siglum)
printed: **Tadil** (C) proposed: **Tadil** (O)
each title is followed by the siglum of its manuscript, and C's title is «Examinatio Mercurii (C)» in the next line; the folio line gives O 126r for this page, and O's titles are «Tadil elotari elketib (O)» on p. 162 and «Elotari (O)» on p. 164 (JP2 0194, 0196); a C is printed for the O
confidence: medium
impact: none

AK07-CN152 AK07-J0195-L10 (missing point)
printed: **Gr** proposed: **Gr.**
the unit of the Diminutio, «Gr.» in the other columns and on pp. 162 and 164 (JP2 0194, 0196)
confidence: high
impact: none

AK07-CN153 AK07-J0195-L10 (missing point)
printed: **Sig** proposed: **Sig.**
the unit of the Statio prima, «Sig.» in the other columns and on pp. 162 and 164 (JP2 0194, 0196)
confidence: high
impact: none

AK07-CN154 AK07-J0195-N04 (wrong punctuation)
printed: ^{i}) 25] ON. 35 C proposed: ^{i}) 25] ON, 35 C
the readings of a note are divided by a comma, as «h) 18] ON, 28 C» beside it; a point is printed after ON
confidence: high
impact: none

AK07-CN155 AK07-J0196-L33 (wrong figure)
printed: 8 proposed: 9
the sign of the arguments of the second column is 9 in every other row of the page, and 9s 7° = 277° = 360° − 83°, the complement of the 2s 23° of the row; an 8 is printed
confidence: high
impact: none

AK07-CN156 AK07-J0197-N01 (stray point)
printed: *om.* C. — ^{3}) proposed: *om.* C — ^{3})
the readings of a note end without a point before the dash, as «argumenti C —» in the next line; a point is printed after the siglum
confidence: high
impact: none

AK07-CN157 AK07-J0198-L05 (wrong sort)
printed: Latitude Mercurii proposed: Latitudo Mercurii
the lemma of note 7, «La-titudo. . . descendentis]», and the heads «Latitudo Mercurii» on pp. 162-165 (JP2 0194-0197); an e is printed for the final o
confidence: high

impact: none

AK07-CN158 AK07-J0198-L04 (stray point)
printed: 0. 21. 10. proposed: 0. 21. 10
the place of the node ends without a point before the sigla on pp. 162-165 (JP2 0194-0197), «0. 21. 10 (CON)»
confidence: medium
impact: none

AK07-CN159 AK07-J0198-N02 (missing siglum)
printed: [3]) proprietatum omnium] computationis proposed: [3]) proprietatum omnium] N, computationis
the lemma of a note is followed by the siglum of its source, as «proprietatum omnium] N,» in note 2 and «Diminutio . . . . omnium] N,» on p. 148 (JP2 0180, note 3); the readings of C and O follow the lemma here without it
confidence: medium
impact: none

AK07-CN160 AK07-J0198-N03 (stray parenthesis)
printed: examinis CO) — proposed: examinis CO —
the readings of note 3 end with the sigla before the dash, as «examinis CO —» of note 2; a closing parenthesis without an opening one is printed after CO
confidence: high
impact: none

AK07-CN161 AK07-J0198-N03 (stray point)
printed: *om.* C. — [5]) proposed: *om.* C — [5])
the readings of a note end without a point before the dash, as «definita C —» beside it; a point is printed after the siglum
confidence: high
impact: none

AK07-CN162 AK07-J0198-N06 (probable misprint)
printed: flscerafehu proposed: fiscerafehu
the transliterated Arabic fī šarafihi, «in its exaltation»; the ligature fl, with a second stem of the height of the ascenders, is printed where fi is expected
confidence: medium
impact: none

AK07-CN163 AK07-J0199-L04 (wrong fount)
printed: **0. 21. 10 (CN)** proposed: **0. 21. 10** (CN)
the sigla after the titles are set in roman, as «(CON)» after the same line on pp. 163-166 (JP2 0195-0198); here «(CN)» is set in bold with the title
confidence: medium
impact: none

AK07-CN164 AK07-J0199-L31 (wrong figure)
printed: 3 proposed: 5
the sign of the arguments of the first column is 5 in every other row of the page, and 5s 21° = 171°, the complement of the 6s 9° of the row; a 3 is printed
confidence: high
impact: none

AK07-CN165 AK07-J0200-L01 (missing comma)
printed: C 71^{r}, O 128^{v} proposed: C 71^{r}, O 128^{v},
the folios of C and O end with a comma before the folio of N in the next line, as «C 70v, O 128r,» on p. 167 (JP2 0199)
confidence: medium

impact: none

AK07-CN166 AK07-J0200-N02 (contradictory sigla)
printed: [c]) 57] C, 17 CO proposed: [c]) 57] C, 17 O (or 57] N, 17 CO)
the note gives C both for the lemma 57 and for the variant 17; the 57 is required by the symmetry of the table (21° 57′ at Virgo XXX, L05); either the second C is set by analogy with «20 CO» of note d, or the first C stands for N
confidence: medium
impact: none

AK07-CN167 AK07-J0200-N02 (stray point)
printed: *corr. ex.* 16 C proposed: *corr. ex* 16 C
«corr. ex» without a point after «ex» on pp. 138 and 144 (JP2 0170, 0176)
confidence: medium
impact: none

AK07-CN168 AK07-J0201-L03 (missing parenthesis)
printed: Elgeib (CO proposed: Elgeib (CO)
the sigla after a head stand in parentheses, as «Elgeib (CO)» over the sines of the right half; the closing parenthesis is not printed
confidence: high
impact: none

AK07-CN169 AK07-J0201-L03 (turned letter)
printed: Semitae numerornm (CO) proposed: Semitae numerorum (CO)
«Semitae numerorum (CO)» over the arguments of the left half; the second u is printed upside down as an n
confidence: high
impact: none

AK07-CN170 AK07-J0203-N03 (wrong punctuation)
printed: Dar. O. Daregae C proposed: Dar. O, Daregae C
the readings of a note are divided by a comma, as «Elth. O, theniae C» of note 8 in the next line; a point is printed after O
confidence: high
impact: none

AK07-CN171 AK07-J0205-L12 (wrong figure)
printed: 546 proposed: 246
the degrees of Virgo 5°: the column runs 245 at 4° and 247 at 6°, and 246° 54′ 11″ is Pisces 5° (66° 54′ 11″, p. 171) increased by 180° and 360° less Aries 25° (113° 5′ 49″); 246° 54′ 8.3″ computed; a 5 is printed for the 2
confidence: high
impact: none

AK07-CN172 AK07-J0205-L33 (wrong figure)
printed: 366 proposed: 266
the degrees of Virgo 26°: the column runs 265 at 25° and 267 at 27°, and 266° 20′ 27″ is Pisces 26° (86° 20′ 27″, p. 171) increased by 180° and 360° less Aries 4° (93° 39′ 33″); 266° 20′ 26.2″ computed; a 3 is printed for the 2
confidence: high
impact: none

AK07-CN173 AK07-J0205-L36 (wrong figure)
printed: 20 proposed: 29
the «Gradus regulares» of Libra in the row of 29°: the column runs 28 in L35 and 30 in L37, and the other three columns have 29 in this row
confidence: high

impact: none

AK07-CN174 AK07-J0206-N04 (wrong sort)
printed: ^{h}] 3] proposed: ^{h}) 3]
the letter of each note is followed by a closing parenthesis, as «{sup:g}) 10]» before it and «{sup:i}) 51]» after it; a bracket is printed after the raised h
confidence: high
impact: none

AK07-CN175 AK07-J0208-L19 (wrong figure)
printed: 14 proposed: 15
the minutes of the radius of the sun at 42°: the column has 15 in every other row from 31° to 60°, 15′ 48″ at 41° and 15′ 49″ at 43°, and 6.6 times the hourly motion of the sun gives 15′ 48.3″; a 4 is printed for the 5
confidence: high
impact: none

AK07-CN176 AK07-J0209-N04 (missing bracket)
printed: ^{f}) 1 proposed: ^{f}) 1]
the lemma of each note is closed by a bracket before the sigla, as «{sup:e}) 58] C, 57 O» before it; the bracket after the 1, the last figure of the line, is not printed
confidence: high
impact: none

AK07-CN177 AK07-J0210-N03 (missing bracket)
printed: $^{d\text{-}d}$) 33 ON proposed: $^{d\text{-}d}$) 33] ON
the lemma of each note is closed by a bracket before the sigla, as «{sup:c}) 32] ON» before it and «{sup:e}) 34] N» after it; no bracket is printed after 33
confidence: high
impact: none

AK07-CN178 AK07-J0214-L02 (turned letter)
printed: Gradns proposed: Gradus
«Gradus regulares» stands over the column of the arguments on p. 181 (JP2 0213) and in note 1, «regulares]»; the u of «Gradus» is printed upside down as an n
confidence: high
impact: none

AK07-CN179 AK07-J0214-N02 (stray point)
printed: *itemque in. cet. col.* proposed: *itemque in cet. col.*
«itemque in cet. col.» without a point after «in», as earlier in the same line; a point is printed after «in»
confidence: high
impact: none

AK07-CN180 AK07-J0215-L12 (wrong figure)
printed: 3 proposed: 4
the weekday number of 151: the numbers fall by 2 (mod 7) each 30 years, 6 at 121 and 2 at 181, and Tab. 2 (p. 110, JP2 0142) has 4 at 150; a 3 is printed
confidence: high
impact: none

AK07-CN181 AK07-J0215-L08 (wrong figure)
printed: 5 proposed: 6
the sign of the mean longitude at 31: the Radix 4s 22° 11′ 9″ + 37° 57′ 37″ is 6s 0° 8′ 46″, and 7s 8° 6′ 23″ at 61 is 6s 0° 8′ 46″ + 37° 57′ 37″; a 5 is printed
confidence: high
impact: none

AK07-CN182 AK07-J0215-L11 (wrong figure)
printed: 14 proposed: 24
the degrees of the mean longitude at 121: 8s 16° 4′ 0″ at 91 + 37° 57′ 37″ is 9s 24° 1′ 37″, and 11s 1° 59′ 14″ at 151 is 9s 24° 1′ 37″ + 37° 57′ 37″; a 1 is printed for the 2
confidence: high
impact: none

AK07-CN183 AK07-J0215-L09 (impossible value)
printed: 33 proposed: 23
the degrees of the anomaly at 61, printed with O and N (note k), cannot exceed 29 within a sign; C's 23 gives 11s 23° 56′ 47″ = 1s 29° 51′ 52″ + 9s 24° 4′ 55″, the step of the column, and 9s 18° 1′ 42″ at 91 is 9s 24° 4′ 55″ more
confidence: high
impact: none

AK07-CN184 AK07-J0215-L08 (wrong figure)
printed: 46 proposed: 56
the seconds of the time at 31: the column grows by 13m 44s or 13m 45s each 30 years, and 14m 56s gives 13m 45s from the Radix (1m 11s) and to 61 (28m 41s), where 46 gives 13m 35s and 13m 55s; the opposition at 31 (Tab. 70, p. 184), 14d 5h 52m 57s, plus 14d 18h 21m 59s, the interval at the Radix, is 29d 0h 14m 56s; a 4 is printed for the 5
confidence: high
impact: Suter's example quotes the printed 29d 0h 14m 46s (p. 81, JP2 0113, L36)

AK07-CN185 AK07-J0215-L15 (wrong figure)
printed: 27 proposed: 26
the minutes of the anomaly at 241: 0s 24° 21′ 27″ at 211 + 9s 24° 4′ 55″ is 10s 18° 26′ 22″, 8s 12° 31′ 18″ at 271 is 10s 18° 26′ 22″ + 9s 24° 4′ 56″, and the opposition at 241 (Tab. 70, p. 184), 4s 5° 31′ 49″, + 6s 12° 54′ 33″ is 10s 18° 26′ 22″; a 7 is printed for the 6
confidence: high
impact: none

AK07-CN186 AK07-J0216-L12 (wrong figure)
printed: 3 proposed: 4
the weekday number of 151: the numbers fall by 2 (mod 7) each 30 years, 6 at 121 and 2 at 181, and Tab. 2 (p. 110, JP2 0142) has 4 at 150; a 3 is printed, as at the same row on p. 183 (JP2 0215)
confidence: high
impact: none

AK07-CN187 AK07-J0216-L08 (wrong figure)
printed: 4 proposed: 3
the degrees of the argument of latitude at 31: the Radix 6s 2° 11′ 29″ + 8s 1° 25′ 22″ is 2s 3° 36′ 51″, 10s 5° 2′ 13″ at 61 is 2s 3° 36′ 51″ + 8s 1° 25′ 22″, and the conjunction at 31 (p. 183), 8s 18° 56′ 57″, less 6s 15° 20′ 6″ is 2s 3° 36′ 51″; a 4 is printed
confidence: high
impact: none

AK07-CN188 AK07-J0216-N05 (wrong punctuation)
printed: 23] C. proposed: 23] C,
the readings of a note are divided by a comma, as «24] C, 27 O» of note e in the line above; a point is printed after C at the end of the line, perhaps a comma whose tail did not print

AK07-CN245 AK07-J0253-N04 (missing bracket)
printed: ^{h})—^{h}) 5—30 ON proposed: ^{h})—^{h}) 5—30] ON
the lemma of each note is closed by a bracket before the sigla, as «5—30] ON» in note c (N03) and «5–30] ON» in note p (N06); no bracket is printed after 30
confidence: high
impact: none

AK07-CN246 AK07-J0253-N06 (wrong punctuation)
printed: ^{r}) 148] C; 158 O proposed: ^{r}) 148] C, 158 O
the readings of a note are divided by a comma, as «{sup:q}) 12] C, 20 O» before it and «{sup:s}) 178] C, 177 O» after it; a semicolon is printed after C
confidence: high
impact: none

AK07-CN247 AK07-J0253-N05 (stray point)
printed: 121. 22. C, 122. 0. O proposed: 121. 22 C, 122. 0 O
the numbers of the heads in the notes end without a point before the sigla, as «77. 31 C, 67. 31 O, 98. 58 N» on p. 220 (JP2 0252, N04); a point is printed after the last number of each reading, as on p. 215 (JP2 0247, N03; critical note AK07-CN240)
confidence: medium
impact: none

AK07-CN248 AK07-J0255-L21 (wrong figure)
printed: 13 proposed: 53
the minutes of the last number of the second field, at 30° of Taurus: the numbers at its head, 55° 38′, 83° 26′ and 111° 15′ (L15), are a third, a half and two thirds of 166° 53′, as the heads of the first and the third field are those of their last numbers (L03, L23); with 53 the last step of the column is 5° 15′, as the steps before it, 5° 10′ to 5° 28′, where with 13 it is 4° 35′, and the field lies 2° 12′ below the first and 3° 20′ above the third, as 1° 44′ and 3° 28′ at 25° of Taurus (with 13, 2° 52′ and 2° 40′); a 1 is printed for the 5
confidence: medium
impact: none

AK07-CN249 AK07-J0255-N01 (missing dash)
printed: XXV. N proposed: XXV. N —
the notes of the apparatus are divided by a long dash, as «XX. N —» before it in the same line; after the readings of note 2, at the end of the line, none is printed before note 3
confidence: high
impact: none

AK07-CN250 AK07-J0256-L03 (wrong figure)
printed: 107° 18′ proposed: 106° 18′
the trine is two thirds of the number of which the sextile 53° 9′ and the quadrature 79° 43′ are a third and a half, the last number of the field, 159° 27′ (L13), whose two thirds are 106° 18′; a 7 is printed for the 6
confidence: high
impact: none

AK07-CN251 AK07-J0256-L14 (wrong letter)
printed: **Dccem**^{2}) proposed: **Decem**^{2})
the lemma of note 2 reads «Decem» (N01), as the headings of the fields of 10° on pp. 206-222 (JP2 0238-0254); a c is printed for the first e, or an e that has lost its bar

confidence: high
impact: none

AK07-CN252 AK07-J0256-N02 (wrong punctuation)
printed: decimus O. *om.* C proposed: decimus O, *om.* C
the readings of a note are divided by a comma, as «Decimus O, {i:om.} C, X. N» in note 2 (N01); a point is printed after O
confidence: high
impact: none

AK07-CN253 AK07-J0256-N04 (missing dash)
printed: *om.* C [b]) proposed: *om.* C — [b])
the notes of the apparatus are divided by a long dash, as between the notes b and c after it; between the notes a and b only a wide space is printed, as between z and α on p. 124 (JP2 0156; critical note AK07-CN101)
confidence: high
impact: none

AK07-CN254 AK07-J0256-N04 (missing dash)
printed: 70 O proposed: 70 O —
the notes of the apparatus are divided by a long dash; after the readings of note e, at the end of the line, none is printed before note f at the start of the next, as after note 2 on p. 223 (JP2 0255, N01; critical note AK07-CN249)
confidence: high
impact: none

AK07-CN255 AK07-J0257-L13 (wrong figure)
printed: 48 proposed: 28
the minutes of the last number of the first field, at 30° of Gemini: the numbers at its head, 51° 29′, 77° 14′ and 102° 58′ (L03), are a third, a half and two thirds of 154° 27′ to 154° 28′; with 28 the last step of the column is 5° 41′, as the steps before it, 5° 30′ to 5° 40′, where with 48 it is 6° 1′, and the last numbers of the six fields of Capricornus decrease, 159° 27′, 158° 25′ and 154° 38′ (p. 224, JP2 0256, L13, L21, L29), 154° 28′, 152° 58′ and 151° 43′ (L21, L29), where 154° 48′ lies above the 154° 38′ of the field of 15°; a 4 is printed for the 2
confidence: medium
impact: none

AK07-CN256 AK07-J0257-N05 (wrong punctuation)
printed: [i]) 95] C. 55 O proposed: [i]) 95] C, 55 O
the readings of a note are divided by a comma, as «{sup:k}) 109] C, 110 O» after it; a point is printed after C
confidence: high
impact: none

AK07-CN257 AK07-J0257-N06 (missing dash)
printed: (*v. tab. seq.*) proposed: (*v. tab. seq.*) —
the notes of the apparatus are divided by a long dash; after the readings of note p, at the end of the line, none is printed before note q at the start of the next, as on p. 224 (JP2 0256, N04; critical note AK07-CN254)
confidence: high
impact: none

AK07-CN258 AK07-J0257-N07 (missing point)
printed: 5 …30] proposed: 5….30]
the lemmata of the paired notes b and h read «5….30», with four points (N03, N05); in that of r a space stands for the first point
confidence: medium

impact: none

AK07-CN259 AK07-J0258-N01 (wrong punctuation)
printed: Quintus O; V. N proposed: Quintus O, V. N
the readings of a note are divided by a comma, as «Quintus O, V. N» in the same note on p. 214 (JP2 0246, N01); a semicolon is printed after O
confidence: high
impact: none

AK07-CN260 AK07-J0258-N02 (wrong punctuation)
printed: XV. N. *om.* C. proposed: XV. N, *om.* C.
the readings of a note are divided by a comma, as «Decimus O, om. C, X. N» in note 3 (N01-N02); a point is printed after N
confidence: high
impact: none

AK07-CN261 AK07-J0258-N04 (wrong sort)
printed: *òm.* proposed: *om.*
«om.» everywhere else in the apparatus, as in the notes b, c and k on this page; an o with a grave accent is printed for the o
confidence: high
impact: none

AK07-CN262 AK07-J0258-N06 (wrong punctuation)
printed: *om.* C; 20 N proposed: *om.* C, 20 N
the readings of a note are divided by commas, also after an omission, as «Vicesimus O, om. C, XX. N» on p. 225 (JP2 0257, N01); a semicolon is printed after C
confidence: medium
impact: none

AK07-CN263 AK07-J0259-L15 (stray dash)
printed: **Trigonum — 97°** proposed: **Trigonum 97°**
the numbers at the head of a field follow their names without a dash, as «Trigonum 98° 48′» and «Trigonum 97° 23′» in the other two fields (L03, L23); a dash is printed between «Trigonum» and 97
confidence: high
impact: none

AK07-CN264 AK07-J0259-N05 (wrong punctuation)
printed: [1]) 29] C. 21 O proposed: [1]) 29] C, 21 O
the readings of a note are divided by a comma, as «{sup:m}) 67] C, 47 O» after it; a point is printed after C, as on p. 225 (JP2 0257, N05; critical note AK07-CN256)
confidence: high
impact: none

AK07-CN265 AK07-J0260-L01 (wrong punctuation)
printed: O 157^{r}. N 68^{r}. proposed: O 157^{r}, N 68^{r}.
the folios of the manuscripts are divided by commas, as «C 101v, O 156v, N 67v.» on p. 227 (JP2 0259); a point is printed after «157r», as after «85r» on p. 190 (JP2 0222; critical note AK07-CN215)
confidence: high
impact: none

AK07-CN266 AK07-J0260-N01 (stray point)
printed: [3]) 48. 19.] proposed: [3]) 48. 19]
the numbers of the heads in the notes end without a point before the bracket, as «58. 27]» on p. 222 (JP2 0254, N04) and «50. 59]» on p. 225 (JP2 0257, N03); a point is printed after 19, as on p. 215 (JP2 0247, N03; critical note AK07-CN240)

confidence: medium
impact: none

AK07-CN267 AK07-J0261-L14 (wrong note number)
printed: **Viginti quinque**[3]) proposed: **Viginti quinque**[2])
the apparatus gives the readings for «Viginti quinque» in note 2 (N01); note 3 belongs to «Triginta» (L22), which carries it
confidence: high
impact: none

AK07-CN268 AK07-J0261-N03 (wrong punctuation)
printed: [a]) 97] C. 96 O proposed: [a]) 97] C, 96 O
the readings of a note are divided by a comma, as «{sup:c}) 20] C, 10 O» in the same line; a point is printed after C, as on p. 214 (JP2 0246, N03; critical note AK07-CN237)
confidence: high
impact: none

AK07-CN269 AK07-J0261-N05 (missing comma)
printed: [k]) 45] C 25 O proposed: [k]) 45] C, 25 O
the readings of a note are divided by a comma, as «{sup:l}) 135] O, 134 C» after it; none is printed after C
confidence: high
impact: none

AK07-CN270 AK07-J0261-N06 (missing dash)
printed: ON, 14 C proposed: ON, 14 C —
the notes of the apparatus are divided by a long dash; after the readings of note s, at the end of the line, none is printed before note t at the start of the next, as on p. 224 (JP2 0256, N04; critical note AK07-CN254)
confidence: high
impact: none

AK07-CN271 AK07-J0262-L14 (wrong figure)
printed: 293 proposed: 243
the degrees of the conversion of 80 years: eight times the 930° 22′ 30″ of ten years are 7443°, 243° after twenty circles, and 243° 0′ 0″ is the sum of the numbers for 10 and 70 years (210° 22′ 30″ and 32° 37′ 30″, L07, L13) and the 20d 16h 12m of the same line (L14) turned into degrees at 15° to the hour; with 243 each decade exceeds the one before by 210° 22′ 30″, as everywhere else in the column; the apparatus has no variant; a 9 is printed for the 4
confidence: high
impact: none

AK07-CN272 AK07-J0263-L29 (wrong figure)
printed: Mars 9° proposed: Mars 5°
the terms of Mars in Aquarius: in the other eleven signs the table has the Egyptian terms (Ptolemy, Tetrabiblos, the chapter on the terms), and in these Aquarius has Jupiter 7° and Mars 5°; with Jupiter 7°, O's reading (note b), and Mars 5° the terms of Jupiter over the twelve signs add up to 79° and those of Mars to 66°, which with Saturn's 57°, Venus's 82° and Mercury's 76° make 360°; the 9 repeats the Mars 9° of Pisces in the same column of the next line (L30)
confidence: medium
impact: none

AK07-CN273 AK07-J0263-L29 (wrong emendation)
printed: Jupiter3°[b]) proposed: Jupiter7°[b])
O has 7° (note b: «3°] 7° O»); the editor's 3 makes the terms of Aquarius add up to 30° with the Mars 9° that follows, where the Egyptian terms of the other eleven signs have Jupiter 7° and Mars 5° in Aquarius (critical note AK07-CN272)

confidence: medium
impact: none
